The Fever Tree Free Preview Jennifer McVeigh 2013-03-04 A free preview of The Fever Tree by Jennifer McVeigh Having drawn comparisons to Gone with the Wind and Out of Africa, The Fever Tree is a page-turner of the very first order. In London she was caged by society. In South Africa, she is dangerously free. Frances Irvine, left destitute in the wake of her father's sudden death, has been forced to abandon her life of wealth and privilege in London and emigrate to the Southern Cape of Africa. 1880 South Africa is a country torn apart by greed. In this remote and inhospitable land she becomes entangled with two very different men—one driven by ambition, the other by his ideals. Only when the rumor of a smallpox epidemic takes her into the dark heart of the diamond mines does she see her path to happiness. But this is a ruthless world of avarice and exploitation, where the spoils of the rich come at a terrible human cost and powerful men will go to any lengths to keep the mines in operation. Removed from civilization and disillusioned by her isolation, Frances must choose between passion and integrity, a decision that has devastating consequences. The Fever Tree is a compelling portrait of colonial South Africa, its raw beauty and deprivation alive in equal measure. But above all it is a love story about how—just when we need it most—fear can blind us to the truth.

The Subterranean Railway Christian Wolmar 2012-11-01 Since the Victorian era, London's Underground has had played a vital role in the daily life of generations of Londoners. Christian Wolmar celebrates the vision and determination of the 19th-century pioneers who made the world's first, and still the largest, underground passenger railway: one of the most impressive engineering achievements in history. From the early days of steam to electrification, via the Underground's contribution to 20th-century industrial design and its role during two world wars, the story comes right up to the present with its sleek, driverless trains, and the wrangles over the future of the system. This book reveals London's hidden wonder in all its glory, and shows how the railway beneath the streets helped create the city we know today.

The Celestial Steam Locomotive Michael Coney 1983 Three humans journey through a series of parallel universes and brave a multitude of dangers and hardships to preserve the galaxy and free Starquin, the supreme being

Up to Their Necks - the Story of a National Serviceman Joe P. Plant 2012-12 The beginning of the Cold War began within days of the end of the Second World War, yet conscription still continued to replace the demobilisation of the existing armed forces still serving in war-torn Europe, the middle and Far East territories of the British Empire. Who better to replace them than over two million eligible eighteen year old young men who were thoroughly enjoying their freedom until a brown envelope fluttered through the letterbox informing: YOU'RE CONSCRIPTED LADDIE. This is a factual and personal story about the camaraderie that quickly developed among many during their enforced National Service. They did not want to do it, but I am sure that they, like me, had some great times apart from the shit that was dished out! I sincerely trust that the chapters within my story do relate to similar incidents, albeit under different circumstances, that occurred to thousands of others. For all of us it was a period of you had to do it. No ifs or buts and for many that did enjoy that way of life, and did re-enlist, good luck to them. Nevertheless, I can honestly say that I now look back with pride that I became one of the millions of young conscripts who did survive to tell the tale.
