Geography of the Gaze Renzo Dubbini 2002-04-15 Geography of the Gaze offers a new history and theory of how the way we look at things influences what we see. Focusing on Western Europe from the seventeenth to nineteenth centuries, Renzo Dubbini shows how developments in science, art, mapping, and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed. He begins with the idea of the "view," explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space. Among other topics, Dubbini explores how the descriptive and pictorial techniques used in mariners' charts, view-oriented atlases, military cartography, and garden design were linked to the proliferation of highly realistic paintings of landscapes and city scenes; how the "picturesque" system for defining and composing landscapes affected not just art but also archaeology and engineering; and how the ever-changing modern cityscapes inspired new ways of seeing and representing the urban scene in Impressionist painting, photography, and stereoscopy. A marvelous history of viewing, Geography of the Gaze will interest everyone from scientists to artists.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War.

Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Rethinking Evolution in the Museum Monique Scott 2007-11-19 Rethinking Evolution in the Museum explores the ways diverse natural history museum audiences imagine their evolutionary heritage. In particular, the book considers how the meanings constructed by audiences of museum exhibitions are a product of dynamic interplay between museum iconography and powerful images museum visitors bring with them to the museum. In doing so, the book illustrates how the preconceived images held by museum audiences about anthropology, Africa, and the museum itself strongly impact the human origins exhibition experience. Although museological theory has come increasingly to recognize that museum audiences 'make meaning' in exhibitions, or make their own complex interpretations of museum exhibitions, few scholars have explicitly asked how. Rethinking Evolution in the Museum, however, provides a rare window into visitor perceptions at four world-class museums--the Natural History Museum and Horniman Museum in London, the National

Museums of Kenya in Nairobi and the American Museum of Natural History in New York. Through rigorous and novel mixed methods (quantitative and qualitative) covering nearly 500 museum visitors, this innovative study shows that audiences of human origins exhibitions interpret evolution exhibitions through a profoundly complex convergence of personal, political, intellectual, emotional and cultural interpretive strategies. This book also reveals that natural history museum visitors often respond to museum exhibitions similarly because they use common cultural tools picked up from globalized popular media circulating outside of the museum. One tool of particular interest is the notion that human evolution has proceeded linearly from a bestial African prehistory to a civilized European present. Despite critical growths in anthropological science and museum displays, the outdated Victorian progress motif lingers persistently in popular media and the popular imagination. Rethinking Evolution in the Museum sheds light on our relationship with natural history museums and will be crucial to those people interested in understanding the connection between the visitor, the museum and media culture outside of the museum context.

From the earliest days of the Farm, when Walter Knott, his wife Cordelia, and their kids were serving up baskets of berries "as big as a man's thumb" and berry pies that weighed in at three pounds, to the advent of themed rides, Camp Snoopy replete with the Peanuts gang, and the arrival of the fastest coasters the coast had ever seen--it's all in Knott's Preserved. This updated edition to the book is brimming with more than 200 images--most of them never before published--Knott's Preserved reveals exactly how the Knott family turned a berry business into one of the major theme parks in the world. Artists and designers will flip at the details and artwork the authors display--the how-it-happened of Knott's from the earliest days. The berries and fried chicken were a just a yummy lead-in to what would become a thrills capital of the world. Plus, it's a story of how a man and a woman remained true to their values, sharing profits and credit whenever they could. Heartwarming? Yes. Decidedly so. For everybody who ever put their arms around Whiskey Bill and Handsome Brady, screamed in terror at Knott's Scary Farm, or marveled at the Calico Mine, this is the book that's filled with as much nostalgia as the Farm itself. The Return of the Visible in British Romanticism William H. Galperin 1993 In this path-breaking study William Galperin offers a major revisionist reading of Romanticism that emphasizes the visible - as opposed to visionary - impulse in British Romantic poetry and prose. Employing a wide variety of theoretical insights, Galperin shows not only that the visual impulse is central to an understanding of Romanticism but also that the Romantic preoccupation with the "world seen" forms an integral part of the prehistory of cinema. Galperin challenges the assumption that a single philosophy characterized the art and culture of high Romanticism. Instead, he argues, the culture of the period - both high and low - was a site of competing ideas. From the poetry of Wordsworth and Byron to the painting of John Constable and Caspar David Friedrich to the precinematic institutions of the panorama and the diorama, The Return of the Visible in British Romanticism lends new vigor to ongoing debates about the nature of Romanticism lends new vigor to ongoing debates about the nature of Romanticism, nineteenth-century culture, and the origins of cinema.

The Taco Truck Robert Lemon 2019-05-16 Icons of Mexican cultural identity and America’s melting pot ideal, taco trucks have transformed cityscapes from coast to coast. The taco truck radiates Mexican culture within non-Mexican spaces with a presence—sometimes desired, sometimes resented—that turns a public street corner into a bustling business. Drawing on interviews with taco truck workers and his own skills as a geographer, Robert Lemon illuminates new truths about foodways, community, and the unexpected places where ethnicity, class, and culture meet. Lemon focuses on the Bay Area, Sacramento, and Columbus, Ohio, to show how the arrival of taco trucks challenge preconceived ideas of urban planning even as cities use them to reinvent whole neighborhoods. As Lemon charts the relationships between food practices and city spaces, he uncovers the many ways residents and politicians alike contest, celebrate, and influence not only where your favorite truck parks, but what’s on the menu.

One-Hour Wargames Neil Thomas 2014-09-03 A fun and practical new approach to wargaming that lets you complete a game in about an hour—includes rule sets and scenarios for most popular periods. One of the biggest problems facing wargamers is finding the time to actually play. Most commercially available games require several hours to set up and see to a conclusion; some can even take a whole day or weekend to complete. Apart from time, lack of space can also keep wargamers from enjoying their favorite pastime. In *One-hour Wargames*, veteran gamer and rule-writer Neil Thomas has addressed both problems. Now it is practical to play a satisfying game in around an hour on a normal dining table or living room floor. The book contains 8 all-new sets of very simple rules for various periods—from Ancient to WW2—and thirty stimulating scenarios which can be played using any of them. All the rules and scenarios are intended to be played on a 3ft x 3ft battlefield. The rules only require a small number of miniatures, so this really is an ideal way for new gamers, or veterans trying a new period, to get started with minimal investment of time and money. Also ideal for a quick game in the evening with a friend. Also included are sections on campaigns and solo games.
