Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Mathematics Learning in Early Childhood National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Committee on Early Childhood Mathematics,2009-11-13 Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners-those who work directly with children and their families in shaping the policies that affect the education of young children.

A Right to Die Rex Stout,1991-04-01 When a bright young heiress with a flair for romance and one too many enemies is found brutally murdered, Nero Wolfe and his sidekick, Archie, find themselves embroiled in a case that is not as black and white as it first appears. Susan Brooke has everything going for her. Men would have killed themselves to marry her, and, in fact, one did. Susan came to New York to find love and fulfillment, and ended up dead on a tenement floor. The police say her black fiancé did it, but Wolfe has other ideas. Before he's done, he'll prove that good intentions and bad deeds often go hand in hand and that the highest ideals can sometimes have the deadliest consequences.

Challenges of Teaching with Technology Across the Curriculum Lawrence A. Tomei,2003-01-01 Teachers are looking for a text that will guide them in the selection of appropriate educational software and help them make decisions about the myriad of available Internet sites. They want to know how all this material can help their students learn better. *Challenges of Teaching With Technology Across the Curriculum: Issues and Solutions* integrates both theory and practice with assessment to make learning outcomes possible. This text will become an invaluable reference for any teacher who develops their own instructional materials or is asked to select software and Web sites for their students.

The Film Appreciation Book Jim Piper,2014-11-18 This is a book for cinephiles, pure and simple. Author and filmmaker, Jim Piper, shares his vast knowledge of film and analyzes the most striking components of the best movies ever made. From directing to cinematography, from editing and music to symbolism and plot development, *The Film Appreciation Book* covers hundreds of the greatest works in cinema, combining history, technical knowledge, and the art of enjoyment to explain why some movies have become the most treasured and entertaining works ever available to the public, and why these movies continue to amaze viewers after decades of notoriety. Read about such classic cinematic masterpieces as *Citizen Kane*, *Gandhi*, *Midnight Cowboy*, *Easy Rider*, *True Grit*, *Gone With the Wind*, and *The Wizard of Oz*, as well as more recent accomplishments in feature films, such as *Requiem for a Dream*, *Munich*, *The King's Speech*, and *The Hurt Locker*. Piper breaks down his analysis for you and points out aspects of production

that movie-lovers (even the devoted ones) would never recognize on their own. This book will endlessly fascinate, and by the time you get to the last chapter, you're ready to start all over again. In-depth analysis and thoughtful and wide-ranging film choices from every period of cinema history will ensure that you never tire of this reading companion to film. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Word Up Mark McCrindle, Emily Wolfinger, 2011 Everyone says the English language is changing in this global digital age. Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

My Life with the Green & Gold Jessie Garcia, 2013-10-09 Ever wonder what it's like to interview famous athletes and coaches? For twenty years, sportscaster Jessie Garcia has done just that. In *My Life with the Green & Gold* she brings fans to the sidelines at Lambeau Field, inside the locker room, aboard the Packers bus, and into the host's chair at The Mike McCarthy Show. A self-proclaimed "terrible athlete" born without sports in her blood, Garcia reported on Wisconsin's beloved Green Bay Packers during the Holmgren, Rhodes, Sherman, and McCarthy years. She's been a Packers sideline reporter for preseason games and covered the team during their Super Bowl showdowns against the Patriots, Broncos, and Steelers. She's traveled with the team to Tokyo and the White House and to schools and retirement homes, where the gridiron heroes interacted with their fans. She's visited the hometowns of players and coaches, she's met their proud parents and their pets, she's interviewed the team trainer about their strength exercises. *My Life with the Green & Gold* also features up-close and personal stories about other teams and athletes she's covered, from the Badgers and Brewers to Wisconsin Olympians such as Bonnie Blair and Casey FitzRandolph. Garcia's expertise is capturing behind-the-scenes, human-interest stories. In *My Life with the Green & Gold*, she shares a personal and humorous insider's look at many Wisconsin sports heroes from the perspective of a female sports journalist who has ridden the adrenaline rush to be on the air at 5:00 a.m., 10:00 p.m., and any hour in between, while also juggling the many demands of family life. Not many parents can say they've changed their child's diaper in the tunnel at Lambeau, but Jessie Garcia can.

Advances in Architectural Geometry 2016 Sigrid Adriaenssens, Fabio Gramazio, Matthias Kohler, Achim Menges, Mark Pauly, 2016-09-09 The Advances in Architectural Geometry (AAG) symposia serve as a unique forum where developments in the design, analysis and fabrication of building geometry are presented. With participation of both academics and professionals, each symposium aims to gather and present practical work and theoretical research that responds to contemporary design challenges and expands the opportunities for architectural form. The fifth edition of the AAG symposia was hosted by the National Centre for Competence in Research Digital Fabrication at ETH Zurich, Switzerland, in September 2016. This book contains the proceedings from the AAG2016 conference and offers detailed insight into current and novel geometrical developments in architecture. The 22 diverse, peer-reviewed papers present cutting-edge innovations in the fields of mathematics, computer graphics, software design, structural engineering, and the design and construction of architecture.

The Gendered Brain Gina Rippon, 2020-02-13 Barbie or Lego? Reading maps or reading emotions? Do you have a female brain or a male brain? Or is that the wrong question? On a daily basis we face deeply ingrained beliefs that our sex determines our skills and preferences, from toys and colours to career choice and salaries. But what does this mean for our thoughts, decisions and behaviour? Using the latest cutting-edge neuroscience, Gina Rippon unpacks the stereotypes that bombard us from our earliest moments and shows how these messages mould our ideas of ourselves and even shape our brains. Rigorous, timely and liberating, *The Gendered Brain* has huge repercussions for women and men, for parents and children, and

for how we identify ourselves. 'Highly accessible... Revolutionary to a glorious degree' Observer

The Girls of Murder City Douglas Perry, 2011-07-26 With a thrilling, fast-paced narrative, award-winning journalist Douglas Perry vividly captures the sensationalized circus atmosphere that gave rise to the concept of the celebrity criminal- and gave Chicago its most famous story. The Girls of Murder City recounts two scandalous, sex-fueled murder cases and how an intrepid girl reporter named Maurine Watkins turned the beautiful, media-savvy suspects-Stylish Belva and Beautiful Beulah-into the talk of the town. Fueled by rich period detail and a cast of characters who seemed destined for the stage, The Girls of Murder City is a crackling tale that simultaneously presents the freewheeling spirit of the Jazz Age and its sober repercussions.

If I Were an Astronaut Eric Braun, 2010 Discusses activities astronauts do while they're in space.

The Photo Ark Joel Sartore, 2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

Introduction to Nanoscience Stuart Lindsay, 2009-10-22 Nanoscience is not physics, chemistry, engineering or biology. It is all of them, and it is time for a text that integrates the disciplines. This is such a text, aimed at advanced undergraduates and beginning graduate students in the sciences. The consequences of smallness and quantum behaviour are well known and described Richard Feynman's visionary essay 'There's Plenty of Room at the Bottom' (which is reproduced in this book). Another, critical, but thus far neglected, aspect of nanoscience is the complexity of nanostructures. Hundreds, thousands or hundreds of thousands of atoms make up systems that are complex enough to show what is fashionably called 'emergent behaviour'. Quite new phenomena arise from rare configurations of the system. Examples are the Kramer's theory of reactions (Chapter 3), the Marcus theory of electron transfer (Chapter 8), and enzyme catalysis, molecular motors, and fluctuations in gene expression and splicing, all covered in the final Chapter on Nanobiology. The book is divided into three parts. Part I (The Basics) is a self-contained introduction to quantum mechanics, statistical mechanics and chemical kinetics, calling on no more than basic college calculus. A conceptual approach and an array of examples and conceptual problems will allow even those without the mathematical tools to grasp much of what is important. Part II (The Tools) covers microscopy, single molecule manipulation and measurement, nanofabrication and self-assembly. Part III (Applications) covers electrons in nanostructures, molecular electronics, nano-materials and nanobiology. Each chapter starts with a survey of the required basics, but ends by making contact with current research literature.

Star Wars and the History of Transmedia Storytelling Sean Guynes, Dan Hassler-Forest, 2018 Star Wars has reached more than three generations of casual and hardcore fans alike, and as a result many of the producers of franchised Star Wars texts (films, television, comics, novels, games, and more) over the past four decades have been fans-turned-creators. Yet despite its dominant cultural and industrial positions, Star Wars has rarely been the topic of sustained critical work. *Star Wars and the History of Transmedia Storytelling* offers a corrective to this oversight by curating essays from a wide range of interdisciplinary scholars in order to bring Star Wars and its transmedia narratives more fully into the fold of media and cultural studies. The collection places Star Wars at the center of those studies' projects by examining video games, novels and novelizations, comics, advertising practices, television shows, franchising models, aesthetic and economic decisions, fandom and cultural responses, and other aspects of Star Wars and its world-building in their multiple contexts of production, distribution, and reception. In emphasizing that Star Wars is both a media franchise and a transmedia storyworld, *Star Wars and the History of Transmedia Storytelling* demonstrates the ways in which transmedia storytelling and the industrial logic of media franchising have developed in concert over the past four decades, as multinational corporations have become the central means for subsidizing, profiting from, and selling modes of immersive storyworlds to global audiences. By taking this dual approach, the book focuses on the interconnected nature of corporate production, fan consumption, and transmedia world-building. As such, this collection grapples with the historical, cultural, aesthetic, and political-economic implications of the relationship between media franchising and transmedia storytelling as they are seen at work in the world's most profitable transmedia franchise.

Computer Science J. Glenn Brookshear, 2012 *Computer Science: An Overview* uses broad coverage and clear exposition to present a complete picture of the dynamic computer science field. Accessible to students from all backgrounds, Glenn Brookshear uses a language-independent context to encourage the development of a practical, realistic understanding of the field. An overview of each of the important areas of Computer Science (e.g. Networking, OS, Computer Architecture, Algorithms) provides students with a general level of proficiency for future courses. The Eleventh Edition features two new contributing authors (David Smith -- Indiana University of PA; Dennis Brylow -- Marquette University), new, modern examples, and updated coverage based on current technology.

Dark State Charles Stross,2018-01-11 Dark State is the second book in a thrilling series - set in the same world as Charles Stross' Merchant Princes series. This book follows Empire Games. The time for peace is ending . . . In the near future, one America is experiencing its first technological revolution – whilst in a parallel world, the United States is a hi-tech police state. But both timelines are poised for conflict. Miriam Burgeson’s America is heading for civil war. However, a high profile defection might avert this crisis, if only Miriam and her agents can arrange it in time. And Rita Douglas, rival US spy, arrives during this turmoil. Rita’s world is rocked when she realizes Miriam is her birth mother, changing her own mission irrevocably. Then her United States discovers yet another parallel earth, and the remains of an advanced society. Something destroyed that civilization, Rita’s people are about to rouse it – and two worlds will face the consequences.

Tools for Teaching Conceptual Understanding, Secondary Julie Stern,Krista Ferraro,Juliet Mohnkern,2017-02-02 Students become experts and innovators through Concept-Based teaching Innovators don’t invent without a deep understanding of how the world works. With this foundation, they apply conceptual understanding to solve new problems. We want our students to not only retain ideas, but relate them to other things they encounter, using each new situation to add nuance and sophistication to their thinking. To do this, they need conceptual understanding. This book serves as a road map for Concept-Based teaching. Discover how to help students uncover conceptual relationships and transfer them to new situations. Specifically, teachers will learn: Strategies for introducing conceptual learning to students Four lesson frameworks to help students uncover conceptual relationships How to assess conceptual understanding, and How to differentiate concept-based instruction Look no further. For deep learning and innovative thinking, this book is the place to start. The authors tear down the false dichotomies of traditional vs innovative education and provide a practical toolkit for developing creativity and applying knowledge through Concept-Based learning. Every practitioner needs this book to juxtapose what worked well in the 20th Century with what is essential in the 21st Century and beyond. Michael McDowell, Superintendent Ross School District, Ross, CA While most good educators recognise the incredible value of teaching conceptually, it is challenging. The authors have created accessible, practical baby steps for every teacher to use. Dr. Vincent Chan, principal Fairview International School, Kuala Lumpur, Malaysia
