Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Ectogenesis Scott Gelfand, John R. Shook, 2006 This book raises many moral, legal, social, and political, questions related to possible development, in the near future, of an artificial womb for human use. Is

ectogenesis ever morally permissible? If so, under what circumstances? Will ectogenesis enhance or diminish women's reproductive rights and/or their economic opportunities? These are some of the difficult and crucial questions this anthology addresses and attempts to answer.

Selling the Sea Bob Dickinson, Andy Vladimir, 2007-04-27 An insider's view of how the cruising business operates *Selling the Sea* offers a complete picture of the cruise line industry along with step-by-step coverage of how to effectively market the cruising experience. This updated Second Edition features new coverage of how technology has impacted the industry, new niche markets in cruising, and expanded material on shipbuilding and design. It also includes insightful interviews with today's captains, social directors, food and beverage managers, and cruise line executives who have hands-on experience at the day-to-day workings of a cruise ship.

Origamics Kazuo Haga, Josefina Fonacier, Masami Isoda, 2008 The art of origami, or paper folding, is carried out using a square piece of paper to obtain attractive figures of animals, flowers or other familiar figures. It is easy to see that origami has links with geometry. Creases and edges represent lines, intersecting creases and edges make angles, while the intersections themselves represent points. Because of its manipulative and experiential nature, origami could become an effective context for the learning and teaching of geometry. In this unique and original book, origami is an object of mathematical exploration. The activities in this book differ from ordinary origami in that no figures of objects result. Rather, they lead the reader to study the effects of the folding and seek patterns. The experimental approach that characterizes much of science activity can be recognized throughout the book, as the manipulative nature of origami allows much experimenting, comparing, visualizing, discovering and conjecturing. The reader is encouraged to fill in all the proofs, for his/her own satisfaction and for the sake of mathematical completeness. Thus, this book provides a useful, alternative approach for reinforcing and applying the theorems of high school mathematics.

The Gothic Revival Kenneth Clark, 1995 First published in 1928 and written while the author was still at Oxford, this book has become a classic. It remains the best possible introduction to the most widespread and influential architectural and decorative arts movement England ever produced. Though Gothic Revival buildings had changed the face of both town and country, they were hardly appreciated in the first half of this century. Architectural historians neglected them because so few were seen as great works of art; others averted their gaze, or laughed. That taste later changed was in many ways due to this book. Kenneth Clark's exploration of the changes in ideals and sensibility that inspired the Revival made it possible to see again with the eyes of those for whom the buildings had been designed, and whose imaginations they had fired.--BOOK JACKET. Devils on the Deep Blue Sea Kristoffer A. Garin, 2006-06-27 In this terrifically entertaining history, journalist Kristoffer A. Garin chronicles the cruise-ship industry, from its rise in the early sixties, to its explosion in the seventies with the hit show *The Love Boat*, to the current vicious consolidation wars and brazen tax dodges. Entrepreneurial genius and bare-knuckle capitalism mate with cultural kitsch as the cruise lines dodge U.S. tax, labor, and environmental laws to make unimaginable profits while bringing the world a new form of leisure. A colorful and compelling behind-the-scenes narrative, *Devils on the Deep Blue Sea* is a definitive look at the industry and its robber barons who created floating empires.

The handouts are also available on the book's CRC Press web page. Reflecting feedback from teachers and students who have used the book, this classroom-tested text provides an easy and entertaining way for teachers to incorporate origami into a range of college and advanced high school math courses. Speeches of Note Shaun Usher, 2018-12-04 From the author of the New York Times bestseller *Letters of Note* comes a collection of 75 of history's most interesting, profound, and sometimes unknown speeches from a range of scintillating personalities such as Frederick Douglass, Justin Trudeau, Albert Einstein, Meghan Markle, Barbara Jordan, and Ursula K. Le Guin. This thoughtfully curated and richly illustrated collection celebrates oratory old and new, highlighting speeches we know and admire, while also shining a light on profound drafts that were never delivered or have until now been forgotten. From George Bernard Shaw's warm and rousing toast to Albert Einstein in 1930 and the commencement address affectionately given to graduates at Long Island University by Kermit the Frog, to the chilling public announcement (that was thankfully never made) by President Richard Nixon should Neil Armstrong and Buzz Aldrin become stranded on the moon, *Speeches of Note* honors the words and ideas of some of history's most provocative and inspiring personages.

The Umbrella Jan Brett, 2004-09-09 A walk through the Costa Rican cloud forest provides a wonderfully lush setting for Jan Brett's beloved animal illustrations. When Carlos drops his umbrella to climb a tree for a better view of the animals, they all cram into the banana-leaf umbrella as it floats by-- from the little tree frog to the baby tapir to the big jaguar and more. It gets so crowded in the umbrella that there isn't even enough room for a little hummingbird! So over the umbrella tumbles, everyone falls out, and poor Carlos comes back wondering why he didn't see any animals all day. In the spirit of Jan Brett's *The Mitten* and *The Hat*, this cheerful tale of escalation will have readers poring over every illustration for the world of details Jan packs in. With its classic story, exotic jungle setting, and brilliantly colorful menagerie, *The Umbrella* is sure to take its place among Jan's many family favorites.

Cruise Sector Growth Alexis Papathanassis, 2009-10-21 Despite representing a fairly small fraction of global tourism activity, the cruise sector has been experiencing a steady growth rate over the last years. The 1st International Cruise Conference (ICC) and its proceedings documented here face the changes which accompany this process of growth. The corresponding refereed papers are organized under the following themes: New trends and innovations, human resource management, information technology and

standardization. The underlying motivation behind this collection of works is to bridge the gap between cruise theory and practice, by providing a 'living research agenda' aligned with the cruise sector's realities and needs.

Talking, Drawing, Writing Martha Horn, Mary Giacobbe, 2023-10-10 In the early grades, talking and drawing can provide children with a natural pathway to writing, yet these components are often overlooked. In *Talking, Drawing, Writing: Lessons for Our Youngest Writers*, authors Martha Horn and Mary Ellen Giacobbe invite readers to join them in classrooms where they listen, watch, and talk with children, then use what they learn to create lessons designed to meet children where they are and lead them into the world of writing. The authors make a case for a broader definition of writing, advocating for formal storytelling sessions, in which children tell about what they know, and for focused sketching sessions so that budding writers learn how to observe more carefully. The book's lessons are organized by topic and include oral storytelling, drawing, writing words, assessment, introducing booklets, and moving writers forward. Based on the authors' work in urban kindergarten and first-grade classes, the essence and structure of many of the lessons lend themselves to adaptation through fifth grade. The lessons follow a consistent format: What's going on in the classroom? What do children need to learn next? Materials needed to teach the lesson Language used in each lesson Reasons behind why certain books are chosen and suggestions for additional children's books The authors show the thinking behind their teaching decisions and provide a way to look at and assess children's writing, giving us much more than a book of lessons; they present a vision of what beginning writing can look and sound like. Perhaps most powerfully, they give us examples of the language they use with children that reveal a genuine respect for and trust in children as learners.
