Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.

Origami Design Secrets Robert J. Lang, 2011-10-05 The magnum opus of one of the world’s leading origami artists, the second edition of *Origami Design Secrets* reveals the underlying concepts of origami and how to create original origami designs. Containing step-by-step instructions for 26 models, this book is not just an origami cookbook or list of instructions—it introduces the fundamental building blocks of origami, building up to advanced methods such as the combination of uniaxial bases, the circle/river method, and tree theory. With corrections and improved illustrations, this new expanded edition also covers uniaxial box pleating, introduces the new design

technique of hex pleating, and describes methods of generalizing polygon packing to arbitrary angles. With coverage spanning the foundations of origami construction and advanced methods using both paper and pencil and custom-built free software, *Origami Design Secrets* helps readers cultivate the intuition and skills necessary to develop their own designs. It takes them beyond merely following a recipe to crafting a work of art.

Common Errors in English Usage Paul Briens, 2003 Online version of Common Errors in English Usage written by Paul Briens.

The Canon Natalie Angier, 2008-04-03 The New York Times bestseller that makes scientific subjects both understandable and fun: "Every sentence sparkles with wit and charm." —Richard Dawkins From the Pulitzer Prize-winning New York Times science journalist and bestselling author of *Woman*, this is a playful, passionate guide to the science all around us (and inside us)—from physics to chemistry, biology, geology, astronomy, and more. Drawing on conversations with hundreds of the world's top scientists, Natalie Angier creates a thoroughly entertaining guide to scientific literacy. For those who want a fuller understanding of some of the great issues of our time, *The Canon* offers insights on stem cells, bird flu, evolution, and global warming. For students—or parents whose kids ask a lot of questions about how the world works—it brings to life such topics as how the earth was formed, or what electricity is. Also included are clear, fascinating explanations of how to think scientifically and grasp the tricky subject of probability. *The Canon* is a joyride through the major scientific disciplines that reignites our childhood delight and sense of wonder—and along the way, tells us what is actually happening when our ice cream melts or our coffee gets cold, what our liver cells do when we eat a caramel, why the horse is an

example of evolution at work, and how we're all really made of stardust.

Realist Magic Timothy Morton, 2020-10-09 Object-oriented ontology offers a startlingly fresh way to think about causality that takes into account developments in physics since 1900. Causality, argues, Object Oriented Ontology (OOO), is aesthetic. In this book, Timothy Morton explores what it means to say that a thing has come into being, that it is persisting, and that it has ended. Drawing from examples in physics, biology, ecology, art, literature and music, Morton demonstrates the counterintuitive yet elegant explanatory power of OOO for thinking causality. Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Curved-Folding Origami Design Jun Mitani, 2019-03-27 The origami introduced in this book is based on simple techniques. Some were previously known by origami artists and some were discovered by the author. Curved-Folding Origami Design shows a way to explore new area of origami composed of curved folds. Each technique is introduced in a step-by-step fashion, followed by some beautiful artwork examples. A commentary explaining the theory behind the technique is placed at the end of each chapter. Features Explains the techniques for designing curved-folding origami in seven chapters Contains many illustrations and photos (over 140 figures), with simple instructions Contains photos of 24 beautiful origami artworks, as well as their crease patterns Some basic theories behind the techniques are introduced

Essentials of Contemporary Advertising William F. Arens, David H. Schaefer, Michael F. Weigold, 2009 Exploring the core principles that drive advertising, this book goes beyond academic theory. The authors present advertising as it is actually practiced and make the fundamentals accessible and relevant to the student's real life. Every chapter concludes with a learning exercise.

Folding the Universe Peter Engel, 1989 An artfully designed and illustrated guide offers an in-depth essay on the history origami and its mathematical, spatial, and creative properties, and instructions for making a kangaroo with joey, a knight on horseback, and other wonders.

Maelstrom Peter Watts, 2009-01-06 Second in the Riffers Trilogy, Hugo Award-winning author Peter Watts' Maelstrom is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called riffers

who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as though there was a choice: saving the world excuses almost any degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that use to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and incubating Armageddon. Her name is Lenie Clarke. She's a rifter. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Cooking with Grease Donna Brazile, 2012-09-04 Cooking with Grease is a powerful, behind-the-scenes memoir of the life and times of a tenacious political organizer and the first African-American woman to head a major presidential campaign. Donna Brazile fought her first political fight at age nine -- campaigning (successfully) for a city council candidate who promised a playground in her neighborhood. The day after Martin Luther King Jr. was assassinated, she committed her heart and her future to political and social activism. By the 2000 presidential election, Brazile had become a major player in American political history -- and she remains one of the most outspoken and forceful political activists of our day. Donna grew up one of nine children in a working-poor family in New Orleans, a place where talking politics comes as naturally as stirring a pot of seafood gumbo -- and where

the two often go hand in hand. Growing up, Donna learned how to cook from watching her mother, Jean, stir the pots in their family kitchen. She inherited her love of reading and politics from her grandmother Frances. Her brothers Teddy Man and Chet worked as foot soldiers in her early business schemes and voter registration efforts. Cooking with Grease follows Donna's rise to greater and greater political and personal accomplishments: lobbying for student financial aid, organizing demonstrations to make Martin Luther King Jr.'s birthday a national holiday and working on the Jesse Jackson, Dick Gephardt, Michael Dukakis and Bill Clinton presidential campaigns. But each new career success came with its own kind of heartache, especially in her greatest challenge: leading Al Gore's 2000 campaign, making her the first African American to lead a major presidential campaign. Cooking with Grease is an intimate account of Donna's thirty years in politics. Her stories of the leaders and activists who have helped shape America's future are both inspiring and memorable. Donna's witty style and innovative political strategies have garnered her the respect and admiration of colleagues and adversaries alike -- she is as comfortable trading quips with J. C. Watts as she is with her Democratic colleagues. Her story is as warm and nourishing as a bowl of Brazile family gumbo.

The South Korean Film Renaissance Jinhee Choi, 2011-07-21 For the past decade, the Korean film industry has enjoyed a renaissance. With innovative storytelling and visceral effects, Korean films not only have been commercially viable in the domestic and regional markets but also have appealed to cinephiles everywhere on the international festival circuit. This book provides both an industrial and an aesthetic account of how the Korean film industry managed to turn an economic crisis-triggered in part by

globalizing processes in the world film industry—into a fiscal and cultural boom. Jinhee Choi examines the ways in which Korean film production companies, backed by affluent corporations and venture capitalists, concocted a variety of winning production trends. Through close analyses of key films, Choi demonstrates how contemporary Korean cinema portrays issues immediate to its own Korean audiences while incorporating the transnational aesthetics of Hollywood and other national cinemas such as Hong Kong and Japan. Appendices include data on box office rankings, numbers of films produced and released, market shares, and film festival showings.

Origamics Kazuo Haga, Josefina Fonacier, Masami Isoda, 2008 The art of origami, or paper folding, is carried out using a square piece of paper to obtain attractive figures of animals, flowers or other familiar figures. It is easy to see that origami has links with geometry. Creases and edges represent lines, intersecting creases and edges make angles, while the intersections themselves represent points. Because of its manipulative and experiential nature, origami could become an effective context for the learning and teaching of geometry. In this unique and original book, origami is an object of mathematical exploration. The activities in this book differ from ordinary origami in that no figures of objects result. Rather, they lead the reader to study the effects of the folding and seek patterns. The

experimental approach that characterizes much of science activity can be recognized throughout the book, as the manipulative nature of origami allows much experimenting, comparing, visualizing, discovering and conjecturing. The reader is encouraged to fill in all the proofs, for his/her own satisfaction and for the sake of mathematical completeness. Thus, this book provides a useful, alternative approach for reinforcing and applying the theorems of high school mathematics.
