Confronting the Challenges of Participatory Culture Henry

Jenkins,2009-06-05 Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the digital divide from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

Fluent Forever Gabriel Wyner,2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the

official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Wizard! Stephen Brown, 2005 Harry Potter may not be the biggest brand in the world, or the most venerable, but his story is one of the most dramatic. This book tells the story of the Harry Potter brand and how it has taken the entertainment world by storm. Joanne K Rowling and her fabulous money-spinning creation is a contemporary fairytale, a 21st century version of the classic cornucopian chronicle. An impoverished single parent pens an accidental bestseller, which grows exponentially. The book begets more books, which beget movies and merchandise and huge media coverage. Today, Harry Potter is as much a brand as Tom Cruise, Starbucks or even Heinz. This book provides a fascinating insight into how Harry Potter became one of the world's most recognised brands in an extraordinarily short period of time.

Reading in the mobile era West, Mark, Chew Han Ei, 2014-04-28 Millions of people do not read for one reason: they do not have access to text. But mobile phones and cellular networks are transforming a scarce resource into an abundant one. Drawing on the analysis of over 4,000 surveys collected in seven developing countries and corresponding qualitative interviews, this report paints a detailed picture of who reads books and stories on mobile devices and why. The findings illuminate, for the first time, the habits, beliefs and profiles of mobile readers in developing countries. This information points to strategies to expand mobile reading and, by extension, the educational and socio-economic benefits associated with increased reading. Mobile technology can advance literacy and learning in underserved communities around the world. This report shows how.

Model-Based Machine Learning John Winn, 2023-11-30 Today, machine learning is being applied to a growing variety of problems in a bewildering variety of domains. A fundamental challenge when using machine learning is connecting the abstract mathematics of a machine learning technique to a concrete, real

world problem. This book tackles this challenge through model-based machine learning which focuses on understanding the assumptions encoded in a machine learning system and their corresponding impact on the behaviour of the system. The key ideas of model-based machine learning are introduced through a series of case studies involving real-world applications. Case studies play a central role because it is only in the context of applications that it makes sense to discuss modelling assumptions. Each chapter introduces one case study and works through step-by-step to solve it using a model-based approach. The aim is not just to explain machine learning methods, but also showcase how to create, debug, and evolve them to solve a problem. Features: Explores the assumptions being made by machine learning systems and the effect these assumptions have when the system is applied to concrete problems. Explains machine learning concepts as they arise in real-world case studies. Shows how to diagnose, understand and address problems with machine learning systems. Full source code available, allowing models and results to be reproduced and explored. Includes optional deep-dive sections with more mathematical details on inference algorithms for the interested reader.

Pro-environmental Behaviors Kiyo Kurisu, 2016-01-28 This book offers a much-needed practical and conceptual guide for various pro-environmental behaviors. Written by an expert in both the environmental psychology and engineering fields, the book presents an overview of various pro-environmental behaviors (Chapter 1), the psychological background of behaviors (Chapters 2 and 3), how to survey and understand pro-environmental behaviors using questionnaires (Chapter 4) and how to know the actual environmental burdens derived by each behavior using life-cycle assessment (LCA) (Chapter 5), and measures to foster the behaviors and selected case studies for practitioners (Chapter 6). Readers will find Chapters 1, 4, and 5 particularly unique and useful; they provide an overview of many environmental behaviors and also the practical academic tools for analyzing environmental behaviors, such as questionnaire procedures, questions lists ("scales" in psychology), statistical tools, software, LCA methodologies, and databases. The book addresses the needs of academics and practitioners and is well suited as a textbook and reference guide for those studying or working in environmental engineering (systematic research), social psychology (environmental psychology), environmental education, and sustainability science. Policymakers will find the questionnaire list useful, as it can help them to grasp citizens' environmental concerns and actual behaviors. The behavior list and LCA can be used to make manuals or guidelines for citizens to enhance environmental behaviors, and the case studies provide an informative basis for designing programs and workshops for citizens. Although the field of "pro-environmental behaviors" has been intensively dealt with by European researchers, their approaches have largely been limited to psychological viewpoints and program (education) development through small case studies. Further, the target behaviors are often limited to recycling and energy/water savings. In contrast, this book provides the first introduction to pro-environmental behaviors as a whole. As pro-environmental behaviors have become increasingly important not only in developed but also in developing countries, this publication represents a timely resource for the growing number of researchers exploring pro-environment behaviors.

The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire.
