The Flying Tigers John Toland 2014-11-26 During World War II, a group of American fighter pilots roamed the skies over China and Burma, menacing the Japanese war effort without letup. Flamboyant, daring, and courageous, they were called the Flying Tigers. The Tigers, who had been recruited from the Army, Navy, and Marines, first saw action as a volunteer group fighting on the side of the Chiang Kia-shek's China against Japan. Trained in the unconventional air-combat tactics of their maverick leader Claire Lee Chennault, they racked up some of the most impressive air victory records of World War II. This is the story of Chennault and his magnificent Tigers – and how they performed the impossible.

Bubbles in Food 2 Grant Campbell 2016-06-11 Bubbles give novelty and distinctiveness to many food and drink products including the most important and interesting ones such as bread, beer, ice cream, whipped cream, soufflés and champagne. Understanding the creation and control of bubbles in food products is key to the success of the domestic chef or the industrial food manufacturer. This new volume presents the proceedings of the conference Bubbles in Food 2: Novelty, Health and Luxury. This book is fully updated and expanded from the original Bubbles in Food book published in 1999. This new title brings together up-to-date information on the latest developments in this fast moving area. Bubbles in Food 2 includes novel experimental techniques for measuring and quantifying the aerated structure of foods (e.g. ultrasonics, MRI imaging, X-ray tomography, microscopy, rheology, image analysis), and novel analytical approaches for interpreting aerated food properties and behavior. These techniques and approaches provide stimulus for new product development or for enhancing the understanding of the manufacture of

existing products, leading to enhanced quality and greater product differentiation. Bubbles in Food 2: Novelty, Health and Luxury aims to enhance the appreciation of aerated foods and to provide stimulation and cross fertilisation of ideas for the exploitation of bubbles as a novel and versatile food ingredient. *A Taste of Blackberries* Doris Buchanan Smith 1992-04-24 What do you do without your best friend? Jamie isn't afraid of anything. Always ready to get into trouble, then right back out of it, he's a fun and exasperating best friend. But when something terrible happens to Jamie, his best friend has to face the tragedy alone. Without Jamie, there are so many impossible questions to answer -- how can your best friend be gone forever? How can some things, like playing games in the sun or the taste of the blackberries that Jamie loved, go on without him?

The Story of the Root Children Sibylle von Olfers 2021-06-24 Classic nature tale in art nouveau style. Perfect for fans of Cicely Mary Barker's Flower Fairies **Citizenship Law in Africa** Bronwen Manby 2012-07-27 Few African countries provide for an explicit right to a nationality. Laws and practices governing citizenship leave hundreds of thousands of people in Africa without a country to which they belong. Statelessness and discriminatory citizenship practices underlie and exacerbate tensions in many regions of the continent, according to this report by the Open Society Institute. **Citizenship Law in Africa** is a comparative study by the Open Society Justice Initiative and Africa Governance Monitoring and Advocacy Project. It describes the often arbitrary, discriminatory, and contradictory citizenship laws that exist from state to state, and recommends ways that African countries can bring their citizenship laws in line with international legal norms. The report covers topics such as citizenship by descent, citizenship by naturalization, gender discrimination in citizenship law, dual citizenship, and the right to identity documents and passports. It describes how stateless Africans are systematically exposed to human rights abuses: they can neither vote nor stand for public office; they cannot enroll their children in school, travel freely, or own property; they cannot work for the government.--Publisher description.

Rethinking Power Sector Reform in the Developing World Vivien Foster 2019-12-05 During the 1990s, a new paradigm for power sector reform was put forward emphasizing the restructuring of utilities, the creation of regulators, the participation of the private sector, and the establishment of competitive power markets. Twenty-five years later, only a handful of developing countries have fully implemented these Washington Consensus policies. Across the developing world, reforms were adopted rather selectively, resulting in a hybrid

model, in which elements of market orientation coexist with continued state dominance of the sector. This book aims to revisit and refresh thinking on power sector reform approaches for developing countries. The approach relies heavily on evidence from the past, drawing both on broad global trends and deep case material from 15 developing countries. It is also forward looking, considering the implications of new social and environmental policy goals, as well as the emerging technological disruptions. A nuanced picture emerges. Although regulation has been widely adopted, practice often falls well short of theory, and cost recovery remains an elusive goal. The private sector has financed a substantial expansion of generation capacity; yet, its contribution to power distribution has been much more limited, with efficiency levels that can sometimes be matched by well-governed public utilities. Restructuring and liberalization have been beneficial in a handful of larger middle-income nations but have proved too complex for most countries to implement. Based on these findings, the report points to three major policy implications. First, reform efforts need to be shaped by the political and economic context of the country. The 1990s reform model was most successful in countries that had reached certain minimum conditions of power sector development and offered a supportive political environment. Second, countries found alternative institutional pathways to achieving good power sector outcomes, making a case for greater pluralism. Among the top performers, some pursued the full set of market-oriented reforms, while others retained a more important role for the state. Third, reform efforts should be driven and tailored to desired policy outcomes and less preoccupied with following a predetermined process, particularly since the twenty-first-century century agenda has added decarbonization and universal access to power sector outcomes. The Washington Consensus reforms, while supportive of the twenty-first-century century agenda, will not be able to deliver on them alone and will require complementary policy measures

The Licit Life of Capitalism Hannah Appel 2019-12-13 The Licit Life of Capitalism is both an account of a

specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.
