Flying beyond the stall Douglas A. Joyce,2014 The X-31 Enhanced Fighter Maneuverability Demonstrator was unique among experimental aircraft. A joint effort of the United States and Germany, the X-31 was the only X-plane to be designed, manufactured, and flight tested as an international collaboration. It was also the only X-plane to support two separate test programs conducted years apart, one administered largely by NASA and the other by the U.S. Navy, as well as the first X-plane ever to perform at the Paris Air Show. Flying Beyond the Stall begins by describing the government agencies and private-sector industries involved in the X-31 program, the genesis of the supermaneuverability concept and its initial design breakthroughs, design and fabrication of two test airframes, preparation for the X-31's first flight, and the first flights of Ship #1 and Ship #2. Subsequent chapters discuss envelope expansion, handling qualities (especially at high angles of attack), and flight with vectored thrust. The book then turns to the program's move to NASA's Dryden Flight Research Center and actual flight test data. Additional tasking, such as helmet-mounted display evaluations, handling quality studies, aerodynamic parameter estimation, and a tailless study are also discussed. The book describes how, in the aftermath of a disastrous accident with Ship #1 in 1995, Ship #2 was prepared for its outstanding participation in the Paris Air Show. The aircraft was then shipped back to Edwards AFB and put into storage until the late 1990s, when it was refurbished for participation in the U. S. Navy's VECTOR program. The book ends with a comprehensive discussion of lessons learned and includes an Appendix containing detailed information.

The Chinese Air Force Richard P. Hallion,Roger Cliff,Phillip C. Saunders,Center for the Study of Chinese Military Affairs (National Defense University),2012-10-03 Presents revised and edited papers from a October 2010 conference held in Taipei on the Chinese Air Force. The conference was jointly organized by Taiwan's Council for Advanced Policy Studies, the Carnegie Endowment for International Peace, the U.S. National Defense University, and the RAND Corporation. This books offers a complete picture of where the Chinese air force is today, where it has come from, and most importantly, where it is headed.

Technology and Nationalism Marco Adria,2010-01-28 Revisiting Marshall McLuhan's work on the ways that technologies influence societies, Adria reconsiders the effects technologies have had on Canadian regionalism and nationalism. Offering key insights into media history, the author outlines the influence that newspapers, radio, and television have had in forming a mindset ready to welcome the internet age. As the digital revolution continues to shape the world into a global village, Technology and Nationalism provides a detailed and overdue reflection on the influence of technology on the social and political bonds we form and inhabit.

Shaking the Heavens and Splitting the Earth Roger Cliff,2011 Less than a decade ago, China's air force was an antiquated service equipped almost exclusively with weapons based on 1950s-era Soviet designs and operated by personnel with questionable training according to outdated employment concepts. Today, the People's Liberation Army Air Force (PLAAF) appears to be on its way to becoming a modern, highly capable air force for the 21st century. This monograph analyzes publications of the Chinese military, previously published Western analyses of China's air force, and information available in published sources about current and future capabilities of the PLAAF. It describes the concepts for employing forces that the PLAAF is likely to implement in the future, analyzes how those concepts might be realized in a conflict over Taiwan, assesses the implications of China implementing these concepts, and provides recommendations about actions that should be taken in response.

Russia's Military Modernisation: An Assessment The International Institute for Strategic Studies (IISS),2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow's armed forces and military capabilities. It analyses the aspirations underpinning Russia's military reform programme and its successes as well as its failures. The book also provides insights into Russia's operational use of its armed forces, including in the intervention in Syria, the goals and results of recent state armament programmes, and the trajectory of future developments. This full-colour volume includes more than 50 graphics, maps and charts and over 70 images, and contains chapters on: Russia's armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia's approach to military decision-making and joint operations Economics and industry At a time when Russia's relations with many of its neighbours are increasingly strained, and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state, capabilities and future of Russia's armed forces.

Buy, Build, Or Steal Phillip Charles Saunders,Joshua K. Wiseman,2011 This study identifies potential aviation technology development and procurement strategies, presents a general model of the options available to developing countries, and applies that model to explain Chinese procurement and aviation technology acquisition efforts over the last 60 years. The model articulates three main technology procurement avenues: purchase (buy), indigenous development (build), and espionage (steal), and three subavenues: reverse engineering (combining buy/steal and build), coproduction (combining buy and build), and codevelopment (combining buy and build, with an emphasis on build). It examines the costs, benefits, and tradeoffs inherent in each approach. Four variables influence decisions about the mix of strategies: (1) a country's overall level of economic development, in particular the state of its technical/industrial base; (2) the technological capacity of a country's military aviation sector; (3) the willingness of foreign countries to sell advanced military aircraft, key components, armaments, and related production technology; and (4) the country's bargaining power vis-avis potential suppliers.

Putin's Russia: Economy, Defence And Foreign Policy Steven Rosefielde,2020-08-27 This volume seeks to fill the vacuum created by the Joint Economic Committee of Congress's decision to cease publishing comprehensive assessments of Russia's performance and potential. It provides readers with authoritative descriptions of Russia's economy, military prowess and international ambitions. The volume does not settle controversies, but does provide readers with an objective basis for assessing Russia's prospects without the distortions caused by fake news and disinformation wars.

Hybrid Warfare in the Baltics Andrew Radin,2017 This report considers the various possible forms of hybrid aggression in the Baltics and concludes that the major vulnerability of the Baltics is to conventional aggression.

Assessing the Collective Security Treaty Organization Richard Weitz,Strategic Studies Institute,2018-10-18 Russia has strengthened its military position in Central Asia and the South Caucasus through a combination of bilateral and multilateral initiatives. The Collective Security Treaty Organization (CSTO) has become the most important multilateral defense structure in the former Soviet Union and is an essential instrument in Russia's resurgence. The CSTO has expanded its missions, authorities, and capabilities. However, it faces both internal and external

challenges, especially debilitating divisions among its members.

Indian Ocean Rising David Michel, Henry L. Stimson Center, Rupert Herbert-Burns, Caitlyn Antrim, Halae Fuller, Lindsay Dolan, 2012-07-16 The Indian Ocean is rapidly emerging as a key focus of international politics. Its strategic energy reserves and natural resources, the growing importance of its ports and shipping lanes, and the rise of India, Indonesia, South Africa, and other littoral nations as increasingly significant regional powers and global players are transforming the Indian Ocean into a major crossroads for multiple security, maritime policy, and governance issues. Rising flows of trade, investment, people, and ideas are linking the Indian Ocean countries to each other and to the rest of the world ever more closely. At the same time, enduring problems ranging from piracy on the high seas to weak and failing states on shore -- as well as territorial disputes in the regional seas and mounting environmental pressures on coastal and marine resources -- pose persistent challenges for maritime policymakers around the Indian Ocean region. This report explores the evolving security, socio-economic, commercial, and environmental trends that will shape the Indian Ocean region in the coming decades and examines their implications for decision-makers and stakeholders. The authors analyze issues including piracy, trafficking, and terrorism; the deployment of naval power; the commercial shipping industry; the future of the Law of the Sea; regional and offshore energy development; natural resources management; and rising stresses on the marine environment.

The Know-It-All's Guide to Life John T. Walbaum, 2003 These topics and many more are illuminated with wit and brevity. You'll get useful advice about a myriad of subjects including: personal finance, health, sports, travel, automobiles, careers, and food. And the information is not hidden behind a lot of jargon or filler material. With just a few pages devoted to each area of discussion, you will learn things like how to negotiate with a contractor, try your own court case, join Mensa, become a movie star, get a patent, avoid being hit by lightning, run a democracy...even save the Earth. And that's just a small sample of topics -- from the glorious to the goofy -- covered within. Book jacket.

The English Electric Lightning Martin W. Bowman, 2018-01-30 A photo-packed history of this Cold War-era supersonic fighter aircraft. The early 1950s were a boom time for British aviation. The lessons of six years of war had been learned, and much of the research into jet engines, radar, and aerodynamics had begun to reach fruition. In Britain, jet engine technology led the world while wartime developments into swept-wing design in Germany and their transonic research program were used to give western design teams a quantum leap in aircraft technology. The English Electric Lightning emerged at this time. This supersonic fighter aircraft of the Cold War era is perhaps best remembered for its amazing takeoff performance, its exceptional rate of climb, and its immense speed. Here, Martin Bowman takes us on a photographic journey, illustrating the various landmarks of the Lightning's impressive operational history.

The Contested Commons Pranab Bardhan, Isha Ray, 2008-02-11 The Contested Commons explores the theme of common environmental resources from the dual perspectives of economics and anthropology, with a focus on developing countries. Contributed readings written by senior scholars in the fields of Economics, Anthropology, and Sociology Looks at the challenges of interdisciplinary work in the social sciences, illustrating the variation in approaches/methodology Focuses on economic security, ecological sustainability, identity formation, and participatory decision-making, particularly in the developing world

Arms Trade and Economic Development Jurgen Brauer, Paul Dunne, 2004-08-02 With the US invasion of Iraq, the issue of arms trading is once again at the forefront of world events. Arms-importing countries often ask their suppliers to 'offset' the cost by reinvesting some of the money in their country.

Historical Dictionary of Air Intelligence Glenmore S. Trenear-Harvey, 2009-04-13 From the moment man learned how to ascend off the ground, the strategic significance of air intelligence became apparent. This relatively new discipline_the first dedicated air reconnaissance missions were undertaken in 1870 during the siege of Paris when tethered French balloons were employed to spot enemy positions and direct artillery fire onto them_has developed at an astonishing speed. Over the past century air intelligence has moved from hazardous observation balloons to micro-circuitry, which can send pictures from a video camera mounted on a remotely-controlled vehicle the size of a hummingbird. The Historical Dictionary of Air Intelligence relates the evolving history of the rapidly advancing field of air intelligence. A chronology, an introductory essay, and cross-referenced dictionary entries on the agencies, agents, operations, equipment, tradecraft, and jargon of air intelligence make this reference as essential as it is fascinating.

New Opportunities and Challenges for Taiwan's Security Roger Cliff, Phillip C. Saunders, Scott Harold, 2011-03-30 On November 7, 2009, the conference Cross-Strait Relations: New Opportunities and Challenges for Taiwan's Security brought together leading experts on political and military issues from both the United States and Taiwan to consider how a range of political, economic, and military factors are likely to shape Taiwan's security over the coming decade. The panelists' papers, included in these proceedings, represent a variety of views and analyses.
