To Paradise Hanya Yanagihara 2022-01-11 From the author of the classic A Little Life—a bold, brilliant novel spanning three centuries and three different versions of the American experiment, about lovers, family, loss and the elusive promise of utopia. In an alternate version of 1893 America, New York is part of the Free States, where people may live and love whomever they please (or so it seems). The fragile young scion of a distinguished family resists betrothal to a worthy suitor, drawn to a charming music teacher of no means. In a 1993 Manhattan besieged by the AIDS epidemic, a young Hawaiian man lives with his much older, wealthier partner, hiding his troubled childhood and the fate of his father. And in 2093, in a world riven by plagues and governed by totalitarian rule, a powerful scientist's damaged granddaughter tries to navigate life without him—and solve the mystery of her husband's disappearances. These three sections are joined in an enthralling and ingenious symphony, as recurring notes and themes deepen and enrich one another: A townhouse in Washington Square Park in Greenwich Village; illness, and treatments that come at a terrible cost; wealth and squalor; the weak and the strong; race; the definition of family, and of nationhood; the dangerous righteousness of the powerful, and of revolutionaries; the longing to find a place in an earthly paradise, and the gradual realization that it can't exist. What unites not just the characters, but these Americas, are their reckonings with the qualities that make us human: Fear. Love. Shame. Need. Loneliness. To Paradise is a fin de siècle novel of marvelous literary effect, but above all it is a work of emotional genius. The great power of this remarkable novel is driven by Yanagihara's understanding of the aching desire to protect those we love—partners, lovers, children, friends, family and even our fellow citizens—and the pain that ensues when we cannot.

Attachments Rainbow Rowell 2012-03-27 From the award-winning, #1 New York Times bestselling author of Wayward Son, Fangirl, Carry On, and Landline comes a hilarious and heartfelt novel about an office romance that blossoms one email at a time... Beth Fremont and Jennifer Scribner-Snyder know that somebody is monitoring their work e-mail. (Everybody in the newsroom knows. It's company policy.) But they can't quite bring themselves to take it seriously. They go on sending each other endless and endlessly hilarious e-mails, discussing every aspect of their personal lives. Meanwhile, Lincoln O'Neill can't believe this is his job now—reading other people's e-mail. When he applied to be “internet security officer,” he pictured himself building firewalls and crushing hackers—not writing up a report every time a sports reporter forwards a dirty joke. When Lincoln comes across Beth's and Jennifer's messages, he knows he should turn them in. He can't help being entertained, and captivated, by their stories. But by the time Lincoln realizes he's falling for Beth, it's way too late to introduce himself. What would he even say...?

EurAsian Matters Anna Grasskamp 2018-05-03 The volume examines the mutually constitutive relationship between the materiality of objects and their aesthetic meanings. Its approach connects material culture with art history, curation, technologies and practices of making. A central dimension of the case studies collected here is the mobility of objects between Europe and China and the transformations that unfold as a result of their transcultural lives. Many of the objects studied here are relatively unknown or understudied. The stories they recount suggest new ways of thinking about space, cultural geographies and the complex and often contradictory association of power and culture. These studies of transcultural objects can suggest pathways for museum experts by uncovering the multi-layered identities and temporalities of objects that can no longer be labelled as located in single regions. It is also addressed to students of art history, of European and Chinese studies and scholars of consumer culture. « This eagerly awaited volume offers deep and extensive insights into the fast-growing field of material culture studies. Its fresh approach to Eurasian objects and materialities will serve as useful reading for all scholars interested in transcultural and global studies. A very helpful introductory essay. » Sabine du Crest, University of Bordeaux Montaigne, Former Fellow, The Harvard University Center for Italian Renaissance Studies.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Verse Going Viral Heather Inwood 2014-06-23 Verse Going Viral examines what happens when poetry, a central pillar of traditional Chinese culture, encounters an era of digital media and unabashed consumerism in the early twenty-first century. Heather Inwood sets out to unravel a paradox surrounding modern Chinese poetry: while poetry as a representation of high culture is widely assumed to be marginalized to the point of “death,” poetry activity flourishes across the country, benefiting from China's continued self-identity as a “nation of poetry” (shiguo) and from the interactive opportunities created by the internet and other forms of participatory media. Through a cultural studies approach that treats poetry as a social rather than a purely textual form, Inwood considers how meaning is created and contested both within China's media-savvy poetry scenes and by members of the public, who treat poetry with a combination of reverence and ridicule. As the first book to deal explicitly with the discourses and functioning of scenes within the Chinese cultural context, Verse Going Viral will be of value to students and scholars of Chinese literature, cultural studies, and media, as well as to general readers interested in China's dynamic cultural scenes.

This Thing of Darkness Joan Neuberger 2019-03-15 Sergei Eisenstein's unfinished masterpiece, Ivan the Terrible, was no ordinary movie. Commissioned by Joseph Stalin in 1941 to justify state terror in the sixteenth century and in the twentieth, the film's politics, style, and epic scope aroused controversy even before it was released. In This Thing of Darkness, Joan Neuberger offers a sweeping account of the conception, making, and reception of Ivan the Terrible that weaves together Eisenstein's expansive thinking and experimental practice with a groundbreaking new view of artistic production under Stalin. Drawing on Eisenstein's unpublished production notebooks, diaries, and manuscripts, Neuberger's riveting narrative chronicles Eisenstein's personal, creative, and political challenges and reveals the ways cinematic invention, artistic theory, political critique, and historical and psychological analysis went hand in hand in this famously complex film. Neuberger's bold arguments and daring insights into every aspect of Eisenstein's work during this period, together with her ability to lucidly connect his wide-ranging late theory with his work on Ivan, show the director exploiting the institutions of Soviet artistic production not only to expose the cruelties of Stalin and his circle but to challenge the fundamental principles of Soviet ideology itself. Ivan the Terrible, she argues, shows us one of the world's greatest filmmakers and one of the 20th century's greatest artists observing the world around him and experimenting with every element of film art to explore the psychology of political ambition, uncover the history of recurring cycles of violence and lay bare the tragedy of absolute power.

Loud Sparrows Aili Mu 2008 "If sparrows are but a metaphor, every writer faces the challenge of reality, which is to say, how one catches this sparrow." So writes Bei Dao in his preface to Loud Sparrows, a spirited collection of ninety-one short-stories, an exciting new form of extreme short-storytelling that has swept the creative consciousness of mainland China, Hong Kong, and Taiwan. The artistic and aesthetic freedoms of short-stories enable writers to capture the tone, texture, and chaos of their rapidly changing societies in infinitely inventive ways. Written by Chinese authors over the past three decades, the stories in this anthology are culled from newspapers, magazines, literary journals, and personal collections, and their subjects range from humanist ideals and traditional virtues to the material benefits of a commercialized society.

Assessment of Authentic Performance in School Mathematics Richard A. Lesh 2013-04-03 This book is the result of a conference sponsored by the Educational Testing Service and the University of Wisconsin's National Center for Research in Mathematical Sciences Education. The purpose of the conference was to facilitate the work of a group of scholars whose interests included the assessment of higher-order understandings and processes in foundation-level (pre-high school) mathematics. Discussions focused on such issues as the purposes of assessment, guidelines for producing and scoring "real-life" assessment activities, and the meanings of such terms as "deeper and higher-order understanding," "cognitive objectives," and "authentic mathematical activities." Assessment was viewed as a critical component of complex, dynamic, and continually adapting educational systems. During the time that the chapters in this book were being written, sweeping changes in mathematics education were being initiated in response to powerful recent advances in technology, cognitive psychology, and mathematics, as well as to numerous public demands for educational reform. These changes have already resulted in significant reappraisals of what it means to understand mathematics, of the nature of mathematics teaching and learning, and of the real-life situations in which mathematics is useful. The challenge was to pursue assessment-related initiatives that are systematically valid, in the sense that they work to complement and enhance other improvements in the educational system rather than act as an impediment to badly needed curriculum reforms. To address these issues, most chapters in this book focus on clarifying and articulating the goals of assessment and instruction, and they stress the content of assessment above its mode of delivery. Computer- or portfolio-based assessments are interpreted as means to ends, not as ends in themselves. Assessment is conceived as an ongoing documentation process, seamless with instruction, whose quality hinges upon its ability to provide complete and appropriate information as needed to inform priorities in instructional decision making. This book tackles some of the most complicated issues related to assessment, and it offers fresh perspectives from leaders in the field—with the hope that the ultimate consumer in the instruction/assessment enterprise, the individual student, will reclaim his or her potential for self-directed mathematics learning.

Humans, Beasts, and Ghosts Zhongshu Qian 2011 "So long as wit and satire, insightfully imagined characterization, and unmatched erudition matter in literature, Qian Zhongshu's writing will have a place, and this translation of his work is among the most significant renderings from Chinese."---Ron Egan, University of California, Santa Barbara Qian Zhongshu was one of twentieth-century China's most ingenious literary stylists, one whose insights into the ironies and travesties of modern China remain stunningly fresh. Between the early years of the Second Sino-Japanese War (1937-1945) and the Communist takeover in 1949, Qian wrote a brilliant series of short stories, essays, and a comedic novel that continue to inspire generations of Chinese readers. With this long-awaited translation, English-language readers can immerse themselves in the invention and satirical wit of one of the world's great literary cosmopolitans. This collection brings together Qian's best short works, combining his iconoclastic essays on the "book of life" from written in the Margins of Life (1941) with the four masterful short stories of Human, Beast, Ghost (1946). His essays elucidate substantive issues through deceptively simple subjects---the significance of windows versus doors, for example, or the blind spots of literary critics---and assert the primacy of critical and creative independence. His stories blur the boundaries between humans, beasts, and ghosts as they struggle through life, death, and resurrection. Christopher G. Rea situates these works within China's wartime politics and Qian's literary vision, highlighting significant changes that Qian Zhongshu made to different editions of his writings and providing unprecedented insight into the author's creative process. Qian Zhongshu (1910-1998), hailed as twentieth-century China's "foremost man of letters," is best known for his novel, *Fortress Besieged*, and his groundbreaking study of the Chinese literary canon, *Limited Views: Essays on Ideas and Letters*
