The Semiotics of Che Guevara Maria-Carolina Cambre,2014-11-20 Alberto Korda's famous photograph of Che Guevara titled the Guerrillero Heroico has been reproduced, modified and remixed countless times since it was taken on March 5, 1960, in Havana, Cuba. This book looks again at this well-known mass-produced image to explore how an image can take on cultural force in diverse parts of the globe and legitimate varying positions and mass action in unexpected global political contexts. Analytically, the book develops a comparative analysis of how images become attached to a range of meanings that are absolutely inseparable from their contexts of use. Addressing the need for a fluid and responsive approach to the study of visual meaning-making, this book relies on multiple methodologies such as semiotics, research-creation, multimodal discourse analysis, ethnography and phenomenology and shows how each method has something to offer toward the understanding of the social and cultural work of images in our globally oriented cultures.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the

German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Engaging Art Steven J. Tepper, Bill Ivey, 2012-08-21 *Engaging Art* explores what it means to participate in the arts in contemporary society - from museum attendance to music downloading. Drawing on the perspectives of experts from diverse fields (including Princeton scholars Robert Wuthnow and Paul DiMaggio; Barry Schwartz, author of *The Paradox of Choice*; and MIT scholars Henry Jenkins and Mark Schuster), this volume analyzes key trends involving technology, audience demographics, religion, and the rise of do-it-yourself participatory culture. Commissioned by The Wallace Foundation and independently carried out by the Curb Center at Vanderbilt University, *Engaging Art* offers a new framework for understanding the momentous changes impacting America's cultural life over the past fifty years. This volume offers suggestive glimpses into the character and consequence of a new engagement with old-fashioned participation in the arts. The authors in this volume hint at a bright future for art and citizen art making. They argue that if we center a new commitment to arts participation in everyday art making, creativity, and quality of life, we will not only restore the lifelong pleasure of homemade art, but will likely seed a new generation of enthusiasts who will support America's signature nonprofit cultural institutions well into the future.
