Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine, 2018-07-21 In the United States, broad study in an array of different disciplines – arts, humanities, science, mathematics, engineering – as well as an in-depth study within a special area of interest, have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven, in part, by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievement of the past century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today, many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. *The Integration of the Humanities and Arts with*

Sciences, Engineering, and Medicine in Higher Education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead to improved educational and career outcomes for undergraduate and graduate students. It explores evidence regarding the value of integrating more STEMM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEMM education programs.

The Next Step, 2017-03 The Next Step: Exponential Life presents essays on the potential of what are known as exponential technologies--those whose development is accelerating rapidly, such as robotics, artificial intelligence or industrial biology--considering their economic, social, environmental, ethical and even ontological implications. This book's premise is that humanity is at the beginning of a technological revolution that is evolving at a much faster pace than earlier ones--a revolution is so far-reaching it is destined to generate transformations we can only begin to imagine. Modeling Creativity Tom De Smedt, 2013-02-01 Modeling Creativity (doctoral thesis, 2013) explores how creativity can be represented using computational approaches. Our aim is to construct computer models that exhibit creativity in an artistic context, that is, that are capable of generating or evaluating an artwork (visual or linguistic), an interesting new idea, a subjective opinion. The research was conducted in 2008–2012 at the Computational Linguistics Research Group (CLiPS, University of Antwerp) under the supervision of Prof. Walter Daelemans. Prior research was also conducted at the Experimental Media Research Group (EMRG, St. Lucas University College of Art & Design Antwerp) under the supervision of Lucas Nijs. Modeling Creativity examines creativity in a number of different perspectives: from its origins in nature, which is essentially blind, to humans and machines, and from generating creative ideas to evaluating and learning their novelty and usefulness. We will use a hands-on approach with case studies and examples in the Python programming language.

Digital Photography for Science (Hardcover) Enrico Savazzi, 2011 Photography is the primary tool for visually documenting specimens, experimental findings and laboratory setups in many scientific fields. Photographic illustrations in these fields must satisfy criteria of clarity, objectivity and adherence

to accepted standards, in addition to a pleasant but not distracting composition and illumination. This book concentrates on the choice and practical use of digital cameras, lenses and related equipment of types commonly available at research institutions and museums. The described techniques are suitable for subject sizes between approximately half a millimeter and half a meter, and differ from those used in general photography and microscopy. The intended audience of this book includes professional scientific photographers, scientists and students who need to carry out photography in support of their own research or as part-time scientific photographers at a research institution, and advanced amateur photographers who wish to master these techniques.

Form, Fit, Fashion Jay Calderin, 2009-12-01 An indispensable primer for students and first-stop reference for professionals, *Form, Fit, and Fashion* guides the fashion designer through the entire design process, from conceiving a garment to marketing it. This handbook collects the information and ideas essential to planning and executing fashion projects of every scale and distills them in an easy-to-use format that is compact enough to slip into a tote. Linking six central phases in the cycle of fashion—research, editing, design, construction, connection, and evolution—*Form, Fit, and Fashion* will help designers to develop effective strategies for building a cohesive collection and communicating their vision.

The Eco-design Handbook Alastair Fuad-Luke, 2004 The *Eco-Design Handbook* is

the first book to present the best-designed objects for every aspect of the home and office, including the most environmentally sound materials and building products. The book contains three essential components. An introduction puts forward the history and latest thinking in green design strategies. Its core comprises two sections devoted to detailed illustrated descriptions of objects for domestic living and products for the office or work-related activities. The third element is a vast reference source, defining available materials, from organic to specially developed eco-sensitive composites and then providing detailed information on manufacturers, design studios, green organizations, online information, as well as further reading and a glossary of useful terms and concepts. Lastly, a comprehensive index makes it possible for the reader to find any product, designer or manufacturer instantly.

Cellular Metals Isabel Duarte, Matej Vesenjak, Thomas Fiedler, 2021-07-27
Cellular solids and porous metals have become some of the most promising lightweight multifunctional materials due to their superior combination of advanced properties mainly derived from their base material and cellular structure. They are used in a wide range of commercial, biomedical, industrial, and military applications. In contrast to other cellular materials, cellular metals are non-flammable, recyclable, extremely tough, and chemically stable and are excellent energy absorbers. The manuscripts of this Special Issue provide a representative insight into the recent

developments in this field, covering topics related to manufacturing, characterization, properties, specific challenges in transportation, and the description of structural features. For example, a presented strategy for the strengthening of Al-alloy foams is the addition of alloying elements (e.g., magnesium) into the metal bulk matrix to promote the formation of intermetallics (e.g., precipitation hardening). The incorporation of micro-sized and nano-sized reinforcement elements (e.g., carbon nanotubes and graphene oxide) into the metal bulk matrix to enhance the performance of the ductile metal is presented. New bioinspired cellular materials, such as nanocomposite foams, lattice materials, and hybrid foams and structures are also discussed (e.g., filled hollow structures, metal-polymer hybrid cellular structures).

Humanizing Digital Reality Klaas De Rycke, Christoph Gengnagel, Olivier Baverel, Jane Burry, Caitlin Mueller, Minh Man Nguyen, Philippe Rahm, Mette Ramsgaard Thomsen, 2017-09-15 This book aims at finding some answers to the questions: What is the influence of humans in controlling CAD and how much is human in control of its surroundings? How far does our reach as humans really go? Do the complex algorithms that we use for city planning nowadays live up to their expectations and do they offer enough quality? How much data do we have and can we control? Are today's inventions reversing the humanly controlled algorithms into a space where humans are controlled by the algorithms? Are processing power, robots for the digital environment and

construction in particular not only there to rediscover what we already knew and know or do they really bring us further into the fields of constructing and architecture? The chapter authors were invited speakers at the 6th Symposium Design Modelling Symposium: Humanizing Digital Reality, which took place in Ensa-Versailles, France from 16 - 20 September 2017.

If Picasso Went on Vacation Eric Gibbons, 2017-02-15 Each teacher has emulated an artist of his/her choosing from history and a famous global landmark in a way that honors the work of that artist. By combining art, history, geography, poetry, and language, this book becomes a unique gift and resources for art lovers of all ages. Art genres from the Renaissance era to modern works are represented. Our art teachers, from elementary level to high school, created these delightful illustrations to share and educate--Back cover.

If Picasso Went to the Sea Eric Gibbons, 2016-09-15 Each page of this educational children's book contains a beautiful aquatic-themed art piece created by one of 35 art teachers from all over the world who have all chosen a famous artist to emulate. A great tool for intercurricular teaching, this book combines art history, marine biology, and poetry that is informative and entertaining. Also included are icons placed under each picture to indicate whether the creature is thriving, threatened, endangered, critically endangered, or extinct. The art and poetry will educate children about the rich traditions of art history as well as inspire kids to learn more about

the famous artists that are honored on every page.

Playing with Sketches Whitney Sherman, 2013-12-01 DIVDrawing is the backbone of art and design; with all of the tantalizing wonders of the digital world, the best designers, illustrators and artists know that it's good to step back occasionally and hit the refresh button on your hand and mind. Playing with Sketches is a hands-on, fun approach to exploring drawing principles. Beginning with an introduction to the philosophy of learning through the process of play, this book brings you through a series of basic warm-up exercises that can be combined with later projects. Then you'll move quickly on to more challenging and engaging exercises, including word games, dimensional shapes, and inventive sketchbooks and letterforms, eventually creating a "toolkit" of ideas and skills developed through the process of play. This book features creative, adaptable ideas, and numerous examples of designers and artists responses to each exercise, giving you a peek into their way of thinking and seeing. /divDIVWith over 25 contributors, from high-profile designers, illustrators and artists to talented graduate students, you see work that will walk you step-by-step through a process or inspire by example. The book provides meaningful outcomes for your practice, including building an image archive, being exposed to new ways to use media and tools, inspiring you to break the rules, to collaborate, and much more!/div

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the

official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Partners in Play Terry Kottman, Kristin Meany-Walen, 2016-01-08 Play therapy expert Terry Kottman and her colleague Kristin Meany-Walen provide a

comprehensive update to this spirited and fun text on integrating Adlerian techniques into play therapy. Clinicians, school counselors, and students will find this to be the definitive guide for using Adlerian strategies with children to foster positive growth and effective communication with their parents and teachers. After an introduction to the basics of the approach and the concepts of Individual Psychology, the stages of Adlerian play therapy are outlined through step-by-step instructions, detailed treatment plans, an ongoing case study, and numerous vignettes. In addition to presenting up-to-date information on trends in play therapy, this latest edition emphasizes the current climate of evidence-based treatment and includes a new chapter on conducting research in play therapy. Appendixes contain useful worksheets, checklists, and resources that can be easily integrated into practice. Additional resources related to this book can be found in the ACA Online Bookstore at www.counseling.org/publications/bookstore and on Terry Kottman's website encouragementzone.com. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org.

Ecodesign Alastair Fuad-Luke, 2002-04 Alas, environmentally friendly design hasn't always meant high style. Confronting that challenge head on, ecoDesign lists well over 500 consumer products for those who seek design that's not only beautiful and useful, but also has minimal impact on the earth. Some of

these pieces-from clothing to kitchenware, electronics, furniture, and much, much more-have already become classics. But this remarkable sourcebook also guides readers to undiscovered gems and handcrafted objects from artisanal studios. Detailed illustrated entries describe the products themselves, while an extensive reference section defines these new and hybrid materials and provides information on manufacturers, design studios, green organizations, and a further reading list. ecoDesign is the total resource guide for a new generation of contemporary design.

The Baby Thief Barbara Bisantz Raymond, Barbara Raymond, 2009-04-29 For almost three decades, renowned baby-seller Georgia Tann ran a children's home in Memphis, Tennessee – selling her charges to wealthy clients nationwide, Joan Crawford among them. Part social history, part detective story, part expose, The Baby Thief is a riveting investigative narrative that explores themes that continue to reverberate today.

Louder and Faster Deborah Wong, 2019-09-10 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. **Louder and Faster** is a cultural study of the phenomenon of Asian American taiko, the thundering, athletic drumming tradition that originated in Japan. Immersed in the taiko scene for twenty years, Deborah Wong has witnessed cultural and demographic changes and the exponential growth and expansion of taiko particularly in Southern California. Through her participatory ethnographic work, she reveals a complicated story embedded in memories of Japanese

American internment and legacies of imperialism, Asian American identity and politics, a desire to be seen and heard, and the intersection of culture and global capitalism. Exploring the materialities of the drums, costumes, and bodies that make sound, analyzing the relationship of these to capitalist multiculturalism, and investigating the gender politics of taiko, Louder and Faster considers both the promises and pitfalls of music and performance as an antiracist practice. The result is a vivid glimpse of an Asian American presence that is both loud and fragile.

Enchanted Objects David Rose, 2015-04-28 We are now standing at the precipice of the next transformative development: the Internet of Things. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us, and learn to think on our behalf. David Rose calls these devices--which are just beginning to creep into the marketplace--*Enchanted Objects*. Some believe the future will look like more of the same--more smartphones, tablets, screens embedded in every conceivable surface. Rose has a different vision: technology that atomizes, combining itself with the objects that make up the very fabric of daily living. Such technology will be woven into the background of our environment, enhancing human relationships and channeling desires for omniscience, long life, and creative expression. The enchanted objects of fairy tales and science fiction will enter real life. Groundbreaking, timely,

and provocative, Enchanted Objects is a blueprint for a better future, where efficient solutions come hand in hand with technology that delights our senses.
