The Semiotics of Che Guevara Maria-Carolina Cambre, 2014-11-20 Alberto Korda's famous photograph of Che Guevara titled the Guerrillero Heroico has been reproduced, modified and remixed countless times since it was taken on March 5, 1960, in Havana, Cuba. This book looks again at this well-known mass-produced image to explore how an image can take on cultural force in diverse parts of the globe and legitimate varying positions and mass action in unexpected global political contexts. Analytically, the book develops a comparative analysis of how images become attached to a range of meanings that are

absolutely inseparable from their contexts of use. Addressing the need for a fluid and responsive approach to the study of visual meaning-making, this book relies on multiple methodologies such as semiotics, research-creation, multimodal discourse analysis, ethnography and phenomenology and shows how each method has something to offer toward the understanding of the social and cultural work of images in our globally oriented cultures.

Hardware: The Definitive SF Works of Chris Foss

Chris Foss, 2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s.

Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has

become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." – Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." – Alejandro Jodorowsky
