**Baltimore Streetcar Memories** Kenneth C. Springirth 2017-12-11 Baltimore was the first United States city to begin regularly scheduled electric railway service in 1885. However, because of technical problems the line had to go back to horse car operation. After Frank J. Sprague developed an electric streetcar powered by an overhead wire for Richmond, Virginia; Baltimore adopted the new system and in 1893 opened the first electric line in the United States to operate on an elevated structure. By 1899, Baltimore streetcar lines, with their unique 5 foot 4.5 inch track gauge, were unified by the United Railways and Electric Company which purchased 885 semi-convertible cars with windows that could be raised up for summer operation and lowered for winter operation. Baltimore Transit Company was the third United States system to introduce modern Presidents' Conference Committee (PCC) cars and at its peak operated the eighth largest fleet of these cars. A combination of factors including a ridership decline and making many downtown streets one way contributed to conversion to an all bus system. Baltimore Streetcar Memories is a photographic essay of history of the Baltimore, Maryland streetcar system up to its closure in 1963 and the return of a modern streetcar/light rail system 29 years later in 1992.

San Francisco's Magnificent Streetcars Kenneth C. Springirth 2015 San Francisco's first cable car line opened in 1873. The successful development of the electric streetcar by Frank Sprague in 1888 plus the 1906 San Francisco earthquake resulted in the decline of the cable car system. Concerned that the cable car system would vanish, San Francisco resident Friedel Klussmann rallied public support to save the cars. The 1982 shutdown of the cable car lines for their rebuilding led to Trolley Festivals beginning in 1983 until 1987 using a variety of historic streetcars on Market Street. Those successful festivals resulted in rebuilding the streetcar track on Market Street and the establishment of the F streetcar line in 1995 using Presidents' Conference Committee streetcars purchased from Philadelphia and refurbished in a variety of paint schemes that represented cities that once had streetcar service. In addition, the line features vintage Peter Witt streetcars from Milan, Italy; a boat like streetcar from England; and other unique cars. During 2000, the F line was extended to Fisherman's wharf and has become one of the most successful streetcar lines in the United States. This book is a photographic essay of "San Francisco's Magnificent Streetcars" along with its historic cable cars and hill climbing trolley coaches.

**San Francisco Noir** Fred Lyon 2017-10-10 Following in the footsteps of classic films like The Maltese Falcon and The Lady from Shanghai, veteran photographer Fred Lyon creates images of San Francisco in high contrast with a sense of mystery. In this latest offering from the photographer of San Francisco: Portrait of a City 1940–1960, Lyon presents a darker tone, exploring the hidden corners of his native city. Images taken in the foggy night are illuminated only by neon signs, classic car headlights, apartment windows, or streetlights. Sharply dressed couples stroll out for evening shows, drivers travel down steep hills, and sailors work through the night at the old Fisherman's Wharf. Stylistically, many of the photographs are experimental the noir tone is enhanced by double exposures, elements of collage, and blurred motion. These strikingly evocative duotone images expose a view of San Francisco as only Fred Lyon could capture.

**Walkable City** Jeff Speck 2012-11-13 Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, Walkable City lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again.

Behrend Joost, using the fortune he made to start dredging the Panama Canal, built a railway in 1891 to bring people out to his "cr"me de la cr"me" subdivision next to the forest planted by Comstock Lode millionaire Adolph Sutro. After the streetcar tunnel was bored through Twin Peaks in 1918, A. S. Baldwin planned neighborhoods on Sutro's estate around Mount Davidson. With noted architects and engineers, Baldwin created "residential parks" with well-built Craftsman, art deco, English, and Spanish homes on curvilinear landscaped boulevards. These "suburbs in the city"--among them, Sunnyside, Balboa Terrace, Ingleside Terraces, Westwood Park, Westwood Highlands, Monterey Heights, Mount Davidson Manor, Sherwood Forest, and Miraloma Park--became home to thousands and a unique part of the San Francisco tapestry.

**Discrimination and Disparities** Thomas Sowell 2019-03-05 An enlarged edition of Thomas Sowell's brilliant examination of the origins of

economic disparities Economic and other outcomes differ vastly among individuals, groups, and nations. Many explanations have been offered for the differences. Some believe that those with less fortunate outcomes are victims of genetics. Others believe that those who are less fortunate are victims of the more fortunate. Discrimination and Disparities gathers a wide array of empirical evidence to challenge the idea that different economic outcomes can be explained by any one factor, be it discrimination, exploitation, or genetics. This revised and enlarged edition also analyzes the human consequences of the prevailing social vision of these disparities and the policies based on that vision--from educational disasters to widespread crime and violence.

Singin' and Swingin' and Gettin' Merry Like Christmas Maya Angelou 2009-04-21 In this third self-contained volume of her autobiography, which began with *I Know Why the Caged Bird Sings*, Maya Angelou moves into the adult world. From there, she is called to New York to join the cast of *Porgy and Bess*. Maya soon finds herself on a joyous and dramatic adventure, touring abroad through Italy, France, Greece, Yugoslavia, and Egypt with spirited cast members, and performing for large, enthusiastic audiences. The exciting experience is dampened only by Maya's nagging guilt that she has abandoned the person she loves most in life, her son, whose reentrance into her world reveals to Maya the healing power of devotion and love. Charged with Maya Angelou's remarkable sense of life and love, *Singin' and Swingin' and Gettin' Merry Like Christmas* is a unique celebration of the human condition--and an enthralling saga that has touched, inspired, and empowered readers worldwide.

**Daily Public Transit Ridership, the Inside Scoop** Peter Felton 2012-12 Picking up from where other San Francisco public transit historians left off, Peter Felton's *Daily Public Transit Ridership: The Inside Scoop* gives readers an acute internal perspective as to the routine external operations of the late 20th-early 21st Century-era San Francisco Municipal Transportation Agency (or "Muni" as it is more commonly nicknamed). Ranging from vehicular characteristics to urban development above and below ground level, Felton provides intricate details into the life and times of the "average Joe" public transit rider traveling around the City of San Francisco by bus or subway train. With a majority of the information taken strictly from a young lifetime of permanent public custom, Felton colorfully outlines the awe and wonder arising from riding this means of public service day-in-and-day-out, acknowledging realities and comparing-contrasting past, present, and future transit modalities drawn completely from personal experience and observation yet portrayed entirely on a "general basis."

An Introduction to Neural Networks Kevin Gurney 2018-10-08 Though mathematical ideas underpin the study of neural networks, the author presents the fundamentals without the full mathematical apparatus. All aspects of the field are tackled, including artificial neurons as models of their real counterparts; the geometry of network action in pattern space; gradient descent methods, including back-propagation; associative memory and Hopfield nets; and self-organization and feature maps. The traditionally difficult topic of adaptive resonance theory is clarified within a hierarchical description of its operation. The book also includes several real-world examples to provide a concrete focus. This should enhance its appeal to those involved in the design, construction and management of networks in commercial environments and who wish to improve their understanding of network simulator packages. As a comprehensive and highly accessible introduction to one of the most important topics in cognitive and computer science, this volume should interest a wide range of readers, both students and professionals, in cognitive science, psychology, computer science and electrical engineering.

New Orleans Fabulous Streetcars Kenneth C. Springirth 2014-06-19 The first street railway opened in New Orleans in 1835. Over the years various methods of powering the streetcars including horses, stream locomotives, overhead cable system, and fireless locomotives were tried. In 1893, electric streetcar operation began. At its peak in 1922, New Orleans had 225 miles of electric streetcar lines in operation. Ridership and streetcar lines declined with increased use of automobiles and the hard economic times of the Great Depression. While ridership surged during World War II, following the war the decline in transit riding continued the conversion of streetcar lines to bus operation. With the end of the Canal streetcar line in 1964, only the St. Charles streetcar line remained. In 1983, the New Orleans Regional Transit Authority acquired the public transit system. With increased public awareness of the important heritage of the St. Charles streetcar line, the first new streetcar line in 60 years in New Orleans opened on the Riverfront during 1988. Its success contributed to the restoration of streetcars on Canal Street in 2004.

This book provides a photographic essay of the New Orleans streetcar system including the new Loyola streetcar line that opened in 2013 and is part of New Orleans Fabulous Streetcars. "

Army at Home Judith Giesberg 2009-09-01 Introducing readers to women whose Civil War experiences have long been ignored, Judith Giesberg examines the lives of working-class women in the North, for whom the home front was a battlefield of its own. Black and white working-class women managed farms that had been left without a male head of household, worked in munitions factories, made uniforms, and located and cared for injured or dead soldiers. As they became more active in their new roles, they became visible as political actors, writing letters, signing petitions, moving (or refusing to move) from their homes, and confronting civilian and military officials. At the heart of the book are stories of women who fought the draft in New York and Pennsylvania, protested segregated streetcars in San Francisco and Philadelphia, and demanded a living wage in the needle trades and safer conditions at the Federal arsenals where they labored. Giesberg challenges readers to think about women and children who were caught up in the military conflict but nonetheless refused to become its collateral damage. She offers a dramatic reinterpretation of how America's Civil War reshaped the lived experience of race and gender and brought swift and lasting changes to working-class family life.

Would You Kill the Fat Man? David Edmonds 2013-10-06 A runaway train is racing toward five men who are tied to the track. Unless the train is stopped, it will inevitably kill all five men. You are standing on a footbridge looking down on the unfolding disaster. However, a fat man, a stranger, is standing next to you: if you push him off the bridge, he will topple onto the line and, although he will die, his chunky body will stop the train, saving five lives. Would you kill the fat man? The question may seem bizarre. But it's one variation of a puzzle that has baffled moral philosophers for almost half a century and that more recently has come to preoccupy neuroscientists, psychologists, and other thinkers as well. In this book, David Edmonds, coauthor of the best-selling Wittgenstein's Poker, tells the riveting story of why and how philosophers have struggled with this ethical dilemma, sometimes called the trolley problem. In the process, he provides an entertaining and informative tour through the history of moral philosophy. Most people feel it's wrong to kill the fat man. But why? After all, in taking one life you could save five. As Edmonds shows, answering the question is far more complex--and important--than it first appears. In fact, how we answer it tells us a great deal about right and wrong.

**The Death and Life of Great American Cities** Jane Jacobs 2016-07-20 Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

**I Know Why the Caged Bird Sings** Maya Angelou 2010-07-21 Here is a book as joyous and painful, as mysterious and memorable, as childhood itself. *I Know Why the Caged Bird Sings* captures the longing of lonely children, the brute insult of bigotry, and the wonder of words that can make the world right. Maya Angelou's debut memoir is a modern American classic beloved worldwide. Sent by their mother to live with their devout, self-sufficient grandmother in a small Southern town, Maya and her brother, Bailey, endure the ache of abandonment and the prejudice of the local "powhitetrash." At eight years old and back at her mother's side in St. Louis, Maya is attacked by a man many times her age—and has to live with the consequences for a lifetime. Years later, in San Francisco, Maya learns that love for herself, the kindness of others, her own strong spirit, and the ideas of great authors ("I met and fell in love with William Shakespeare") will allow her to be free instead of imprisoned. Poetic and powerful, *I Know Why the Caged Bird Sings* will touch hearts and change minds for as long as people read. "I Know Why the Caged Bird Sings liberates the reader into life simply because Maya Angelou confronts her own life with such a moving wonder, such a luminous dignity."—James Baldwin From the Paperback edition.
