B. N. Suresh 2021-04-17 This book discusses the journey of Dr. K Kasturirangan, who shares his experience during his long tenure at ISRO including the Chairmanship of ISRO, subsequently membership of the Rajya Sabha, the Planning Commission and many other responsibilities. Over the past five decades of public and professional service to the nation, Dr. Kasturirangan has graduated from a young researcher in astrophysics working under Vikram Sarabhai to leading India’s space program (ISRO), being entrusted by five successive Prime Ministers, besides dealing with several other domains of responsibilities beyond space, all of which have significantly impacted India’s development. This book centers around select 12 public invited lectures, Dr. Kasturirangan delivered ranging from developing hi-tech space systems, to managing an organization as intricate as ISRO which was guided by the wisdom of mentors, including Vikram Sarabhai, M G K Menon, Satish Dhawan and U. R. Rao, to tackling multi-faceted socio-economic issues, including India’s nuclear deal, report headed by him on the Western Ghats ecosystem, and the new National Education Policy 2020. Scientists, historians, policy makers, management strategists, journalists, or anyone with a keen interest in understanding the processes behind such large-scale science, technology and socio-economic endeavors – right from planning, creating appropriate institutional mechanisms, working with multiple stakeholders to ensure that these programs deliver tangible benefits to society, articulating these benefits with clarity to political leaders to assure public support – will find this book deeply instructive and illuminating. It will be of interest to the scientific, education and management community as well as to policy makers and researchers affiliated with multifaceted developmental issues.

**Semper Mars** Ian Douglas 2009-03-17 The Year is 2040. The Marines have landed on Mars to guard the unearthed secrets of an ancient and dangerous alien race: Ourselves. Scientists have discovered something astonishing in the subterranean ruins of a sprawling Martian city: startling evidence of an alternative history that threatens to split humanity into opposing factions and plunge the Earth into chaos and war. The USMC -- a branch of a military considered, until just recently, to be obsolete -- has dispatched the Marine Mars Expeditionary Force, a thirty-man weapons platoon, to the Red Planet to protect American civilians and interest with lethal force if necessary. Because great powers are willing to devastate a world in order to keep an ancient secret buried. *Space Marine Ajax* Sean-Michael Argo 2017-01-17 Ajax answers the call of duty and becomes an Einherjar space marine, charged with defending humanity against hideous alien monsters in furious combat across the galaxy. The Garm, as they came to be called, emerged from the deepest parts of uncharted space, devouring all that lay before them, a great swarm that scoured entire star systems of all organic life. This space borne hive, this extinction fleet, made no attempts to communicate and offered no mercy. Humanity has always been a deadly organism, and we would not so easily be made the prey. Unified against a common enemy, we fought back, meeting the swarm with soldiers upon every front. We were resplendent in our fury, and yet, despite the terrible slaughter we visited upon the enemy, world after world still fell beneath ravenous tooth and wicked claw. For every beast slain in the field, another was swiftly hatched to take its place and humanity was faced with a grim war of attrition. After a decade of bitter galactic conflict, it was all humanity could to do slow the advance of the swarm and with each passing year we came closer to extinction. The grinding cost of war mounted. The realization set in that without a radical shift in tactics and technology the forces of humanity would run out of soldiers before it ran out of bullets. In desperate response to the real threat of total annihilation, humanity created the Einherjar. Fearless new warriors with frightening new weapons who were sent to fight the wolves at the gate.

Now there's help. The long-awaited official documentation to Maven is here. Written by Maven creator Jason Van Zyl and his team at Sonatype, Maven: The Definitive Guide clearly explains how this tool can bring order to your software development projects. Maven is largely replacing Ant as the build tool of choice for large open source Java projects because, unlike Ant, Maven is also a project management tool that can run reports, generate a project website, and facilitate communication among members of a working team. To use Maven, everything you need to know is in this guide. The first part demonstrates the tool's capabilities through the development, from ideation to deployment, of several sample applications -- a simple software development project, a simple web application, a multi-module project, and a multi-module enterprise project. The second part offers a complete reference guide that includes: The POM and Project Relationships The Build Lifecycle Plugins Project website generation Advanced site generation Reporting Properties Build Profiles The Maven Repository Team Collaboration Writing Plugins IDEs such as Eclipse, IntelliJ, ands NetBeans Using and creating assemblies Developing with Maven Archetypes Several sources for Maven have appeared online for some time, but nothing served as an introduction and comprehensive reference guide to this tool -- until now.
