Anderson, Judy Anderson, 2010-03-30 This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

The Digital Person Daniel J Solove, 2004 In a revealing study of how digital dossiers are created (usually without our knowledge), the author argues that we must rethink our understanding of what privacy is and what it means in the digital age, and then reform the laws that define and regulate it. Chassis Handbook Bernhard Heißing, Metin Ersoy, 2010-11-09 In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a

number of improvements over the first edition.

Archaeology Bjørnar Olsen, 2012-11-19 "This book exhorts the reader to embrace the materiality of archaeology by recognizing how every step in the discipline's scientific processes involves interaction with myriad physical artifacts, ranging from the camel-hair brush to profile drawings to virtual reality imaging. At the same time, the reader is taken on a phenomenological journey into various pasts, immersed in the lives of peoples from other times, compelled to engage their senses with the sights, smells, and noises of the publics and places whose remains they study. This is a refreshingly original and provocative look at the meaning of the material culture that lies at the foundation of the archaeological discipline."—Michael Brian Schiffer, author of *The Material Life of Human Beings* "This volume is a radical call to fundamentally rethink the ontology, profession, and practice of archaeology. The authors present a closely reasoned, epistemologically sound argument for why archaeology should be considered the discipline of things, rather than its more commonplace definition as the study of the human past through material traces. All scholars and students of archaeology will need to read and contemplate this thought-provoking book."—Wendy Ashmore, Professor of Anthropology, UC Riverside A broad, illuminating, and well-researched overview of theoretical problems pertaining to archaeology. The authors make a calm defense of the role of objects against tedious claims of 'fetishism.'—Graham Harman, author of *The Quadruple Object*

Cannabis Ernest Small, 2016-10-14 Cannabis sativa is best known as the source of marijuana, the world's most widely consumed illicit recreational drug. However, the plant is also extremely useful as a source of stem fiber, edible seed oil, and medicinal compounds, all of which are undergoing extremely promising research, technological applications, and business investment. Indeed, despite its capacity for harm as a recreational drug, cannabis has phenomenal potential for providing new products to benefit society and for generating extensive employment and huge profits. Misguided policies, until recently, have prevented legitimate research on the beneficial properties of cannabis, but there is now an explosion of societal, scientific, and political support to reappraise and remove some of the barriers to usage. Unfortunately, there is also a corresponding dearth of objective analysis. Towards redressing the limitation of information, *Cannabis: A Complete Guide* is a comprehensive reference summarizing botanical, business, chemical, ecological, genetic, historical, horticultural, legal, and medical considerations that are critical for the wise advancement and management of cannabis in its various forms. This book documents both the risks and benefits of what is indisputably one of the world's most important species. The conflicting claims for medicinal virtues and toxicological vices are examined, based mainly on the most recent authoritative scientific reviews. The attempt is made consistently to reflect majority scientific opinion, although many aspects of cannabis are controversial. Aside from the relevance to specialists, the general public should find the presentation attractive because of the huge interest today in marijuana. Unfortunately, society has become so specialized

and compartmentalized that most people have limited appreciation of the importance of science to their lives, except when a topic like marijuana becomes sensationalized. This review of cannabis can serve as a vehicle for public education in the realm of science and technology. Indeed, towards the goal of disseminating the important information in this book to a wide audience, the presentation is user-friendly, concise, and well-illustrated in the hope that non-specialists will find the topics both informative and entertaining.

Reframing Prostitution N. Persak, G. Vermeulen, 2014-07-07 Prostitution has always

fascinated the public and bewildered policy makers. Reframing Prostitution explores several aspects of this multidimensional phenomenon, examining different ways in which prostitution is and was being practised in different places and different times, best practices in the regulation of prostitution as well as wider social and psychological issues, such as the construction of prostitution as incivility or of prostitutes as a socially problematic group or as victimised individuals. The book also addresses normative questions with respect to policy making, unmasking the purposes behind certain societal reactions towards prostitution as well as proposing innovative solutions that could reconcile societal fears of exploitation and abuse while meeting the rights and needs of individuals voluntarily involved in prostitution. With contributions across social science disciplines, this international collection presents a valuable discussion on the importance of empirical studies in various segments of prostitution, highlights social contexts around it and challenges regulatory responses that frame our thinking about prostitution, promoting fresh debate about future policy directions in this area.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Sinophone Southeast Asia, 2021-09-06 This volume explores the diverse linguistic landscape of Southeast Asia's Chinese communities. Based on archival research and previously unpublished linguistic fieldwork, it unearths a wide variety of language histories, linguistic practices, and trajectories of words. The localized and often marginalized voices we bring to the spotlight are quickly disappearing in the wake of standardization and homogenization, yet they tell a story that is uniquely Southeast Asian in its rich hybridity. Our comparative scope and focus on language, analysed in tandem with history and culture, adds a refreshing dimension to the broader field of Sino-
