The Social Media Reader Michael Mandiberg,2012-03 The first collection to address the collective transformation happening in response to the rise of social media With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

Animal Spirits George A. Akerlof,Robert J. Shiller,2010-02-01 From acclaimed economists George Akerlof and Robert Shiller, the case for why government is needed to restore confidence in the economy The global financial crisis has made it painfully clear that powerful psychological forces are imperiling the wealth of nations today. From blind faith in ever-rising housing prices to plummeting confidence in capital markets, animal spirits are driving financial events worldwide. In this book, acclaimed economists George Akerlof and Robert Shiller challenge the economic wisdom that got us into this mess, and put forward a bold new vision that will transform economics and restore prosperity. Akerlof and Shiller reassert the necessity of an active government role in economic policymaking by recovering the idea of animal spirits, a term John Maynard Keynes used to describe the gloom and despondence that led to the Great Depression and the changing psychology that accompanied recovery. Like Keynes, Akerlof and Shiller know that managing these animal spirits requires the steady hand of government—simply allowing markets to work won't do it. In rebuilding the case for a more robust, behaviorally informed Keynesianism, they detail the most pervasive effects of animal spirits in contemporary economic life—such as confidence, fear, bad faith, corruption, a concern for fairness, and the stories we tell ourselves about our economic fortunes—and show how Reaganomics, Thatcherism, and the rational expectations revolution failed to account for them. Animal Spirits offers a road map for reversing the financial misfortunes besetting us today. Read it and learn how leaders can channel animal spirits—the powerful forces of human psychology that are afoot in the world economy today. In a new preface, they describe why our economic troubles may linger for some time—unless we are prepared to take further, decisive action.

Race, Law, and American Society Gloria J. Browne-Marshall,2013-05-02 This second edition of Gloria Browne-Marshall's seminal work , tracing the history of racial discrimination in American law from colonial times to the present, is now available with major revisions. Throughout, she advocates for freedom and equality at the center, moving from their struggle for physical freedom in the slavery era to more recent battles for equal rights and economic equality. From the colonial period to the present, this book examines education, property ownership, voting rights, criminal justice, and the military as well as internationalism and civil liberties by analyzing the key court cases that established America's racial system and demonstrating the impact of these court cases on American society. This edition also includes more on Asians, Native Americans, and Latinos. Race, Law, and American Society is highly accessible and thorough in its depiction of the role race has played, with the sanction of the U.S. Supreme Court, in shaping virtually every major American social institution.

The Enduring Challenge of Concentrated Poverty in America David Erickson,2008 This report--a joint effort of the Federal Reserve's Community Affairs function and the Brookings Institution's Metropolitan Policy Program--examines the issue of concentrated poverty and profiles 16 high-poverty communities from across the country, including immigrant gateway, Native American, urban, and rural communities. Through these case studies, the report contributes to our understanding of the dynamics of poor people living in poor communities, and the policies that will be needed to bring both into the economic mainstream. It is not the intention of this publication to explain poverty causation. Instead, the goal is to add texture to our understanding of where and how concentrated poverty exists, by studying new areas and by interviewing local stakeholders, including residents, community leaders, and government representatives, to understand how concentrated poverty affects both individuals and communities. The report begins with Concentrated Poverty in America: An Overview (Alan Berube) and Introduction to the Case Studies (Carolina Reid). It then presents the following 16 case studies: (1) Fresno, California: the West Fresno neighborhood (Naomi Cytron); (2) Cleveland, Ohio: the Central neighborhood (Lisa Nelson); (3) Miami, Florida: the Little Haiti neighborhood (Ana Cruz-Taura and Jessica LeVeon Farr); (4) Martin County, Kentucky (Jeff Gatica); (5) Blackfeet Reservation, Montana (Sandy Gerber, Michael Grover, and Sue Woodrow); (6) Greenville, North Carolina: the West Greenville neighborhood (Carl Neel); (7) Atlantic City, New Jersey: the Bungalow Park/Marina District area (Harriet Newburger, John Wackes, Keith Rolland, and Anita Sands); (8) Austin, Texas: the East Austin neighborhood (Elizabeth Sobel); (9) McKinley County, New Mexico: Crownpoint (Steven Shepelwich and Roger Zalneraitis); (10) McDowell County, West Virginia (Courtney Anderson Mailey); (11) Albany, Georgia: the East Albany neighborhood (Jessica LeVeon Farr and Sibyl Slade); (12) El Paso, Texas: the Chamizal neighborhood (Roy Lopez); (13) Springfield, Massachusetts: Old Hill, Six Corners, and the South End neighborhoods (DeAnna Green); (14) Rochester, New York: the Northern Crescent neighborhoods (Alexandra Forter Sirota and Yazmin Osaki); (15) Holmes County, Mississippi (Ellen Eubank); and (16) Milwaukee, Wisconsin: the Northwest neighborhood (Jeremiah Boyle). Following these case studies is Learning from Concentrated Poverty in America: A Synthesis of Themes from the Case Studies (Alan Berube, David Erickson, and Carolina Reid). Appended to this report are: (A) References for Comparison Statistics Tables; (B) Literature Review: Federal Reserve System Poverty-Related Research; (C) References for Overview in Alphabetical Order (by First Author); and (D) Photo Credits. (Individual case studies contain tables, figures, and footnotes.).

Biodiversity and Human Health Francesca Grifo,Joshua Rosenthal,1997-02-01 The implications of biodiversity loss for the global environment have been widely discussed, but only recently has attention been paid to its direct and serious effects on human health. Biodiversity loss affects the spread of human diseases, causes a loss of medical models, diminishes the supplies of raw materials for drug discovery and biotechnology, and threatens food production and water quality. Biodiversity and Human Health brings together leading thinkers on the global environment and biomedicine to explore the human health consequences of the loss of biological diversity. Based on a two-day conference sponsored by the National Institutes of Health, the National Science Foundation, and the Smithsonian Institution, the book opens a dialogue among experts from the fields of public health, biology, epidemiology, botany, ecology, demography, and pharmacology on this vital but often neglected concern. Contributors discuss the uses and significance of biodiversity to the practice of medicine today, and develop strategies for conservation of these critical resources. Topics examined include: the causes and consequences of biodiversity loss emerging infectious diseases and the loss of biodiversity the significance and use of both prescription and herbal biodiversity-derived remedies indigenous and local peoples and their health care systems sustainable use of biodiversity for medicine an agenda for the future In addition to the editors, contributors include Anthony Artuso, Byron Bailey, Jensa Bell, Bhaswati Bhattacharya, Michael Boyd, Mary S. Campbell, Eric Chivian, Paul Cox, Gordon Cragg, Andrew Dobson, Kate Duffy-Mazan, Robert Engelman, Paul Epstein, Alexandra S. Fairfield, John Grupenhoff, Daniel Janzen, Catherine A. Laughin, Katy Moran, Robert McCaleb, Thomas Mays, David Newman, Charles Peters, Walter Reid, and John Vandermeer. The book provides a common framework for physicians and biomedical researchers who wish to learn more about environmental concerns, and for members of the environmental community who desire a greater understanding of biomedical issues.

Trade and Development Report 2018 UNCTAD,2019-01-16 This flagship publication examines different aspects of the nature and role of international trade in the era of hyperglobalization and considers related policy challenges that will need to be addressed if trade is to contribute to a more stable and inclusive global economic order. Research provides authoritative data and analysis on trade, investment, finance and technology.

UNCTAD offers solutions to the major challenges facing developing countries, particularly the poorest and most vulnerable nations. Beyond tailored analysis and policy recommendations, UNCTAD research also generates global standards that govern responsible sovereign lending and borrowing, investment, entrepreneurship, competition and consumer protection and trade rules.

Economic Risks of Climate Change Trevor Houser,Solomon Hsiang,Robert Kopp,Kate Larsen,Michael Delgado,Amir Jina,Michael Mastrandrea,Shashank Mohan,Robert Muir-Wood,D. J. Rasmussen,James Rising,Paul Wilson,2015-08-18 Climate change threatens the economy of the United States in myriad ways, including increased flooding and storm damage, altered crop yields, lost labor productivity, higher crime, reshaped public-health patterns, and strained energy systems, among many other effects. Combining the latest climate models, state-of-the-art econometric research on human responses to climate, and cutting-edge private-sector risk-assessment tools, *Economic Risks of Climate Change: An American Prospectus* crafts a game-changing profile of the economic risks of climate change in the United States. This prospectus is based on a critically acclaimed independent assessment of the economic risks posed by climate change commissioned by the Risky Business Project. With new contributions from Karen Fisher-Vanden, Michael Greenstone, Geoffrey Heal, Michael Oppenheimer, and Nicholas Stern and Bob Ward, as well as a foreword from Risky Business cochairs Michael Bloomberg, Henry Paulson, and Thomas Steyer, the book speaks to scientists, researchers, scholars, activists, and policy makers. It depicts the distribution of escalating climate-change risk across the country and assesses its effects on aspects of the economy as varied as hurricane damages and violent crime. Beautifully illustrated and accessibly written, this book is an essential tool for helping businesses and governments prepare for the future.

The Wages of Whiteness David R. Roediger,2022-11-22 Combining classical Marxism, psychoanalysis, and the new labor history pioneered by E. P. Thompson and Herbert Gutman, David Roediger's widely acclaimed book provides an original study of the formative years of working-class racism in the United States. This, he argues, cannot be explained simply with reference to economic advantage; rather, white working-class racism is underpinned by a complex series of psychological and ideological mechanisms that reinforce racial stereotypes, and thus help to forge the identities of white workers in opposition to Blacks.

An Introduction to Zooarchaeology Diane Gifford-Gonzalez,2018-04-03 This volume is a comprehensive, critical introduction to vertebrate zooarchaeology, the field that explores the history of human relations with animals from the Pliocene to the Industrial Revolution. The book is organized into five sections, each with an introduction, that leads the reader systematically through this swiftly expanding field. Section One presents a general introduction to zooarchaeology, key definitions, and an historical survey of the emergence of zooarchaeology in the Americas, Europe, Asia, and Africa, and introduces the conceptual approach taken in the book. This volume is designed to allow readers to integrate data from the book along with that acquired elsewhere within a coherent analytical framework. Most of its chapters take the form of critical "review articles," providing a portal into both the classic and current literature and contextualizing these with original commentary. Summaries of findings are enhanced by profuse illustrations by the author and others.

Main Street Sinclair Lewis,2023-01-03 The novel written by Sinclair Lewis is set in the small town of Gopher Prairie, Minnesota, a fictionalized version of Sauk Centre, Minnesota. The novel takes place in the 1910s, with references to the start of World War I, the United States' entry into the war, and the years following the end of the war, including the start of Prohibition. Satirizing small-town life, *Main Street* is perhaps Sinclair Lewis's most famous book, and led in part to his eventual 1930 Nobel Prize for Literature. It relates the life and struggles of Carol Milford Kennicott as she comes into conflict with the small-town mentality of the residents of Gopher Prairie. Highly acclaimed upon publication, *Main Street* remains a recognized American classic.

Health Issues in the Black Community Ronald L. Braithwaite,Sandra E. Taylor,Henrie M. Treadwell,2009-10-22 Health Issues in the Black Community THIRD EDITION The outstanding editors and authors of *Health Issues in the Black Community* have placed in clear perspective the challenges and opportunities we face in working to achieve the goal of health equity in America. —David Satcher, MD, PhD, 16th Surgeon General of the United States and director, Satcher Health Leadership Institute at Morehouse School of Medicine Eliminating health disparities must be a central goal of any forward thinking national health policy. *Health Issues in the Black Community* makes a valuable contribution to a much-needed dialogue by focusing on the challenges of the black community. —Marc Morial, Esq., president, National Urban League *Health Issues in the Black Community* illuminates comprehensively the range of health conditions specifically affecting African Americans, and the health disparities both within the black community and between racial and ethnic groups. Each chapter, whether addressing the health of African Americans by age, gender, type of disease, condition or behavior, is well-detailed and tells an important story. Together, they offer practitioners, consumers, scholars, and policymakers a crucial roadmap to address and change the social determinants of health, reduce disparities, and create more equal treatment for all Americans. —Risa Lavizzo-Mourey, MD, MBA, president, Robert Wood Johnson Foundation I recommend *Health Issues in the Black Community* as a must-read for anyone concerned about the future of the African American community. Health disparities continues to be one of the major issues confronting the black community. This book will help to highlight the issues and keep attention focused on the work to be done. —Elsie Scott, PhD, president of the Congressional Black Caucus Foundation This book is the definitive examination of health issues in black America—issues sadly overlooked and downplayed in our culture and society. I congratulate Drs. Braithwaite, Taylor, and Treadwell for their monumental book. —Cornel West, PhD, professor, Princeton University
