Landscape in the Longue Durée Christopher Tilley, 2017-10-06 Pebbles are usually found only on the beach, in the liminal space between land and sea. But what happens when pebbles extend inland and create a ridge brushing against the sky? *Landscape in the Longue Durée* is a 4,000 year history of pebbles. It is based on the results of a four-year archaeological research project of the east Devon Pebblebed heathlands, a fascinating and geologically unique landscape in the UK whose bedrock is composed entirely of water-rounded pebbles. Christopher Tilley uses this landscape to argue that pebbles are like no other kind of stone – they occupy an especial place both in the prehistoric past and in our contemporary culture. It is for this reason that we must re-think continuity and change in a radically new way by considering embodied relations between people and things over the long term. Dividing the book into two parts, Tilley first explores the prehistoric landscape from the Mesolithic to the end of the Iron Age, and follows with an analysis of the same landscape from the eighteenth into the twenty-first century. The major findings of the four-year study are revealed through this chronological journey: from archaeological discoveries, such as the excavation of three early Bronze Age cairns, to the documentation of all 829 surviving pebble structures, and beyond, to the impact of the landscape on local economies and its importance today as a military training camp. The

results of the study will inform many disciplines including archaeology, cultural and art history, anthropology, conservation, and landscape studies.

An Introduction to Forensic Linguistics Malcolm Coulthard, Alison Johnson, 2007-11-28 From the accusation of plagiarism in *The Da Vinci Code*, to the infamous hoaxer in the Yorkshire Ripper case, the use of linguistic evidence in court and the number of linguists called to act as expert witnesses in court trials has increased rapidly in the past fifteen years. *An Introduction to Forensic Linguistics: Language in Evidence* provides a timely and accessible introduction to this rapidly expanding subject. Using knowledge and experience gained in legal settings – Malcolm Coulthard in his work as an expert witness and Alison Johnson in her work as a West Midlands police officer – the two authors combine an array of perspectives into a distinctly unified textbook, focusing throughout on evidence from real and often high profile cases including serial killer Harold Shipman, the Bridgewater Four and the Birmingham Six. Divided into two sections, 'The Language of the Legal Process' and 'Language as Evidence', the book covers the key topics of the field. The first section looks at legal language, the structures of legal genres and the collection and testing of evidence from the initial police interview through to examination and cross-examination in the courtroom. The second section focuses on the role of the forensic linguist, the forensic phonetician and the document examiner, as well as examining in detail the linguistic investigation of authorship and plagiarism. With research tasks, suggested reading and website references provided at the end of each chapter, *An Introduction to Forensic Linguistics*:

Language in Evidence is the essential textbook for courses in forensic linguistics and language of the law.

Chinese Sympathies Daniel Leonhard Purdy, 2021-10-15 *Chinese Sympathies* examines how Europeans—German-speaking writers and thinkers in particular—identified with Chinese intellectual and literary traditions following the circulation of Marco Polo's *Travels*. This sense of affinity expanded and deepened, Daniel Leonhard Purdy shows, as generations of Jesuit missionaries, baroque encyclopedists, Enlightenment moralists, and translators established intellectual regimes that framed China as being fundamentally similar to Europe. Analyzing key German literary texts—theological treatises, imperial histories, tragic dramas, moral philosophies, literary translations, and poetic cycles—*Chinese Sympathies* traces the paths from baroque-era missionary reports that accommodated Christianity with Confucianism to Goethe's concept of world literature, bridged by Enlightenment debates over cosmopolitanism and sympathy, culminating in a secular principle that allowed readers to identify meaningful similarities across culturally diverse literatures based on shared human experiences. This book is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem)—a collaboration of the Association of American Universities, the Association of University Presses,

and the Association of Research Libraries—and the generous support of the Pennsylvania State University. Learn more at the TOME website, available at: openmonographs.org. The open access edition is available at Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.

The Well Spring of the Goths Ingemar Nordgren, 2004 The Goths-a rumored people first known by history around the river Vistula in present Poland-was the people that more than other contributed to the fall of the Roman Empire. It was however also the Goths who preserved the Roman culture against other Germanic tribes. Earlier it has been generally assumed the Goths originated in Scandinavia but during the 20th c. many scholars have grown skeptical. The author has, using both Classical and Nordic sources and supplementary

sciences, made probable there is an intimate connection between the Goths and the Nordic countries. Consequently it is quite possible that at least part of the Goths have a Nordic origin. The book rests on the basic hypothesis that the Goths are not a people but a number of tribes and peoples united through a common religious/cultic origin. The old dispute concerning the relationship between Svear and Gautar also gets quite a new meaning. The book is interdisciplinary and embraces history, religion, arts, linguistics and archaeology. In 1999 Ingemar Nordgren received his Ph.D. at Odense University, Denmark The book builds to a considerable extent on his dissertation but has been updated and partly rewritten with brand new material.

Empire of Magic Geraldine Heng, 2003 *Empire of Magic* offers a genesis and genealogy for medieval romance and the King Arthur legend through the history of Europe's encounters with the East in crusades, travel, missionizing, and empire formation. It also produces definitions of race and nation for the medieval period and posits that the Middle Ages and medieval fantasies of race and religion have recently returned. Drawing on feminist and gender theory, as well as cultural analyses of race, class, and colonialism, this provocative book revises our understanding of the beginnings of the nine hundred-year-old cultural genre we call romance, as well as the King Arthur legend. Geraldine Heng argues that romance arose in the twelfth century as a cultural response to the trauma and horror of taboo acts--in particular the cannibalism committed by crusaders on the bodies of Muslim enemies in Syria during the First Crusade. From such encounters with the East, Heng suggests, sprang the fantastical episodes featuring King Arthur in Geoffrey of Monmouth's chronicle *The History of the Kings of England*, a work where

history and fantasy collide and merge, each into the other, inventing crucial new examples and models for romances to come. After locating the rise of romance and Arthurian legend in the contact zones of East and West, Heng demonstrates the adaptability of romance and its key role in the genesis of an English national identity. Discussing Jews, women, children, and sexuality in works like the romance of Richard Lionheart, stories of the saintly Constance, Arthurian chivalric literature, the legend of Prester John, and travel narratives, Heng shows how fantasy enabled audiences to work through issues of communal identity, race, color, class and alternative sexualities in socially sanctioned and safe modes of cultural discussion in which pleasure, not anxiety, was paramount. Romance also engaged with the threat of modernity in the late medieval period, as economic, social, and technological transformations occurred and awareness grew of a vastly enlarged world beyond Europe, one encompassing India, China, and Africa. Finally, Heng posits, romance locates England and Europe within an empire of magic and knowledge that surveys the world and makes it intelligible--usable--for the future. *Empire of Magic* is expansive in scope, spanning the eleventh to the fifteenth centuries, and detailed in coverage, examining various types of romance--historical, national, popular, chivalric, family, and travel romances, among others--to see how cultural fantasy responds to changing crises, pressures, and demands in a number of different ways. Boldly controversial, theoretically sophisticated, and historically rooted, *Empire of Magic* is a

dramatic restaging of the role romance played in the culture of a period and world in ways that suggest how cultural fantasy still functions for us today.

Human Accomplishment Charles Murray, 2009-10-13 A sweeping cultural survey reminiscent of Barzun's *From Dawn to Decadence*. At irregular times and in scattered settings, human beings have achieved great things. Human Accomplishment is about those great things, falling in the domains known as

the arts and sciences, and the people who did them.' So begins Charles Murray's unique account of human excellence, from the age of Homer to our own time. Employing techniques that historians have developed over the last century but that have rarely been applied to books written for the general public, Murray compiles inventories of the people who have been essential to the stories of literature, music, art, philosophy, and the sciences—a total of 4,002 men and women from around the world, ranked according to their eminence. The heart of *Human Accomplishment* is a series of enthralling descriptive chapters: on the giants in the arts and what sets them apart from the merely great; on the differences between great achievement in the arts and in the sciences; on the meta-inventions, 14 crucial leaps in human capacity to create great art and science; and on the patterns and trajectories of accomplishment across time and geography. Straightforwardly and undogmatically, Charles Murray takes on some controversial questions. Why has accomplishment been so concentrated in Europe? Among men? Since 1400? He presents evidence that the rate of great accomplishment has been declining in the last century, asks what it means, and offers a rich framework for thinking about the conditions under which the human spirit has expressed itself most gloriously. Eye-opening and humbling, *Human Accomplishment* is a fascinating work that describes what humans at their best can achieve, provides tools for exploring its wellsprings, and celebrates the continuing common quest of humans everywhere to discover truths, create beauty, and

apprehend the good.

Children of Cain Michael Howard, 2019-07-20 The mid-twentieth century saw the birth of popular occultism in Europe and the New World, including an interest in witchcraft. Chief among these was Wicca, a recension of ceremonial magic and nature worship advanced by Gerald Gardner and Alex Sanders, now widely regarded as a religion. However, lesser-known streams of the witch-current thrived the shadows, having older historical roots, and linked to a body of practice - witch-bottles, knotted cord spells, curses, exorcisms, sexual magic, and charms ranging from the conjuration of angels to protection for livestock and hearth. This is Traditional Witchcraft, whose origin in part lies with the sorcery of the cunning-folk of Britain and Colonial America. Eschewing the popular occult limelight, its perpetuation as a mystery-cult continues as a largely closed group of initiates. Now revised and expanded, the second edition of CHILDREN OF CAIN is the definitive history of Traditional Witchcraft and its key operatives in Britain and the United States, and is based on over forty years of research and private collaboration with practitioners of this mysterious form of folk magic.

Metaphorical Ways of Knowing Sharon L. Pugh, Jean Wolph Hicks, 1997 This book explores the subject of metaphor, using the imagery of cartography to set a course. It explores the creative aspects of thinking and learning through literature, writing, and word play, drawing connections between English and other content areas. Theory and practical applications meet in the book, linking activities and resources to current classroom concerns--to multiculturalism, imagination in reading and writing, critical thinking, and expanding language experiences. The first part of the book examines the uses of metaphor in constructing meaning. The second part takes up issues related to multiple perspectives--using metaphors to experience other lives, and exploring cultures through traditions. The third part of the book is devoted to a consideration of the history and current status of the English language and focuses on using cross-cultural stories in the English classroom, offering a number of resources for teaching multicultural literature in English. The fourth part examines the sensory experience of metaphors by seeing, hearing, tasting, smelling, and touching with the imagination. Contains 14 pages of references and an index. (NKA)
