Deep-Sea Mining Rahul Sharma, 2017-03-28 This comprehensive book contains contributions from specialists who provide a complete status update along with outstanding issues encompassing different topics related to deep-sea mining. Interest in exploration and exploitation of deep-sea minerals is seeing a revival due to diminishing grades and increasing costs of processing of terrestrial minerals as well as availability of several strategic metals in seabed mineral resources; it therefore becomes imperative to take stock of various issues related to deep-sea mining. The authors are experienced scientists and engineers from around the globe developing advanced technologies for mining and metallurgical extraction as well as performing deep sea exploration for several decades. They invite readers to learn about the resource potential of different deep-sea minerals, design considerations and development of mining systems, and the potential environmental impacts of mining in international waters.

Chinese Lessons from Other Peoples' Wars Andrew Scobell, David Lai, Roy Kamphausen, 2011-11-01 The annual Conference on the Chinese People's Liberation Army (PLA) took place at the U.S. Army War College (USAWC), in Carlisle, Pennsylvania, on October 22-24, 2010.¹ The topic for this year's conference was the PLA's lessons from Other People's Wars. Participants at the conference sought to discern what lessons the PLA has been learning from the strategic and operational experiences of the armed forces of other countries during the past 3 decades. Why did observers of the PLA want to study what Chinese military analysts might learn about non-Chinese wars? The answer is twofold. First, the PLA has not fought an actual war since 1979. Yet, during the last 3 decades, fundamental changes have taken place on the battlefield and in the conduct of war. Since the PLA has not fought since 1979, it had no experience in the changing face of war, and thus could not follow Mao Zedong's admonition to learn by doing; instead, it must look abroad for ways to discern the new pattern of warfare in the evolving information age. Studying Chinese military analysts' observations of non-Chinese wars therefore provides us a glimpse of what the PLA takes from others' experience to improve its capability and to prepare itself for dealing with China's national security issues, such as Taiwan, the South and East China Sea disputes, and internal unrest in Tibet and Xinjiang, to name

the most obvious ones. Second, Chinese military analysts have noticeably more freedom in assessing and commenting on the strength and weakness as well as the success and failures of other countries' wars. Indeed, for political reasons, Chinese military analysts have to emphasize the heroics and triumphs of the PLA's war experience and downplay setbacks and failures.² While there is certainly recognition of the daunting challenges in Korea, for example, accounts readily acknowledge that the Chinese People's Volunteers (CPV) were totally unprepared logistically and devastated by airpower—there are limits to the levels of candor. To date, there is no critical analysis of the PLA's claimed success or dismissed failure in the Sino-Vietnamese Border War of 1979 by Chinese military analysts (however, there are a few studies done by scholars outside of China³). Studying Chinese military analysts' observation of other people's wars, therefore, provide us key hints as to what Chinese military analysts consider important aspects of current and future military operational success and failure.

India's Neighbourhood Vishal Chandra, 2013 Examines the role, relevance and status of armies in the dynamic socio-political milieu of the countries in India's South Asian neighbourhood. This book is part of an ongoing endeavour to further explore and understand the role of the Army in shaping the political destiny and defining the ideational evolution of states in South Asia.

The Great Gamble Gregory Feifer, 2009-01-06 The Soviet war in Afghanistan was a grueling debacle that has striking lessons for the twenty-first century. In *The Great Gamble*, Gregory Feifer examines the conflict from the perspective of the soldiers on the ground. During the last years of the Cold War, the Soviet Union sent some of its most elite troops to unfamiliar lands in Central Asia to fight a vaguely defined enemy, which eventually defeated their superior numbers with unconventional tactics. Although the Soviet leadership initially saw the invasion as a victory, many Russian soldiers came to view the war as a demoralizing and devastating defeat, the consequences of which had a substantial impact on the Soviet Union and its collapse. Feifer's extensive research includes eye-opening interviews with participants from both sides of the conflict. In gripping detail, he vividly depicts the invasion of a volatile country that no power has ever successfully conquered. Parallels between the Soviet invasion of Afghanistan and the U.S. invasions of Afghanistan and Iraq are impossible to ignore—both conflicts were waged amid vague ideological rhetoric about freedom. Both were roundly condemned by the outside world for trying to impose their favored forms of government on countries with very different ways of life. And both seem destined to end on uncertain terms. A groundbreaking account seen through the eyes of the men who fought it, *The Great Gamble* tells an unforgettable

story full of drama, action, and political intrigue whose relevance in our own time is greater than ever.

Russia's Border Wars and Frozen Conflicts James J. Coyle,2017-07-03 This book examines the origins and execution of Russian military and political activities in Moldova, Georgia, Ukraine, and Azerbaijan. Using a realist perspective, the author concludes that there are substantial similarities in the four case studies: Russian support for minority separatist movements, conflict, Russian intervention as peacekeepers, Russian control over the diplomatic process to prevent resolution of the conflict, and a perpetuation of Russian presence in the area. The author places the conflicts in the context of international law and nationalism theory.

Critical Thinking Brooke Noel Moore,Richard Parker,2011-01-11 Imagine a class where students are actively and personally engaged in thinking critically while also discovering how to apply those thinking skills in everyday life. Now imagine those same students confidently participating in class, working efficiently through the exercises outside class, and performing better in the course. With Connect Critical Thinking, students can achieve this success. Connect Critical Thinking is a first: a learning program with pedagogical tools that are anchored in research on critical thinking. Along with Moore & Parker's engaging writing style and the wealth of topical exercises and examples that are relevant to students' lives, Connect Critical Thinking helps ensure that students can come to class confident and prepared. What other course provides students with skills they can apply so broadly to success in school and success in life?

The Chaos Scenario Bob Garfield,2009 What happens when the old mass media/mass marketing model collapses and the Brave New World is unprepared to replace it? In this fascinating, terrifying, instructive and often hilarious book, Bob Garfield of NPR and Ad Age, chronicles the disintegration of traditional media and marketing but also travels five continents to discover how business can survive--and thrive--in a digitally

connected, Post-Media Age. He calls this the art and science of Listenomics. You should listen, too.

Advanced Weaponry Matt Chandler, 2022-01-01 From stealth bombers to heat-seeking missiles, militaries around the world use cutting-edge technology to create powerful weapons. This hi/lo title introduces the science of advanced weaponry through leveled text and crisp images. Special features show how advanced weaponry has progressed, profile current and future examples, diagram how they work, and explore other other uses.

The Global Commercial Aviation Industry Sören Eriksson, Harm-Jan Steenhuis, 2015-07-16 This book provides a state-of-the-art overview of the changes and development of the civil international aircraft/aviation industry. It offers a fully up-to-date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives, which include economic, geographical, political and technological points of view. The aircraft industry is characterized by very complex, high technology products produced in relatively small quantities. The high-technology requirements necessitate a high level of R&D. In no other industry is it more of inter-dependence and cross-fertilisation of advanced technology. Consequently, most of the world's large aircraft companies and technology leaders have been located in Europe and North America. During the last few decades many developing countries have tried to build up an internationally competitive aircraft industry. The authors study a number of important issues including the political economy of the aircraft industry, globalization in this industry, innovation, newly industrializing economies and the aircraft industry. This book also explores regional and large aircraft, transformation of the aviation industry in Central and Eastern Europe, including engines, airlines, airports and airline safety. It will be of great value to students and to researchers seeking information on the aircraft industry and its development in different regions.

Encyclopedia of African Airlines Ben R. Guttery, 1998 The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route

structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

The Trouble with Taiwan Kerry Brown, Kalley Wu Tzu Hui, 2019-10-01 'Fresh and authoritative, written with brio and precision.' Thomas Plate, author of Yo-Yo Diplomacy 'An important and timely guide to one of the most dangerous potential flashpoints for future conflict between the West and China.' James Griffiths, author of The Great Firewall of China 'Brown and Wu Tzu-hui help situate a Taiwan whose "place" in the world is otherwise plagued by uncertainty.' Benjamin Zawacki, author of Thailand

The Night Stalkers Michael J. Durant, Steven Hartov, Robert L. Johnson, 2006-12-28 From the New York Times bestselling authors of In the Company of Heroes comes a thrilling account of military aviation for history buffs and "for those who love vivid tales of battlefield heroics" (Publishers Weekly). In the world of covert warfare, Special Operations pilots are notoriously close-lipped about what they do. They don't talk about their missions to anyone outside their small community. But now, Michael J. Durant and Steven Hartov shed fascinating light on the mysterious elite commandos known as SOAR (Special Operations Aviation Regiment) and take readers into a shadowy world of combat they have only imagined.

Zambian Crisis Behaviour Douglas G. Anglin, 1994-11-07 In this pioneering study Douglas Anglin describes and dissects the process of crisis decision making in Zambia through a detailed reconstruction of the most critical decisions of 1965-66, and assesses the effect of crisis-induced stress on the policy outcomes of President Kenneth Kaunda and other Zambian leaders. This case study of Zambian decision making is designed not merely to illuminate a Third World crisis of unusual interest and importance but also to contribute to knowledge and theory about actor responses under conditions of crisis. It will be of interest to Africanists, diplomatic historians, and students of international crises, conflicts, negotiations, sanctions, and diplomacy.

Rising China Jane Golley, Ligang Song, 2011-06-01 Where the last three decades of the 20th century witnessed a China rising on to the global economic stage, the first three decades of the 21st century are almost certain to bring with them the completion of that rise, not only in economic, but also political and geopolitical terms. China's integration into the global economy has brought one-fifth of the global population into the world trading system, which has increased global market potential and integration to an unprecedented level. The increased scale and depth of international specialisation propelled by an enlarged world market has offered new opportunities to boost world production, trade and consumption; with the potential

for increasing the welfare of all the countries involved. However, China's integration into the global economy has forced a worldwide reallocation of economic activities. This has increased various kinds of friction in China's trading and political relations with others, as well as generating several globally significant externalities. Finding ways to accommodate China's rise in a way that ensures the future stability and prosperity of the world economy and polity is probably the most important task facing the world community in the first half of the 21st century. The book delves into these issues to reflect upon the wide range of opportunities and challenges that have emerged in the context of a rising China.
