Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Approaches to Prototyping R. Budde,K. Kuhlenkamp,L. Mathiassen,H. Züllighoven,2012-12-06 This conference will focus on the user-oriented development of information systems. Against a background of recent concepts for the implementation of distributed systems based on workstation computers, various communicational, organizational and social issues gain increasing importance in the construction of computer based information systems. There is an urgent need to integrate end-users and other affected groups into the development process. New strategies for system development are thus needed. This was the beginning of the Call for Papers to the Working Conference on Prototyping. Working in the fields of user-oriented software construction and the analysis of communication problems between developers and users we, that is the GMD team involved in this conference and in preparing its Proceedings, sooner or later came across various new concepts to overcome the problems sketched above. Concepts focusing on the quick construction of an operative system such as rapid prototyping or concepts aiming at the human and organizational side of the development process such as Systemeering. Even on a second look, the multitude of different approaches, terms and tools still caused confusion. But despite the differences every concept seemed to have something to do with Prototyping. This, however, proved to be of little help to us, because the term Prototyping itself turned out to be quite fuzzy. In this obviously confused situation we decided that it was time for a working conference.

How Writing Came About Denise Schmandt-Besserat,2010-01-01 An “utterly lucid, thoughtfully illustrated, and thoroughly convincing” book on the origins of the world’s oldest known system of writing (American Journal of Archaeology). One of American Scientist's Top 100 Books on Science, 2001 In 1992, the University of Texas Press published Before Writing, Volume I: From Counting to Cuneiform and Before Writing, Volume II: A Catalog of Near Eastern Tokens. In these two volumes, Denise Schmandt-Besserat set forth her groundbreaking theory that the cuneiform script invented in the Near East in the late fourth millennium B.C.—the world's oldest known system of writing—derived from an archaic counting device. How Writing Came About draws material from both volumes of this scholarly work to present Schmandt-Besserat’s theory in an abridged version for a wide public and classroom audience. Based on the analysis and interpretation of a selection of 8,000 tokens or counters from 116 sites in Iran, Iraq, the Levant, and Turkey, it documents the immediate precursor of the cuneiform script./DIV

Native Peoples of the Plains Linda Lowery, 2016-08-01 A long time ago, before the Plains region of the United States was divided up into states such as Nebraska, Colorado, and Wyoming, this land was home to American Indians. Twenty-eight unique Indian nations built homes and gathered food in the Plains. They spoke distinct languages, set up political systems, and made art. They used the natural resources available in their region in order to thrive. • The Wichita lived in houses made of grass. From the outside, they looked like giant haystacks. • Omaha and Ponca people wore caps made from eagleskin. • Lakota men carved flutes to play songs for the girls they hoped to marry. Many American Indians still live in the Plains region. Explore the history of these various nations and find out how their culture is still alive today.

Notes from the Hyena's Belly Nega Mezlekia, 2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, *Notes from the Hyena's Belly* offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Hidden Alliances Elisabeth Schimana, 2020-02-18 Where are all of the women in the avant-garde electronic music scene? Anyone who thinks they do not exist is totally wrong. It is, however, a fact that hardly anyone has done any research on them or written about them. Wondering about a world allegedly lacking in female electronic musicians, Elisabeth Schimana began a search in the late 1990s and the initial results of her research went into her performance *Portrait 01 - Die Futuristin* (*Portrait 01 - the female futurists*). Her research brought her into the sphere of electronic music, which culminated in the founding of the IMA- Institute for Media Archaeology. Now, this publication presents twenty female artists and their work. The artists create a somewhat different picture of the creation and development of electronic music. This illustrated volume is as intriguing as it is fascinating, and, above all, a significant portrait of this new history.
