Russia's Chechen Wars 1994-2000 Olga Oliker, 2001-09-28 An examination of the difficulties faced by the Russian military in planning and carrying out urban operations in Chechnya. Russian and rebel military forces fought to control the Chechen city of Grozny in the winters of 1994-1995 and 1999-2000, as well as clashing in smaller towns and villages. The author examines both Russian and rebel tactics and operations in those battles, focusing on how and why the combatants' approaches changed over time. The study concludes that while the Russian military was able to significantly improve its ability to carry out a number of key tasks in the five-year interval between the wars, other important missions--particularly in the urban realm--were ignored, largely in the belief that the urban mission could be avoided. This conscious decision not to prepare for a most stressful battlefield met with devastating results, a lesson the United States would be well served to study.

Russia's Military Modernisation: An Assessment The International Institute for Strategic Studies (IISS), 2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow's armed forces and military capabilities. It analyses the aspirations underpinning Russia's military reform programme and its successes as well as its failures. The book also provides insights into Russia's operational use of its armed forces, including in the intervention in Syria, the goals and results of recent state armament programmes, and the trajectory of future developments. This full-colour volume includes more than 50 graphics, maps and charts and over 70 images, and contains chapters on: Russia's armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia's approach to military decision-making and joint operations Economics and industry At a time when Russia's relations with many of its neighbours are increasingly strained, and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state, capabilities and future of Russia's armed forces.

The Modern Russian Army 1992-2016 Mark Galeotti, 2017-02-23 A full and authoritative illustrated history of Russia's army since the fall of the Soviet Union in 1991, including Air Assault and Navy ground forces. Since the collapse of the Soviet Union, Russia's army has undergone a turbulent transformation, from the scattered leftovers of the old Soviet military, through a period of shocking decay and demoralization, to the disciplined force and sophisticated 'hybrid war' doctrine that enabled Vladimir Putin to seize Crimea virtually overnight in 2014. Using rare photographs and full colour images of the army in action, profiles of army leaders and defence ministers, as well as orders of battle and details of their equipment and dress, this is a vivid account of the army's troubled history and of its character, capabilities and status. Written by an internationally respected author with remarkable access to Russian-language sources and Russian veterans, this study is essential reading for anyone wishing to understand the growing power of Russia's military.

The Tanks of August Ruslan Pukhov, 2010 The publication of this book coincides with the second anniversary of the armed conflict between Russia and Georgia on August 8-12, 2008, now dubbed the Five Day War. The conflict was triggered by Georgia's ambitious and nationalistic president, Mikhail Saakashvili, who attempted a blitzkrieg to conquer the former Georgian autonomy of South Ossetia, which had proclaimed independence. That attempt led to a military intervention by Russia, which acted as the guarantor of peace in the region, and the first official war between Russia and one of the former Soviet republics. This work contains six essays, from a primarily Russian perspective, which provide an in-depth analysis of the political, social, economic, and military context for and causes of the war, the nature of wartime military operations, the human and material costs of the brief struggle, and the war's likely implications for the future.

Raising Red Flags N.R. Jenzen-Jones, Jonathan Ferguson, 2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication.

The Transformation of the Armed Forces Michele Nones, Alessandro Marrone, 2012 Information technology (IT) has had, and will continue to have, a deep impact on the defence sector. The most advanced countries, not only the U.S. but also France, Great Britain and Italy, over the past few years have undergone a transformation of their armed forces aimed at exploiting the strategic advantages of IT. The goal pursued in Europe, and also promoted by NATO, is Network Enabled Capability (NEC). That is combining equipment and soldiers, as well as different doctrinal, procedural, technical and organizational elements, into a single network to obtain their interaction in order to achieve substantial strategic superiority. In practice, this also occurs with a strong, efficient and secure telecommunications network, and through netcentric modernization of armed forces' capability and systems aimed at connecting them to the net. This research paper analyzes the military netcentric modernization and transformation programs - still in progress - in France, Britain and Italy, with special focus on the joint program led by the Italian army called Forza NEC. Opportunities and challenges of Forza NEC have been considered according to the Italian armed force's requirements, developed during two decades of experience in international military operations, as well as in the light of the evolution of strategic doctrine at a European and transatlantic level. Particular attention has been devoted to the interaction between industry and the armed forces, and to the involvement of many Italian companies in different Forza NEC activities, as it represents one of the pillars of the procurement program.

Chemical and Bioprocess Engineering Ricardo Simpson, Sudhir K. Sastry, 2013-12-04 The goal of this textbook is to provide first-year engineering students with a firm grounding in the fundamentals of chemical and bioprocess engineering. However, instead of being a general overview of the two topics, Fundamentals of Chemical and Bioprocess Engineering will identify and focus on specific areas in which attaining a solid competency is desired. This strategy is the direct result of studies showing that broad-based courses at the freshman level often leave students grappling with a lot of material, which results in a low rate of retention. Specifically, strong emphasis will be placed on the topic of material balances, with the intent that students exiting a course based upon this textbook will be significantly higher on Bloom's Taxonomy (knowledge, comprehension, application, analysis and synthesis, evaluation, creation) relating to material balances. In addition, this book also

provides students with a highly developed ability to analyze problems from the material balances perspective, which leaves them with important skills for the future. The textbook consists of numerous exercises and their solutions. Problems are classified by their level of difficulty. Each chapter has references and selected web pages to vividly illustrate each example. In addition, to engage students and increase their comprehension and rate of retention, many examples involve real-world situations.

Steel Victory Harry Yeide,2003 Using the words of the tank soldiers themselves, and the radio logs of their real-time communications, Harry Yeide vividly brings back all the men and machines of this crucial method of combat - one that, in the end, may have won the war. Here are startling revelations of the treacherous fighting, and the challenges and dangers of battling a better-equipped enemy in outmoded, slow-moving death traps. Steel Victory recounts how tank planning, expertise, and accuracy grew as the war roared on - and reveals the inside story of how tank battalions turned the tide in the Battle of the Bulge and other major encounters of the European war. Here is an honest, painstakingly researched history of these man-driven vehicles that, in the words of one soldier, saved the day, shot the hell out of the Germans, and had the hell shot out of them.--BOOK JACKET.

Commanding the Red Army's Sherman Tanks Dmitri? Fedorovich Loza,1996-01-01 Hero of the Soviet Union Dmitriy Loza has carefully crafted his World War II experiences with U.S.-provided Sherman tanks into a highly readable memoir. Between the fall of 1943 and August 1945, Loza fought in the Ukraine, Romania, Hungary, Czechoslovakia, and Austria. He commanded a tank battalion during much of this period and had three Shermans shot out from under him. Loza's unit participated in such well-known combat actions as the Korsun-Shevchenkovskiy Operation, the Jassy-Kishenev Operation, and the battles for Budapest, Vienna, and Prague. Following the German surrender, Loza's unit was sent to Mongolia, where it participated in the arduous trek across the Gobi Desert to attack the Japanese Kwantung Army in Manchuria. This is the first available detailed examination of the Red Army's exploitation of U.S. war materiel during World War II and one of the first genuine memoirs available from the Russian front. Loza also provides firsthand testimony on tactical command decisions, group objectives and how they were accomplished, and Soviet use of combat equipment and intelligence. Only after the collapse of the USSR and concomitant relaxing of prohibitions against publication of materials related to the Lend-Lease Program there could this account be made available Dmitriy Loza served as an instructor at the Frunze Academy after the war, retiring in 1967 with the rank of colonel. He resides in Moscow. James F. Gebhardt, now a defense contractor at Fort Leavenworth, is a Vietnam veteran. He is the author of Blood on the Shores: Soviet Naval Commandos in World War II.

The Other Side of Time Brendan Phibbs,1989-02-01 The author recounts his experiences as a surgeon during World War II, from November of 1944 during the fighting for Alsace-Lorraine to the end of the War, when the men of his unit were among the first into Dachau

Development and Disaster Management Amita Singh,Milap Punia,Nivedita P. Haran,Thiyam Bharat Singh,2018-06-15 This book highlights the relationship between disasters and development through a socio-cultural study of human geography and governance institutions. It studies the cause, context and consequences of disasters in one of the most fragile Himalayan regions in India. The book establishes the fact that disaster management is built within the framework of good governance, without which it has no meaning. For lack of effective and responsive governance, development has lagged behind and even though the frequency of disasters has been increasing, little is being done to redesign developmental frameworks to prevent ensuing losses. Besides, the near absence of governmental support during recurrent disasters, communities have cumulatively become reservoirs of innovations to cope up with disasters. The resilience plans need not follow implanted models but may be cost effective only if they apply a bottom up approach. Just as the region is culturally diverse so are the challenges encountered by local communities in terms of generating resilience to every disaster. Despite more than a decade of the Disaster Management Act (DMA) of 2005, most of the states in this northeastern fringe of India continue to wait for its implementation beyond mere structures and offices. The book suggests that urgent action is required in accordance with the DMA 2005 towards inter-agency coordination, proactive participation of local governance, mobilization of Community based Organizations (CBOs) and curriculum based training in every academic and technical institution. Governments of these northeastern states of India should establish accountability of State Disaster Management Authorities and inspire them to participate proactively with communities for an effective resilience building in the region.

Panzer III Michael Hayton,Dick Taylor,2017-02-15 When Hitler unleashed Operation Barbarossa against the Soviet Union in June 1941, the 23-tonne Panzer III was in the vanguard of the German assault. The German Panzer III tank (official designation Panzerkampfwagen III, Sd Kfz 141, abbreviated to PzKpfw III) saw widespread use during the Second World War campaigns in Poland, France, the Soviet Union and the Balkans, and in North Africa with the famous Afrika Korps. A small number were still in use in Normandy (1944), at Anzio (1943), in Norway and Finland and in Operation Market Garden (1944). Some 5,774 were built between 1937 and 1943. Although the Panzer III was conceived to operate alongside the infantry-supporting Panzer IV to fight other tanks and armoured fighting vehicles, the roles were reversed when the German Army came up against the formidable Soviet T-34 tank. A tank with a more powerful anti-tank gun was needed so the Panzer IV with its larger turret ring and long-barrelled 7.5cm KwK 40 gun was used in tank-versus-tank battles, with the Panzer III being redeployed in the infantry support role. Production of the Panzer III ended in 1943, although its dependable chassis provided hulls for the Sturmgeschutz III (StuG III) assault gun, one of the most successful of the war, until the end of the war. Centrepiece of the Haynes Panzer III Tank Manual is the Bovington Tank Museum's PzKpfw III Ausf L, which has been restored to running condition. This tank belonged to the same battalion as the museum's famous Tiger I (the 501st (Heavy) Panzer Abteilung) and is an early production Ausf L, modified for tropical service.

It was shipped via Naples to Benghazi in Libya in July 1942 and was issued to the 8th Panzer Regiment, part of the 15th Panzer Division and probably fought in the Battle of Alam Halfa. It was subsequently captured by the British Army and shipped to the UK.The Tank Museum has restored the tank to running order, has repainted it in its original camouflage and markings and is currently replacing many of the ancillary tools and equipment that it carried.

Russia and the Successor States ,2006

The Russian Military in Contemporary Perspective United States Army War College,2023-11-11 Wherever one looks, Russia is carrying out aggressive military and informational attacks against the West in Europe, North and South America, the Arctic, and the Middle East. This war against the West actually began over a decade ago, but its most jarring and shocking event, the one that started to focus Western minds on Russia, was the invasion of Ukraine in 2014. Given this pattern, the National Security Council (NSC) in 2014 invited Stephen Blank to organize a conference on the Russian military. We were able to launch the conference in 2016 and bring together a distinguished international group of experts on the Russian military to produce the papers that were then subsequently updated for presentation here. The results presented here are sobering, to say the least. Ray Finch and Aleksandr Golts highlight the domestic program of military mobilization of Russian society that began before 2014 and has only intensified since then. It aims to engender a positive, heroic image for the military and the idea that Russia is under siege from the West. This campaign has also gone hand in hand with signs of greatly enhanced defense spending, although there have been cuts in 2017-2018 due to sanctions. However, despite the fact that Paul Schwartz rightly points out that Russia's science and technology sectors are wounded and suffer from excessive militarization, he and Steven Rosefielde undermine the complacent and excessively comfortable notion that Russian economic weakness which is real-will lead to the collapse of the system or its retreat from its current posture.

Dirty Little Secrets of World War II James F. Dunnigan,1996-03-14 Dirty Little Secrets of World War II exposes the dark, irreverent, misunderstood, and often tragicomic aspects of military operations during World War II, many of them virtually unknown even to military buffs. Like its successful predecessor, Dirty Little Secrets, Dunnigan and Nofi's new book vividly brings to life all theaters and participants of the war. Revelations include: - The real death count for the war, and why it has never been previously released. - The new age general who refused to smoke or drink, who lived on a vitamin-enriched diet, who opposed animal experimentation, and who regularly consulted his astrologer. - How equipment developed for the war led to such modern high-tech innovations as smart bombs, electronic warfare, and nuclear missiles. - The lackadaisical relationship between Germany and Japan throughout the war. - Tricky bits of information about the lingering effects of the war -- like the thousands of live shells and mines that are still buried in Europe and off the East Coast of America.
