Making Things Move DIY Mechanisms for Inventors, Hobbyists, and Artists Dustyn Roberts, 2010-12-06 Get Your Move On! In *Making Things Move: DIY Mechanisms for Inventors, Hobbyists, and Artists*, you'll learn how to successfully build moving mechanisms through non-technical explanations, examples, and do-it-yourself projects--from kinetic art installations to creative toys to energy-harvesting devices. Photographs, illustrations, screen shots, and images of 3D models are included for each project. This unique resource emphasizes using off-the-shelf components, readily available materials, and accessible fabrication techniques. Simple projects give you hands-on practice applying the skills covered in each chapter, and more complex projects at the end of the book incorporate topics from multiple chapters. Turn your imaginative ideas into reality with help from this practical, inventive guide. Discover how to: Find and select materials Fasten and join parts Measure force, friction, and torque Understand mechanical and electrical power, work, and energy Create and control motion Work with bearings, couplers, gears, screws, and springs Combine simple machines for work and fun Projects include: Rube Goldberg breakfast machine Mousetrap powered car DIY motor with magnet wire Motor direction and speed control Designing and fabricating spur gears Animated creations in paper An interactive rotating platform Small vertical axis wind turbine SADbot: the seasonally affected drawing robot Make Great Stuff! TAB, an imprint of McGraw-Hill Professional, is a leading publisher of DIY technology books for makers, hackers, and electronics hobbyists.

The Disappearing Spoon Sam Kean, 2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. *THE DISAPPEARING SPOON* masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

The Uninhabitable Earth David Wallace-Wells, 2019-02-19 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New Yorker • The New York Times Book Review • Time • NPR • The Economist • The Paris Review • Toronto Star • GQ • The Times Literary Supplement • The New York Public Library • Kirkus Reviews It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (The Guardian) and “this generation’s *Silent Spring*” (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s. **LOGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD** “The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, The New York Times “Riveting. . . . Some readers will find Mr. Wallace-Wells’s

outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—The Economist “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘eerily banal language of climatology’ in favor of lush, rolling prose.”—Jennifer Szalai, The New York Times “The book has potential to be this generation’s Silent Spring.”—The Washington Post “The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book.”—Alan Weisman, The New York Review of Books

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Reality Is Broken Jane McGonigal,2011-01-20 “McGonigal is a clear, methodical writer, and her ideas are well argued. Assertions are backed by countless psychological studies.” —The Boston Globe “Powerful and provocative . . . McGonigal makes a persuasive case that games have a lot to teach us about how to make our lives, and the world, better.” —San Jose Mercury News “Jane McGonigal's insights have the elegant, compact, deadly simplicity of plutonium, and the same explosive force.” —Cory Doctorow, author of Little Brother A visionary game designer reveals how we can harness the power of games to boost global happiness. With 174 million gamers in the United States alone, we now live in a world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world-from social problems like depression and obesity to global issues like poverty and climate change-and introduces us to cutting-edge games that are already changing the business, education, and nonprofit worlds. Written for gamers and non-gamers alike, Reality Is Broken shows that the future will belong to those who can understand, design, and play games. Jane McGonigal is also the author of SuperBetter: A Revolutionary Approach to Getting Stronger, Happier, Braver and More Resilient.

Tools of the Mind Elena Bodrova,Deborah Leong,2024-04-24 Now in its third edition, this classic text remains the seminal resource for in-depth information about major concepts and principles of the cultural-historical theory developed by Lev Vygotsky, his students, and colleagues, as well as three generations of neo-Vygotskian scholars in Russia and the West. Featuring two new chapters on brain development and scaffolding in the zone of proximal development, as well as additional content on technology, dual language learners, and students with disabilities, this new edition provides the latest research evidence supporting the basics of the cultural-historical approach alongside Vygotskian-based practical implications. With concrete

explanations and strategies on how to scaffold young children's learning and development, this book is essential reading for students of early childhood theory and development.

The Cardboard Kingdom Chad Sell, 2018-06-05 Perfect for fans of Raina Telgemeier, *Awkward*, and *All's Faire* in Middle School, this graphic novel follows a neighborhood of kids who transform ordinary cardboard into fantastical homemade costumes as they explore conflicts with friends, family, and their own identity. A breath of fresh air, this tender and dynamic collection is a must-have. --Kirkus, Starred Welcome to a neighborhood of kids who transform ordinary boxes into colorful costumes, and their ordinary block into cardboard kingdom. This is the summer when sixteen kids encounter knights and rogues, robots and monsters--and their own inner demons--on one last quest before school starts again. In the Cardboard Kingdom, you can be anything you want to be--imagine that! The Cardboard Kingdom was created, organized, and drawn by Chad Sell with writing from ten other authors: Jay Fuller, David DeMeo, Katie Schenkel, Kris Moore, Molly Muldoon, Vid Alliger, Manuel Betancourt, Michael Cole, Cloud Jacobs, and Barbara Perez Marquez. The Cardboard Kingdom affirms the power of imagination and play during the most important years of adolescent identity-searching and emotional growth. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY KIRKUS REVIEWS * THE NEW YORK PUBLIC LIBRARY * SCHOOL LIBRARY JOURNAL * A TEXAS BLUEBONNET 2019-20 MASTER LIST SELECTION There's room for everyone inside The Cardboard Kingdom, where friendship and imagination reign supreme. --Ingrid Law, New York Times bestselling author of *Savvy* A timely and colorful graphic novel debut that, like its many offbeat but on-point characters, marches to the beat of its own cardboard drum. --Tim Federle, award-winning author of *Better Nate Than Ever*

Arts of Living on a Damaged Planet Anna Lowenhaupt Tsing, Nils Bubandt, Elaine Gan, Heather Anne Swanson, 2017-05-30 Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, *Arts of Living on a Damaged Planet* puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent "arts of living." Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication's two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. Autonomous Driving Markus Maurer, J. Christian Gerdes, Barbara Lenz, Hermann Winner, 2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and

choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of “autonomous driving.”

Biomimetics for Architecture & Design Göran Pohl, Werner Nachtigall, 2015-10-30 This book provides the readers with a timely guide to the application of biomimetic principles in architecture and engineering design. As a result of a combined effort by two internationally recognized authorities, the biologist Werner Nachtigall and the architect Göran Pohl, the book describes the principles which can be used to compare nature and technology, and at the same time it presents detailed explanations and examples showing how biology can be used as a source of inspiration and “translated” in building and architectural solutions (biomimicry). Even though nature cannot be directly copied, the living world can provide architects and engineers with a wealth of analogues and inspirations for their own creative designs. But how can analysis of natural entities give rise to advanced and sustainable design? By reporting on the latest bionic design methods and using extensive artwork, the book guides readers through the field of nature-inspired architecture, offering an extraordinary resource for professional architects, engineers, designers and urban planners, as well as for university teachers, researchers and students. Natural evolution is seen throughout the book as a powerful resource that can serve architecture and design by providing innovative, optimal and sustainable solutions.

Memorylands Sharon Macdonald, 2013-07-18 Memorylands is an original and fascinating investigation of the nature of heritage, memory and understandings of the past in Europe today. It looks at how Europe has become a ‘memoryland’ – littered with material reminders of the past, such as museums, heritage sites and memorials; and at how this ‘memory phenomenon’ is related to the changing nature of identities – especially European, national and cosmopolitan. In doing so, it provides new insights into how memory and the past are being performed and reconfigured in Europe – and with what effects. Drawing especially, though not exclusively, on cases, concepts and arguments from social and cultural anthropology, Memorylands argues for a deeper and more nuanced understanding of the cultural assumptions involved in relating to the past. It theorizes the various ways in which ‘materializations’ of identity work and relates these to different forms of identification within Europe. The book also addresses questions of methodology, including discussion of historical, ethnographic, interdisciplinary and innovative methods. Through a wide-range of case-studies from across Europe, Sharon Macdonald argues that Europe is home to a much greater range of ways of making the past present than is usually realized – and a greater range of forms of ‘historical consciousness’. At the same time, however, she seeks to highlight what she calls ‘the European memory complex’ – a repertoire of prevalent patterns in forms of recollection and ‘past presencing’. The examples in Memorylands are drawn from both the margins and metropolitan centres, from the relatively small-scale and local, the national and the avant-garde. The book looks at pasts that are potentially identity-disrupting – or ‘difficult’ – as well as those that affirm identities or offer possibilities for transcending national identities or articulating more cosmopolitan futures. Topics covered include authenticity, temporalities, embodiment, commodification, nostalgia and Ostalgie, the musealization of everyday and folk-life, Holocaust commemoration and tourism, narratives of war, the heritage of Islam, transnationalism, and the future of the past. Memorylands is engagingly written and accessible to general readers as well as offering a new synthesis for advanced researchers in memory and heritage studies. It is essential reading for those interested in identities, memory, material culture, Europe, tourism and heritage.

Words Without Pictures Charlotte Cotton, Alex Klein, 2010 Words Without Pictures was originally conceived of by curator Charlotte Cotton as a means of creating spaces for thoughtful and urgent discourse around current issues in photography. Every month for a year, beginning in November

2007, an artist, educator, critic, art historian, or curator was invited to contribute a short, un-illustrated, and opinionated essay about an aspect of photography that, in his or her view, was either emerging or in the process of being rephrased. Each piece was available on the Words Without Pictures website for one month and was accompanied by a discussion forum focused on its specific topic. Over the course of its month-long life, each essay received both invited and unsolicited responses from a wide range of interested parties—students, photographers active in the commercial sector, bloggers, critics, historians, artists of all kinds, educators, publishers, and photography enthusiasts alike—all coming together to consider the issues at hand. All of these essays, responses, and other provocations are gathered together in a volume designed by David Reinfurt of Dexter Sinister. Previously issued as a print-on-demand title, Aperture is pleased to present Words Without Pictures to the trade for this first time as part of the Aperture Ideas series.

How Communities Build Stronger Schools A. Dodd, J. Konzal, 2016-03-05 If it takes a village to raise a child, Anne Wescott Dodd and Jean L. Konzal feel that it takes a community to make a school. Not content with the idea of a school being contained within four walls and existing only for a few hours every day, Dodd and Konzal know that a school which looks after the complete child exists far beyond its four walls and for the whole 24 hours in each day. They present a radical democratic vision of the public school where everyone not just students, teachers and parents plays a part in shaping our children and, consequently, our future.

Vicious Jon T. Coleman, 2008-10-01 Over a continent and three centuries, American livestock owners destroyed wolves to protect the beasts that supplied them with food, clothing, mobility, and wealth. The brutality of the campaign soon exceeded wolves' misdeeds. Wolves menaced property, not people, but storytellers often depicted the animals as ravenous threats to human safety. Subjects of nightmares and legends, wolves fell prey not only to Americans' thirst for land and resources but also to their deeper anxieties about the untamed frontier. Now Americans study and protect wolves and jail hunters who shoot them without authorization. Wolves have become the poster beasts of the great American wilderness, and the federal government has paid millions of dollars to reintroduce them to scenic habitats like Yellowstone National Park. Why did Americans hate wolves for centuries? And, given the ferocity of this loathing, why are Americans now so protective of the animals? In this ambitious history of wolves in America—and of the humans who have hated and then loved them—Jon Coleman investigates a fraught relationship between two species and uncovers striking similarities, deadly differences, and, all too frequently, tragic misunderstanding.

Urban Informatics Wenzhong Shi, Michael F. Goodchild, Michael Batty, Mei-Po Kwan, Anshu Zhang, 2021-04-06 This open access book is the first to systematically introduce the principles of urban informatics and its application to every aspect of the city that involves its functioning, control, management, and future planning. It introduces new models and tools being developed to understand and implement these technologies that enable cities to function more efficiently – to become 'smart' and 'sustainable'. The smart city has quickly emerged as computers have become ever smaller to the point where they can be embedded into the very fabric of the city, as well as being central to new ways in which the population can communicate and act. When cities are wired in this way, they have the potential to become sentient and responsive, generating massive streams of 'big' data in real time as well as providing immense opportunities for extracting new forms of urban data through crowdsourcing. This book offers a comprehensive review of the methods that form the core of urban informatics from various kinds of urban remote sensing to new approaches to machine learning and statistical modelling. It provides a detailed technical introduction to the wide array of tools information scientists need to develop the key urban analytics that are fundamental to learning about the smart city, and it outlines ways in which these tools can be used to inform design and policy so that cities can become more efficient with a greater concern for environment and equity.

Teaching Youth Media Steven Goodman,2003-01-23 This book explores the power of using media education to help urban teenagers develop their critical thinking and literacy skills. Drawing on his twenty years of experience working with inner-city youth at the acclaimed Educational Video Center (EVC) in New York City, Steven Goodman looks closely at both the problems and possibilities of this model of media education. Responding to our national concern about adolescents, literacy, media, and violence, *Teaching Youth Media*: Describes the changes schools and after-school programs need to make in order to create a media education that empowers students to change their world; Explores the intersection of literacy and culture as youth learn to analyze information from a variety of sources, including television, newspapers, books, films, school, church, and lives outside of school; Features case studies of students and teachers engaged in making video documentaries at EVC and in an alternative high school; Illuminates the practical day-to-day challenges faced by professional developers and teachers working to change the way education is practiced in their classes and schools.

Killing Time Nicholas J Saunders,2011-11-08 The Great War of 1914-1918 now stands at the furthest edge of living memory. And yet, hardly a month passes without some dramatic and sometimes tragic discovery being made along the old killing fields of the Western Front. Graves of British soldiers buried during battle – still lying in rows seemingly arm in arm or found crouching at the entrance to a dugout; whole 'underground cities' of trenches, dugouts and shelters have been preserved in the mud; field hospitals carved out of the chalk country of the Somme marked with graffiti; unexploded bombs and gas canisters – all of these are the poignant and sometimes deadly legacies of a war we can never forget. *Killing Time* digs beneath the surface of war to uncover the living reality left behind. Nicholas J. Saunders brings together a wealth of discoveries to offer fresh insights into the human and often barbaric aspect of warfare. He uses discoveries in the trenches, family photographs, diaries and souvenirs to give the dead a voice. You cannot fail to be fascinated and moved by what he unearths.

Karma Of Brown Folk Vijay Prashad,2001-03-12 Village Voice Favorite Books of 2000 The popular book challenging the idea of a model minority, now in paperback! “How does it feel to be a problem?” asked W. E. B. Du Bois of black Americans in his classic *The Souls of Black Folk*. A hundred years later, Vijay Prashad asks South Asians “How does it feel to be a solution?” In this kaleidoscopic critique, Prashad looks into the complexities faced by the members of a “model minority”-one, he claims, that is consistently deployed as a weapon in the war against black America. On a vast canvas, *The Karma of Brown Folk* attacks the two pillars of the “model minority” image, that South Asians are both inherently successful and pliant, and analyzes the ways in which U.S. immigration policy and American Orientalism have perpetuated these stereotypes. Prashad uses irony, humor, razor-sharp criticism, personal reflections, and historical research to challenge the arguments made by Dinesh D’Souza, who heralds South Asian success in the U.S., and to question the quiet accommodation to racism made by many South Asians. A look at Deepak Chopra and others whom Prashad terms “Godmen” shows us how some South Asians exploit the stereotype of inherent spirituality, much to the chagrin of other South Asians. Following the long engagement of American culture with South Asia, Prashad traces India’s effect on thinkers like Cotton Mather and Henry David Thoreau, Ravi Shankar’s influence on John Coltrane, and such essential issues as race versus caste and the connection between antiracism activism and anticolonial resistance. *The Karma of Brown Folk* locates the birth of the “model minority” myth, placing it firmly in the context of reaction to the struggle for Black

Liberation. Prashad reclaims the long history of black and South Asian solidarity, discussing joint struggles in the U.S., the Caribbean, South Africa, and elsewhere, and exposes how these powerful moments of alliance faded from historical memory and were replaced by Indian support for antiblack racism. Ultimately, Prashad writes not just about South Asians in America but about America itself, in the tradition of Tocqueville, Du Bois, Richard Wright, and others. He explores the place of collective struggle and multiracial alliances in the transformation of self and community-in short, how Americans define themselves.

desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
