**The West in Early Cinema** Nanna Verhoeff, 2006-01-01 Verhoeff investigates the emergence of the western genre, made in the first two decades of cinema (1895-1915). By analyzing many unknown and forgotten films from international archives she traces the relationships between films about the American West, their surrounding films, and other popular media such as photography, painting, (pulp) literature, Wild West Shows and popular ethnography. Through this exploration of archival material she raises new questions of historiography and provides a model for historical analysis. These first traces of the Western film reveal a preoccupation with presence and actuality that informs us about the way in which film, as new medium, took shape within the context of its contemporary visual culture. In *The West in Early Cinema* gaat Nanna Verhoeff op zoek naar de nog onbekende beginjaren van het westerngenre tijdens de eerste twee decennia van het medium film 1895-1915). Aan de hand van onbekende en vergeten films uit internationale filmarchieven traceert zij de relaties tussen films over het Westen, omringende filmgenres uit deze periode, en andere populaire media als fotografie, schilderkunst, (pulp)literatuur, Wild West Shows en populaire etnografie. Deze sporen van het genre tonen een grote actualiteit en variatie, die laat zien op welke manier de film als nieuw medium een vorm vond binnen de toenmalige visuele cultuur.

*Autonomous Driving* Markus Maurer, J. Christian Gerdes, Barbara Lenz, Hermann Winner, 2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving."

**The Sun Came Down** Percy Bullchild, 2005-01-01 At the age of sixty-seven, Percy Bullchild (1915-1986), a Blackfeet Indian from Browning, Montana, with little formal education in English, set out to put the oral traditions and history of his people into a permanent written record. He regarded this undertaking as he puts it as both a corrective and an instructive tool. Bullchild culled this remarkable collection of historical legends from his memory of the oral history as it was passed down to him by his elders and by seeking out the oral traditions of other tribes. These stories, like all legends, Bullchild reminds us, may sound a little foolish, but they are very true. And they have much influence over all of the people of this world, even now as we all live. Woody Kipp provides a preface for this Bison Books edition.

**The Dynasts** Thomas Hardy, 2012-09-01 In this epic historical drama in verse form, Thomas Hardy brings the same level of realism and gritty detail to a poetic retelling of the Napoleonic Wars that he honed in novels such as *Far From the Madding Crowd* and *Jude the Obscure*. Hardy himself considered *The Dynasts* to be his masterpiece, and though critical response was initially lukewarm, modern-day readers and critics have come to appreciate the vast scope and literary innovation of this ambitious work.

*The Grid Book* Hannah B Higgins, 2009-01-23 Ten grids that changed the world: the emergence and evolution of the most prominent visual structure in Western culture. Emblematic of modernity, the grid is the underlying form of everything from skyscrapers and office cubicles to paintings by Mondrian and a piece of computer code. And yet, as Hannah Higgins makes clear in this engaging and evocative book, the grid has a history that long predates modernity; it is the most prominent visual structure in Western culture. In *The Grid Book*, Higgins examines the history of ten grids that changed the world: the brick, the tablet, the gridiron city plan, the map, musical notation, the ledger, the screen, moveable type, the manufactured box, and the net. Charting the evolution of each grid, from the Paleolithic brick of ancient Mesopotamia through the virtual connections of the Internet, Higgins demonstrates that once a grid is invented, it may bend, crumble, or shatter, but its organizing principle never disappears. The appearance of each grid was a watershed event. Brick, tablet, and city gridiron made possible sturdy housing, the standardization of language, and urban development. Maps, musical notation, financial ledgers, and moveable type promoted the organization of space, music, and time, international trade, and mass

literacy. The screen of perspective painting heralded the science of the modern period, classical mechanics, and the screen arts, while the standardization of space made possible by the manufactured box suggested the purified box forms of industrial architecture and visual art. The net, the most ancient grid, made its first appearance in Stone Age Finland; today, the loose but clearly articulated networks of the World Wide Web suggest that we are in the middle of an emergent grid that is reshaping the world, as grids do, in its image.

*Art in the Anthropocene* Etienne Turpin, Dr Heather Davis, 2015-06-11 Taking as its premise that the proposed epoch of the Anthropocene is necessarily an aesthetic event, this collection explores the relationship between contemporary art and knowledge production in an era of ecological crisis. **Architecture's Historical Turn** Jorge Otero-Pailos, 2010 Architecture's Historical Turn traces the hidden history of architectural phenomenology, a movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question. Jorge Otero-Pailos shows how architectural phenomenology radically transformed how architects engaged, theorized, and produced history. In the first critical intellectual account of the movement, Otero-Pailos discusses the contributions of leading members, including Jean Labatut, Charles Moore, Christian Norberg-Schulz, and Kenneth Frampton. For architects maturing after World War II, Otero-Pailos contends, architectural history was a problem rather than a given. Paradoxically, their awareness of modernism's historicity led some of them to search for an ahistorical experiential constant that might underpin all architectural expression. They drew from phenomenology, exploring the work of Bachelard, Merleau-Ponty, Heidegger, and Ricoeur, which they translated for architectural audiences. Initially, the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized

postmodernism. It helped give theory--especially the theory of architectural history--a new importance over practice. However, as Otero-Pailos makes clear, architectural phenomenologists could not accept the idea of theory as an end in itself. In the mid-1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory. Otero-Pailos reveals how, ultimately, the rise of architectural phenomenology played a crucial double role in the rise of postmodernism, creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it.
