Unrestricted Warfare Liang Qiao 2002 Three years before the September 11 bombing of the World Trade Center-a Chinese military manual called Unrestricted Warfare touted such an attack-suggesting it would be difficult for the U.S. military to cope with. The events of September 11 were not a random act perpetrated by independent agents. The doctrine of total war outlined in Unrestricted Warfare clearly demonstrates that the People's Republic of China is preparing to confront the United States and our allies by conducting "asymmetrical" or multidimensional attack on almost every aspect of our social, economic and political life.

The Left Hand of Darkness Ursula K. Le Guin 2000-07-01 50TH ANNIVERSARY EDITION—WITH A NEW INTRODUCTION BY DAVID MITCHELL AND A NEW AFTERWORD BY CHARLIE JANE ANDERS Ursula K. Le Guin’s groundbreaking work of science fiction—winner of the Hugo and Nebula Awards. A lone human ambassador is sent to the icebound planet of Winter, a world without sexual prejudice, where the inhabitants’ gender is fluid. His goal is to facilitate Winter’s inclusion in a growing intergalactic civilization. But to do so he must bridge the gulf between his own views and those of the strange, intriguing culture he encounters... Embracing the aspects of psychology, society, and human emotion on an alien world, *The Left Hand of Darkness* stands as a landmark achievement in the annals of intellectual science fiction.

I Got You a Present! Mike Erskine-Kellie 2020-04-07 A quest for the perfect birthday gift makes for laugh-out-loud fun. “I wanted to get you the greatest present ever,” our narrator says. But somehow, nothing quite worked out. First there were the hand-knitted birthday socks (have you ever tried knitting birthday socks?). Then, a ten-scoop ice cream cone (a disaster to carry), a magic kit (it disappeared, just like magic!), an apple juice-fueled jet pack (just a few kinks to work out). And still our narrator has nothing. Or, maybe there is something here to give after all ... Everyone knows it’s the thought that counts, right? Especially when it’s a gift that comes from the heart.

Children Under Fire John Woodrow Cox 2021-03-30 Longlisted for the PEN/John Kenneth Galbraith Award for Nonfiction Winner of the Goddard Riverside Stephan Russo Book Prize for Social Justice *A Newsweek Favorite Book of 2021 *An NPR 2021 "Books We Love" selection *A Washington Post Notable Work of Nonfiction *A Kirkus "2021's Best, Most Urgent Books of Current Affairs" selection Based on the acclaimed series—a finalist for the Pulitzer Prize—an intimate account of the devastating effects of gun violence on our nation’s children, and a call to action for a new way forward In 2017, seven-year-old Ava in South Carolina wrote a letter to Tyshaun, an eight-year-old boy from Washington, DC. She asked him to be her pen pal; Ava thought they could help each other. The kids had a tragic connection—both were traumatized by gun violence. Ava’s best friend had been killed in a campus shooting at her elementary school, and Tyshaun’s father had been shot to death outside of the boy’s elementary school. Ava’s and Tyshaun’s stories are extraordinary, but not unique. In the past decade, 15,000 children have been killed from gunfire, though that number does not account for the kids who weren’t shot and aren’t considered victims but have nevertheless been irreparably harmed by gun violence. In *Children Under Fire*, John Woodrow Cox investigates the effectiveness of gun safety reforms as well as efforts to manage children’s trauma in the wake of neighborhood shootings and campus massacres, from Columbine to Marjory Stoneman Douglas. Through deep reporting, Cox addresses how we can effect change now, and help children like Ava and Tyshaun. He explores their stories and more, including a couple in South Carolina whose eleven-year-old son shot himself, a Republican politician fighting for gun safety laws, and the charlatans infiltrating the school safety business. In a moment when the country is desperate to better understand and address gun violence, *Children Under Fire* offers a way to do just that, weaving wrenching personal stories into a critical call for the United States to embrace practical reforms that would save thousands of young lives.

Strangers flock to Miracle Springs hoping the natural hot springs, five-star cuisine, and renowned spa can cure their ills. If none of that works, they often find their way to Miracle Books, where, over a fresh-baked “comfort” scone, they exchange their stories with owner Nora Pennington in return for a carefully chosen book. That’s Nora’s special talent—prescribing the perfect novel to ease a person’s deepest pain. So when a visiting businessman reaches out for guidance, Nora knows exactly how to help. But before he can keep their appointment, he’s found dead on the train tracks. Stunned, Nora forms the Secret, Book, and Scone Society, a group of damaged souls yearning to earn redemption by helping others. To join, members must divulge their darkest secret—the terrible truth that brought each of them to Miracle Springs in the first place. Now, determined to uncover the truth behind the businessman’s demise, the women meet in Nora’s cozy bookstore. And as they untangle a web of corruption, they also discover their own courage, purpose, and a sisterhood that will carry them through every challenge—proving it’s never too late to turn the page and start over... “Adams kicks off a new series featuring strong women, a touch of romance and mysticism, and both the cunning present-day mystery and the slowly revealed secrets of the intriguing heroines’ pasts.”—Kirkus Reviews

The Three Pigs David Wiesner 2014-11-28 Satisfying both as a story and as an exploration of story, *The Three Pigs* takes visual narrative to a new level.

When the wolf comes a-knocking and a-puffing, he blows the pigs right out of the tale and into a whole new imaginative landscape, where they begin a

freewheeling adventure as they wander-and fly-through other stories, encountering a dragon and a cat with a fiddle, among others. This familiar tale will never be the same old story again.

Atmospheric Science at NASA Erik M. Conway 2008-12-08 Atmospheric Science at NASA critically examines this politically controversial science, dissecting the often convoluted roles, motives, and relationships of the various institutional actors involved—among them NASA, congressional appropriation committees, government weather and climate bureaus, and the military.

The Daily Show (The Book) Chris Smith 2016-11-22 NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning *The Daily Show* with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, *The Daily Show* with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of *The Daily Show*'s most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, *The Daily Show* has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

Start-up Nation Dan Senor 2011-09-07 START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

If You Decide to Go to the Moon Faith McNulty 2005 In language that is elegant, yet fun, this adventure invites the reader on an emotionally charged trip to the moon--from reminders of what one should pack on a trip to the moon, to the exciting countdown and lift-off.

The Curious Incident of the Dog in the Night-Time Mark Haddon 2009-02-24 A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher’s carefully constructed world falls apart when he finds his neighbour’s dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents’ marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher’s mind. And herein lies the key to the brilliance of Mark Haddon’s choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Chronicle of the 20th Century Clifton Daniel 1987 Traces the first eighty-six years of the twentieth century and describes important events in politics, industry, art, music, literature, religion, and sports

Tools for Thought Howard Rheingold 2000-04-13 In a highly engaging style, Rheingold tells the story of what he calls the patriarchs, pioneers, and infonauts of the computer, focusing in particular on such pioneers as J. C. R. Licklider, Doug Engelbart, Bob Taylor, and Alan Kay. The digital revolution did not begin with the teenage millionaires of Silicon Valley, claims Howard Rheingold, but with such early intellectual giants as Charles Babbage, George Boole, and John von Neumann. In a highly engaging style, Rheingold tells the story of what he calls the patriarchs, pioneers, and infonauts of the computer, focusing in particular on such pioneers as J. C. R. Licklider, Doug Engelbart, Bob Taylor, and Alan Kay. Taking the reader step by step from nineteenth-century mathematics to contemporary computing, he introduces a fascinating collection of eccentrics, mavericks, geniuses, and visionaries. The book was originally published in 1985, and Rheingold's attempt to envision computing in the 1990s turns out to have been remarkably prescient. This edition contains an afterword, in which Rheingold interviews some of the pioneers discussed in the book. As an exercise in what he calls "retrospective futurism," Rheingold also looks back at how he looked forward.

20th Century Day by Day Clifton Daniel 1999 A visual history of the twentieth century incorporates text and thousands of illustrations and photographs that document the people, places, and events of the past one hundred years

The 2030 Spike Colin Mason 2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will

converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

The Uninhabitable Earth David Wallace-Wells 2020 "It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible. In California, wildfires now rage year-round, destroying thousands of homes.

Across the US, "500-year" storms pummel communities month after month, and floods displace tens of millions annually. This is only a preview of the changes to come. And they are coming fast. Without a revolution in how billions of humans conduct their lives, parts of the Earth could become close to uninhabitable, and other parts horrifically inhospitable, as soon as the end of this century. In his travelogue of our near future, David Wallace-Wells brings into stark relief the climate troubles that await -- food shortages, refugee emergencies, and other crises that will reshape the globe. But the world will be remade by warming in more profound ways as well, transforming our politics, our culture, our relationship to technology, and our sense of history. It will be all-encompassing, shaping and distorting nearly every aspect of human life as it is lived today. Like An Inconvenient Truth and Silent Spring before it, The Uninhabitable Earth is both a meditation on the devastation we have brought upon ourselves and an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation"--

The Dragons of Eden Carl Sagan 1977 The well-known astronomer and astrobiologist surveys current knowledge of the development of intelligence on Earth in various forms of life and explains his persuasion that intelligence must have developed along similar lines throughout the universe

Arc of Justice Kevin Boyle 2007-04-01 An electrifying story of the sensational murder trial that divided a city and ignited the civil rights struggle In 1925, Detroit was a smoky swirl of jazz and speakeasies, assembly lines and fistfights. The advent of automobiles had brought workers from around the globe to compete for manufacturing jobs, and tensions often flared with the KKK in ascendance and violence rising. Ossian Sweet, a proud Negro doctor-grandson of a slave-had made the long climb from the ghetto to a home of his own in a previously all-white neighborhood. Yet just after his arrival, a mob gathered outside his house; suddenly, shots rang out: Sweet, or one of his defenders, had accidentally killed one of the whites threatening their lives and homes. And so it began-a chain of events that brought America's greatest attorney, Clarence Darrow, into the fray and transformed Sweet into a controversial symbol of equality. Historian Kevin Boyle weaves the police investigation and courtroom drama of Sweet's murder trial into an unforgettable tapestry of narrative history that documents the volatile America of the 1920s and movingly re-creates the Sweet family's journey from slavery through the Great Migration to the middle class. Ossian Sweet's story, so richly and poignantly captured here, is an epic tale of one man trapped by the battles of his era's changing times. Arc of Justice is the winner of the 2004 National Book Award for Nonfiction.

The Hundred-Year Marathon Michael Pillsbury 2015-02-03 One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise - and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, The Hundred-Year Marathon reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders - as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped - sometimes unwittingly and sometimes deliberately - to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. The Hundred-Year Marathon is a wake-up call as we face the greatest national security challenge of the twenty-first century.

Idea Man Paul Allen 2011-04-19 By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time

named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he has solved problems, what he's learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.

Someone Was Watching David Patneau 1993-01-01 It's been three miserable months since 13-year-old Chris Barton lost his little sister, Molly. "Missing, presumed drowned" was what the paper said, and surely that is what everyone believes. After all, the Bartons had been picnicking by the river when Molly disappeared. One night, Chris views a video he made the day Molly was lost. There doesn't seem to be anything unusual here: a rest stop, lunch by the river, a hungry squirrel, a familiar ice cream van. But the video harbors an awful secret. In the middle of the night, Christ Barton wakes from fitful sleep—and begins a journey filled with fear, doubt, and impossible hopes.

Man and His Symbols Carl Gustav Jung 1964 Explores Jung's psychological concepts regarding the nature, function and importance of man's symbols as they appear on both the conscious and subconscious level

What Technology Wants Kevin Kelly 2011-09-27 From the author of the New York Times bestseller The Inevitable—a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

Ark of the Apocalypse Tobin Marks 2021-03-08 Earth is on the verge of becoming a dead planet. The polar ice caps melted long ago, and it's been decades since the last raindrop fell. Ocean levels rise a dozen meters, and forest fires rage on a global scale. Eleven billion people dying of thirst wage water wars against each other as extinction looms. Humanity needs a new planet. As Earth deteriorates, the nation states desperately work together to build a mechanism for recolonization. And so the Magellan II is born, the first starship capable of interstellar travel. The future of the human race is tasked to ten thousand colonists-now homeless but for the vastness of space and the decks of Magellan II. A distant planet offers hope of survival, but it's a strange, watery world inhabited by giant reptiles. Humanity is starting over, but survival isn't guaranteed.

Rocket Boys Homer H. Hickam 2000 The author traces the boyhood enthusiasm for rockets that eventually led to a career at NASA, describing how he built model rockets in the family garage in West Virginia, inspired by the launch of the Soviet satellite Sputnik. Reprint.

Tuesday David Wiesner 2014-11-28 In this ingenious and imaginative - nearly wordless - picture book, frogs in a pond lift off on their lily pads and fly to a nearby town where they zoom through a woman's living room, encounter a dog playing in his yard, and distract a bathrobe-clad citizen from his midnight snack. Who knows what will happen next Tuesday?
