Encyclopedia of Junk Food and Fast Food Andrew F. Smith,2006-08-30 Eating junk food and fast food is a great all-American passion. American kids and grownups love their candy bars, Big Macs and supersized fries, Doritos, Twinkies, and Good Humor ice cream bars. The disastrous health effects from the enormous appetite for these processed fat- and sugar-loaded foods are well publicized now. This was particularly dramatically evidenced by Super Size Me (2004), filmmaker Morgan Spurlock's 30-day all-McDonald's diet in which his liver suffered the same poisoning as if he had been on an extended alcohol binge. Through increased globalization, American popular food culture is being increasingly emulated elsewhere in the world, such as China, with the potential for similar disastrous consequences. This A-to-Z reference is the first to focus on the junk food and fast food phenomena from a multitude of angles in addition to health and diet concerns. More than 250 essay entries objectively explore the scope of the topics to illuminate the American way through products, corporations and entrepreneurs, social history, popular culture, organizations, issues, politics, commercialism and consumerism, and much more. Interest in these topics is high. This informative and fascinating work, with entries on current controversies such as mad cow disease and factory farming, the food pyramid, movie tie-ins, and marketing to children, will be highly useful for reports, research, and browsing. It takes readers behind the scenes, examining the significance of such things as uniforms, training, packaging, and franchising. Readers of every age will also enjoy the nostalgia factor, learning about the background of iconic drive-ins, the story behind the mascots, facts about their favorite candy bar, and collectables. Each entry ends with suggested reading. Besides an introduction, a timeline, glossary, bibliography, resource guide, and photos enhance the text. Sample entries: A&W Root Beer; Advertising; Automobiles; Ben & Jerry's; Burger King; Carhops; Center for Science in the Public Interest; Christmas; Cola Wars; Employment; Fair Food; Fast Food Nation; Hershey, Milton; Hollywood; Injury; Krispy Kreme; Lobbying; Nabisco; Obesity; PepsiCo; Salt; Soda Fountain; Teen Hangouts; Vegetarianism; White Castle; Yum! Brands, Inc.

Data Monitoring in Clinical Trials David L. DeMets,Curt D. Furberg,Lawrence M. Friedman,2006-06-22 From the authors of Fundamentals of Clinical Trials which has sold over 15,000 copies world wide since its publication in 1998. No competition yet as the text does not focus on how to do clinical trials but on very specific situations that can be encountered during the process.

Science Policy Under Thatcher Jon Agar,2019-06-03 Margaret Thatcher was prime minister from 1979 to 1990, during which time her Conservative administration transformed the political landscape of Britain. Science Policy under Thatcher is the first book to examine systematically the interplay of science and government under her leadership. Thatcher was a working scientist before she became a professional politician, and she maintained a close watch on science matters as prime minister. Scientific knowledge and advice were important to many urgent issues of the 1980s, from late Cold War questions of defence to emerging environmental problems such as acid rain and climate change. Drawing on newly released primary sources, Jon Agar explores how Thatcher worked with and occasionally against the structures of scientific advice, as the scientific aspects of such issues were balanced or conflicted with other demands and values. To what extent, for example, was the freedom of the individual scientist to choose research projects balanced against the desire to secure more commercial applications? What was Thatcher's stance towards European scientific collaboration and commitments? How did cuts in public expenditure affect the publicly funded research and teaching of universities? In weaving together numerous topics, including AIDS and bioethics, the nuclear industry and strategic defence, Agar adds to the picture we have of Thatcher and her radically Conservative agenda, and argues that the science policy devised under her leadership, not least in relation to industrial strategy, had a prolonged influence on the culture of British science.

Future U.S. Workforce for Geospatial Intelligence National Research Council,Policy and Global Affairs,Board on Higher Education and Workforce,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Committee on the Future U.S. Workforce for Geospatial Intelligence,2013-04-28 We live in a changing world with multiple and evolving threats to national security, including terrorism, asymmetrical warfare (conflicts between agents with different military powers or tactics), and social unrest. Visually depicting and assessing these threats using imagery and other geographically-referenced information is the mission of the National Geospatial-Intelligence Agency (NGA). As the nature of the threat evolves, so do the tools, knowledge, and skills needed to respond. The challenge for NGA is to maintain a workforce that can deal with evolving threats to national security, ongoing scientific and technological advances, and changing skills and expectations of workers. Future U.S. Workforce for Geospatial Intelligence assesses the supply of expertise in 10 geospatial intelligence (GEOINT) fields, including 5 traditional areas (geodesy and geophysics, photogrammetry, remote sensing, cartographic science, and geographic information systems and geospatial analysis) and 5 emerging areas that could improve geospatial intelligence (GEOINT fusion, crowdsourcing, human geography, visual analytics, and forecasting). The report also identifies gaps in expertise relative to NGA's needs and suggests ways to ensure an adequate supply of geospatial intelligence expertise over the next 20 years.

Shining a Light Lisa French,Mark Poole,2009-01-01 Shining a Light: 50 Years of the Australian Film Institute, traces the progress of the film and television industries in Australia - as well as screen culture within Australia over the past half century - through the lens of one key organisation, the Australian Film Institute (AFI). Shining a Light offers a timely and significant contribution to scholarship on Australian cinema, published at a critical time in Australian film history.The authors, Lisa French and Mark Poole, offer an insider's view through 27 interviews with key players on the local scene.The book also includes a listing of every AFI Award that has been given since 1958, including the nominees and winners of each award category. This is the first time that such an exhaustive list of AFI nominees and winners has been published.

Qualitative Methods In Psychology: A Research Guide Banister, Peter,Bunn, Geoff,Burman, Erica,2011-10-01 This book provides an introduction to four widely used qualitative research methods, followed by a detailed discussion of a pluralistic approach to qualitative research...makes excellent use of questions both in order to help the reader gain clarity as well as to encourage reflexivityThe Psychologist, May 2012

Aggressive Driving Enforcement Jack Stuster,2004

Queer Masculinities John Landreau,Nelson Rodriguez,2011-09-28 Queer Masculinities: A Critical Reader in Education is a substantial addition to the discussion of queer masculinities, of the interplay between queer masculinities and education, and to the political gender discourse as a whole. Enriching the discourse of masculinity politics, the cross-section of scholarly interrogations of the complexities and contradictions of queer masculinities in education demonstrates that any serious study of masculinity—hegemonic or otherwise—must consider the theoretical and political contributions that the concept of queer masculinity makes to a more comprehensive and nuanced understanding of masculinity itself. The essays adopt a range of approaches from empirical studies to reflective theorizing, and address themselves to three separate educational realms: the K-12 level, the collegiate level, and the level in popular culture, which could be called ‘cultural pedagogy’. The wealth of detailed analysis includes, for example, the notion that normative expectations and projections on the part of teachers and administrators unnecessarily reinforce the values and

behaviors of heteronormative masculinity, creating an institutionalized loop that disciplines masculinity. At the same time, and for this very reason, schools represent an opportunity to ‘provide a setting where a broader menu can be introduced and gender/sexual meanings, expressions, and experiences boys encounter can create new possibilities of what it can mean to be male’. At the collegiate level chapters include analysis of what the authors call ‘homosexualization of heterosexual men’ on the university dance floor, while the chapters of the third section, on popular culture, include a fascinating analysis of the construction of queer ‘counternarratives’ that can be constructed watching TV shows of apparently hegemonic bent. In all, this volume’s breadth and detail make it a landmark publication in the study of queer masculinities, and thus in critical masculinity studies as a whole.

Empire’s Labor Adam Moore,2019-11-15 In a dramatic unveiling of the little-known world of contracted military logistics, Adam Moore examines the lives of the global army of laborers who support US overseas wars. Empire's Labor brings us the experience of the hundreds of thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa. He highlights the changes the US military has undergone since the Vietnam War, when the ratio of contractors to uniformed personnel was roughly 1:6. In Afghanistan it has been as high as 4:1. This growth in logistics contracting represents a fundamental change in how the US fights wars, with the military now dependent on a huge pool of contractors recruited from around the world. It also, Moore demonstrates, has social, economic, and political implications that extend well beyond the battlefields. Focusing on workers from the Philippines and Bosnia, two major sources of third country national (TCN) military labor, Moore explains the rise of large-scale logistics outsourcing since the end of the Cold War; describes the networks, infrastructures, and practices that span the spaces through which people, information, and goods circulate; and reveals the experiences of foreign workers, from the hidden dynamics of labor activism on bases, to the economic and social impacts these jobs have on their families and the communities they hail from. Through his extensive fieldwork and interviews, Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military. Thanks to generous funding from UCLA and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

Governance of Arctic Shipping Aldo Chircop,Floris Goerlandt,Claudio Aporta,Ronald Pelot,2020-08-11 This open access book is a result of the Dalhousie-led research project Safe Navigation and Environment Protection, supported by a grant from the Ocean Frontier Institute’s the Canada First Research Excellent Fund (CFREF). The book focuses on Arctic shipping and investigates how ocean change and anthropogenic impacts affect our understanding of risk, policy, management and regulation for safe navigation, environment protection, conflict management between ocean uses, and protection of Indigenous peoples’ interests. A rapidly changing Arctic as a result of climate change and ice loss is rendering the North more accessible, providing new opportunities while producing impacts on the Arctic. The book explores ideas for enhanced governance of Arctic shipping through risk-based planning, marine spatial planning and scaling up shipping standards for safety, environment protection and public health.

The Enchanted Castle Edith Nesbit,1908

The House of Arden E. Nesbit,2020-12-15T21:45:06Z Edith Nesbit was a popular children’s author of the late Victorian and early Edwardian eras in Britain. Though she was writing more than a century ago, her books nevertheless remain popular and are generally still in print. The House of Arden was published in 1908. Like her other, perhaps better known tales, such as Five Children and It, the story takes quite ordinary children of the time and plunges them into fantastical adventures. In this book, two children, with the interesting Saxon names of Edred and Elfrida, aged 10 and 12 respectively, discover that due to the death of a distant relative, young Edred is now Lord of Arden. The estate consists of not much more than a little money, a crumbling castle, and an attached house. An old retainer tells them of a legend regarding the Lord of Arden and a buried treasure. Naturally they are eager to locate the treasure, which may help them restore the castle. They discover a way to summon up the mascot of the House, a white mole or “mouldiwarp,” who enables them to travel back through time in search of the treasure. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Critical Thinking in Human Resource Development Carole Elliott,Sharon Turnbull,2004-08-02 This book provides a reflexive critique of the assumptions of orthodox HRD research and practice and questions the conception of humans as resources, as well as the conventional performative focus of HRD. Examining the broader social, political and economic contexts, the book offers alternative perspectives for considering both the needs of individuals and the sustainable development of organizations in post-industrial economies.

Culture and Reflexivity in Systemic Psychotherapy Inga-Britt Krause,2018-03-21 The therapeutic relationship is increasingly becoming a central topic in systemic psychotherapy and cross-cultural thinking. Here, experienced systemic psychotherapists offer their reflections and thoughts on the issues of race, culture, and ethnicity in the therapeutic relationship. The aim is to develop this area of systemic practice, to place culture squarely at the centre of all systemic psychotherapy practice as a model for all psychotherapy practice, to encourage both trainees and experienced systemic psychotherapists to pay attention to race, culture, and ethnicity as central issues in their own and their clients' identities, and to inform researchers who use qualitative research techniques such as ethnography. This book moves the issues of culture, race and equity into the centre of psychotherapeutic practice, including that which involves therapeutic encounters across culture, racial and ethnic divides. It develops an approach to cultural transference and demonstrates that thinking about culture, race and ethnicity does not belong at the margin.
