Writing About Literature in the Digital Age Gideon Omer

Burton, 2023-02-27 This Book is intended for all those who value literary studies and who sense the coming change in how books are read, discussed, and written about in the digital age. It is a collaborative project, produced by students of an advanced writing course at Brigham Young University taught by Gideon Burton in May and June of 2011. It is an experiment in Book creation and in twenty-first century literary criticism. Our adventure into digital literary study has been sudden and frenetic, and the ragged edges are likely to show. But we have pressed on, pushing bravely back against second thoughts, intent to launch our little volume into the marketplace of ideas where it may reach real people who are wrestling with the powerful disruptions to reading and writing now in play. A good book, can wake us like a blow to the head. So can a vigorous literary experiment. We feel a bit battered, but far more awake to the present moment and to the ongoing vitality of Excerpt From: Gideon Omer Burton. Writing About Literature in the Digital Age.

The End of the World Maria Manuel Lisboa, 2011 Our fear of the world ending, like our fear of the dark, is ancient, deep-seated and perennial. It crosses boundaries of space and time, recurs in all human communities and finds expression in every aspect of cultural production - from pre-historic cave paintings to high-tech computer games. This volume examines historical and imaginary scenarios of apocalypse, the depiction of its likely triggers, and imagined landscapes in the aftermath of global destruction. Its discussion moves effortlessly from classic novels including Aldous Huxley's *Brave New World*, George Orwell's *Nineteen Eighty-Four* and Margaret Atwood's *Oryx and Crake*, to blockbuster films such as *Blade Runner*, *Armageddon* and *Invasion of the Body Snatchers*. Lisboa also takes into account religious doctrine, scientific research and the visual arts to create a penetrating, multi-disciplinary study that provides profound insight into one of

Western culture's most fascinating and enduring preoccupations.

Impractical Python Projects Lee Vaughan,2018-11-27

Impractical Python Projects is a collection of fun and educational projects designed to entertain programmers while enhancing their Python skills. It picks up where the complete beginner books leave off, expanding on existing concepts and introducing new tools that you'll use every day. And to keep things interesting, each project includes a zany twist featuring historical incidents, pop culture references, and literary allusions. You'll flex your problem-solving skills and employ Python's many useful libraries to do things like: - Help James Bond crack a high-tech safe with a hill-climbing algorithm - Write haiku poems using Markov Chain Analysis - Use genetic algorithms to breed a race of gigantic rats - Crack the world's most successful military cipher using cryptanalysis - Derive the anagram, I am Lord Voldemort using linguistical sieves - Plan your parents' secure retirement with Monte Carlo simulation - Save the sorceress Zatanna from a stabby death using palindromes - Model the Milky Way and calculate our odds of detecting alien civilizations - Help the world's smartest woman win the Monty Hall problem argument - Reveal Jupiter's Great Red Spot using optical stacking - Save the head of Mary, Queen of Scots with steganography - Foil corporate security with invisible electronic ink Simulate volcanoes, map Mars, and more, all while gaining valuable experience using free modules like Tkinter, matplotlib, Cprofile, Pylint, Pygame, Pillow, and Python-Docx. Whether you're looking to pick up some new Python skills or just need a pick-me-up, you'll find endless educational, geeky fun with Impractical Python Projects.

Twelve Years a Slave Solomon Northup,2024-01-04

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington

D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Green Planets Gerry Canavan, Kim Stanley

Robinson, 2014-04-15 Contemporary visions of the future have been shaped by hopes and fears about the effects of human technology and global capitalism on the natural world. In an era of climate change, mass extinction, and oil shortage, such visions have become increasingly catastrophic, even apocalyptic. Exploring the close relationship between science fiction, ecology, and environmentalism, the essays in *Green Planets* consider how science fiction writers have been working through this crisis. Beginning with H. G. Wells and passing through major twentieth-century writers like Ursula K. Le Guin, Stanislaw Lem, and Thomas Disch to contemporary authors like Margaret Atwood, China Miéville, and Paolo Bacigalupi—as well as recent blockbuster films like *Avatar* and *District 9*—the essays in *Green*

Planets consider the important place for science fiction in a culture that now seems to have a very uncertain future. The book includes an extended interview with Kim Stanley Robinson and an annotated list for further exploration of “ecological SF” and related works of fiction, nonfiction, films, television, comics, children’s cartoons, anime, video games, music, and more. Contributors include Christina Alt, Brent Bellamy, Sabine Höhler, Adeline Johns-Putra, Melody Jue, Rob Latham, Andrew Milner, Timothy Morton, Eric C. Otto, Michael Page, Christopher Palmer, Gib Prettyman, Elzette Steenkamp, Imre Szeman.

Not Okay Brett Axel, 2020-05-30 Peter Wilson searches for healing from child sexual abuse and mental illness in the 1980's. With the resources at his disposal inadequate, he turns to the pop psychology self help book, I'm OK You're OK, wisecracks, and a little bit of murder.

Parsing the Turing Test Robert Epstein, Gary Roberts, Grace Beber, 2008-12-01 An exhaustive work that represents a landmark exploration of both the philosophical and methodological issues surrounding the search for true artificial intelligence. Distinguished psychologists, computer scientists, philosophers, and programmers from around the world debate weighty issues such as whether a self-conscious computer would create an internet ‘world mind’. This hugely important volume explores nothing less than the future of the human race itself.

Singularity Hypotheses Amnon H. Eden, James H Moor, Johnny H Soraker, Eric Steinhart, 2013-04-03 Singularity Hypotheses: A Scientific and Philosophical Assessment offers authoritative, jargon-free essays and critical commentaries on accelerating technological progress and the notion of technological singularity. It focuses on conjectures about the intelligence explosion, transhumanism, and whole brain emulation. Recent years have seen a plethora of forecasts about the profound, disruptive impact that is likely to result from further progress in these areas. Many commentators however

doubt the scientific rigor of these forecasts, rejecting them as speculative and unfounded. We therefore invited prominent computer scientists, physicists, philosophers, biologists, economists and other thinkers to assess the singularity hypotheses. Their contributions go beyond speculation, providing deep insights into the main issues and a balanced picture of the debate.

Encyclopedia of Education and Information Technologies

Arthur Tatnall, 2020-05-24 This encyclopedia aims to offer researchers an indication of the breadth and importance of information systems in education, including the way IT is being used, and could be used to enable learning and teaching. The encyclopedia covers all aspects of the interaction between education and information technologies, including IT in kindergartens, primary and secondary schools, universities, training colleges, industry training, distance education and further education. It also covers teaching and computing, the use of IT in many different subject areas, the use of IT in educational administration, and national policies of IT and education.

Communication, Technology, and Politics in the Information

Age Gerald Sussman, 1997-09-09 Gerald Sussman offers a detailed critical analysis of the political dimensions of 21st century communication/information technologies, mass media and transnational networks.

The Imago Sequence

Laird Barron, 2007-07-01 The title story of this collection — a devilishly ironic riff on H. P. Lovecraft's "Pickman's model" — was nominated for a World Fantasy Award, while "Probiscus" was nominated for an International Horror Guild award and reprinted in The Year's Best Fantasy and Horror 19. In addition to his previously published work, this collection contains an original story.

Matter

Iain M. Banks, 2009-02-10 A novel of dazzling wit and serious purpose. An extraordinary feat of storytelling and breathtaking invention on a grand scale, it is a tour de force from

a writer who has turned science fiction on its head. Unexpectedly savage, emotionally powerful, and impossible to forget. —The Times In a world renowned even within a galaxy full of wonders, a crime within a war. For one brother it means a desperate flight, and a search for the one — maybe two — people who could clear his name. For his brother it means a life lived under constant threat of treachery and murder. And for their sister, even without knowing the full truth, it means returning to a place she'd thought abandoned forever. Only the sister is not what she once was; Djan Seriy Anaplian has changed almost beyond recognition to become an agent of the Culture's Special Circumstances section, charged with high-level interference in civilizations throughout the greater galaxy. Concealing her new identity — and her particular set of abilities — might be a dangerous strategy, however. In the world to which Anaplian returns, nothing is quite as it seems; and determining the appropriate level of interference in someone else's war is never a simple matter. The Culture Series Consider Phlebas The Player of Games Use of Weapons The State of the Art Excession Inversions Look to Windward Matter Surface Detail The Hydrogen Sonata

The Culture of 'the Culture' Joseph S. Norman, 2021-01-05 In a career that spanned over thirty years, Iain M. Banks became one of the best-loved and most prolific writers in Britain, with his space opera series concerned with the pan-galactic utopian civilisation known as 'the Culture' widely regarded as his most significant contribution to science fiction. The Culture of 'The Culture' is the first critical monograph to focus solely on this series, providing a comprehensive, thematic analysis of Banks's Culture stories from Consider Phlebas to The Hydrogen Sonata. It explores the development of Banks's political, philosophical and literary thought, arguing that the Culture offers both an image of a harmonious civilisation modelled on an alternative socialist form of globalisation and a critique of our neo-liberal present. As Joseph S. Norman explains, the Culture is the result of an ongoing

utopian process, attempting through the application of technoscience to move beyond obstacles to progress such as imperialism, capitalism, the human condition, religious dogma, patriarchy and crises in artistic representation. The Culture of 'The Culture' defines Banks's creation as culture: a utopian way of doing, of being, of seeing: an approach, an attitude and a lifestyle that has enabled, and is evolving alongside, utopia, rather than an image of a static end-state.

Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness - a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houq.

Sissy Dreams: From Boyfriend to Girlfriend Paul Zante,
Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.

Finding Flow Mihaly Csikszentmihalyi, 2020-03-03 From the bestselling author of *Flow* and one of the pioneers of the scientific study of happiness, an indispensable guide to living your best life. What makes a good life? Is it money? An important job? Leisure time? Mihaly Csikszentmihalyi believes our obsessive focus on such measures has led us astray. Work fills our days with anxiety and pressure, so that during our free time, we tend to live in boredom, absorbed by our screens. What are we missing? To answer this question, Csikszentmihalyi studied thousands of people, and he found the key. People are happiest when they challenge themselves with tasks that demand a high degree of skill and commitment, and which are undertaken for their own sake. Instead of scrolling on your phone, play the piano. Take a routine chore and figure out how to do it better, faster, more efficiently. In short, learn the hidden power of complete engagement, a psychological state the author calls flow. Though they appear simple, the lessons in *Finding Flow* are life-changing.

Research Fiction and Thought Experiments in Design

Mark Blythe, Enrique Encinas, 2018-05-30 *Research Fiction and Thought Experiments in Design* traces design fiction from the Italian radical design of the 1960s through British Art Schools in the late 1990s to contemporary adaptations of the practice by companies like Google, Microsoft, and Facebook.
