Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Umbrella Jan Brett,2004-09-09 A walk through the Costa Rican cloud forest provides a wonderfully lush setting for Jan Brett's beloved animal illustrations. When Carlos drops his umbrella to climb a tree for a better view of the animals, they all cram into the banana-leaf umbrella as it floats by--from the little tree frog to the baby tapir to the big jaguar and more. It gets so crowded in the umbrella that there isn't even enough room for a little hummingbird! So over the umbrella tumbles, everyone falls out, and poor Carlos comes back wondering why he didn't see any animals all day. In the spirit of Jan Brett's The Mitten and The Hat, this cheerful tale of escalation will have readers poring over every illustration for the world of details Jan packs in. With its classic story, exotic jungle setting, and brilliantly colorful menagerie, The Umbrella is sure to take its place among Jan's many family favorites.

No Exit from Pakistan Daniel S. Markey,2013-10-07 This book tells the story of the tragic and often tormented relationship between the United States and Pakistan. Pakistan's internal troubles have already threatened U.S. security and international peace, and Pakistan's rapidly growing population, nuclear arsenal, and relationships with China and India will continue to force it upon America's geostrategic map in new and important ways over the coming decades. This book explores the main trends in Pakistani society that will help determine its future; traces the wellsprings of Pakistani anti-American sentiment through the history of U.S.-Pakistan relations from 1947 to 2001; assesses how Washington made and implemented policies regarding Pakistan since the terrorist attacks on the United States on September 11, 2001; and analyzes how regional dynamics, especially the rise of China, will likely shape U.S.-Pakistan relations. It concludes with three options for future U.S. strategy, described as defensive insulation, military-first cooperation, and comprehensive cooperation. The book explains how Washington can prepare for the worst, aim for the best, and avoid past mistakes.

Talking, Drawing, Writing Martha Horn,Mary Giacobbe,2023-10-10 In the early grades, talking and drawing can provide children with a natural pathway to writing, yet these components are often overlooked. In Talking, Drawing, Writing: Lessons for Our Youngest Writers , authors Martha Horn and Mary Ellen Giacobbe invite readers to join them in classrooms where they listen, watch, and talk with children, then use what they learn to create lessons designed to meet children where they are and lead them into the world of writing. The authors make a case for a broader definition of writing, advocating for formal storytelling sessions, in which children tell about what they know, and for focused sketching sessions so that budding writers learn how to observe more carefully.The book's lessons are organized by topic and include oral storytelling, drawing, writing words, assessment, introducing booklets, and moving writers forward. Based on the authors' work in urban kindergarten and first-grade classes, the essence and structure of many of the lessons lend themselves to adaptation through fifth grade. The lessons follow a consistent format: What's going on in the classroom? What do children need to learn next? Materials needed to teach the lesson Language used in each lesson Reasons behind why certain books are chosen and suggestions for additional children’s books The authors show the thinking behind their teaching decisions and provide a way to look at and assess children's writing, giving us much more than a book of lessons; they present a vision of what beginning writing can look and sound like. Perhaps most powerfully, they give us examples of the language they use with children that reveal a genuine respect for and trust in children as learners.

Sengoidelc David Stifter,2006-06-12 David Stifter’s Sengoidelc (SHAN-goy-thelg) provides a comprehensive introduction to Old Irish grammar and metrics. As an introductory text to the Irish language spoken around the eighth century C.E., this essential volume, covering all aspects of the grammar in a clear and intuitive format, is ideally suited for use as a course book or as a guide for the independent learner. This handbook also will be an essential reference work for students of Indo-European philology and historical linguistics. Stifter leads the novice through the idiosyncrasies of the language, such as initial mutations and the double inflection of verbs. Filled with translation exercises based on selections from Old Irish texts, the book provides a practical introduction to the language and its rich history. Sengoidelc opens the door to the fascinating world of Old Irish literature, famous not only for the Táin Bó Cúailnge (The Cattle Raid of Cúailnge) and its lyrical nature poetry but also as a major source for the political and legal history of

Ireland. Stifter’s step-by-step approach and engaging style make his book an ideal tool for both the self taught individual and the classroom environment. It will be of interest to beginning students of Old and Middle Irish, to scholars of Irish history, Celtic culture, and comparative linguistics, and to readers of Irish literature.

Cisalpine Celtic. Language, writing, epigraphy Stifter, David,2020-06 In the first millennium b.c., two Ancient Celtic languages were spoken in what is today northern Italy and southern Switzerland, along the northern part of the river Po, and in the valleys around the big lakes on the southern slopes of the Alps. These languages, Lepontic and Gaulish, are grouped together as Cisalpine Celtic, i.e. ‘Celtic on this side of the Alps’, viewed from the perspective of the ancient Romans, in contrast to the Transalpine Gaulish language on the far side of the Alps in modern France. Known from over 400 inscriptions that span around 600 years, the two languages share the same writing system, borrowed from the Etruscans to the south. This volume of the AELAW series offers an introduction to what is known about the grammar and the lexicon of these languages, how to read the script and how to interpret the the various types of inscriptions (graffiti on pottery, tombstones, dedicatory formulae). This is accompanied by over forty new images and drawings of the inscribed objects. A census of the inscriptions known today and a concise bibliography round off the volume. The book contains 2 maps, 2 tables and 28 figures.
