Jamie Robert Vollmer

Schools Cannot Do it Alone Jamie Robert Vollmer,2010 *Schools Cannot Do It Alone* tells of Jamie Vollmer, businessman and attorney, as he travels through through the land of public education. His encounters with blueberries, bell curves, and smelly eighth graders lead him to two critical discoveries. First, we have a systems problem, not a people problem. We must change the system to get the graduates we need. Second, we cannot touch the system without touching the culture of the surrounding town; everything that goes on inside a school is tied to local attitudes, values, traditions, and beliefs. Drawing on his work in hundreds of districts, Jamie offers teachers, administrators, board members, and their allies a practical program to secure the understanding, trust, permission, and support they need to change the system and increase student succes

**Globalizing Education Policy** Fazal Rizvi,Bob Lingard,2009-12-04 Rizvi and Lingard's account of the global

politics of education is thoughtful, complex and compelling. It is the first really comprehensive discussion and analysis of global trends in education policy, their effects - structural and individual - and resistance to them. In the enormous body of writing on globalisation this book stands out and will become a basic text in education policy courses around the world. - Stephen J Ball, Karl Mannheim Professor of Sociology of Education, Institute of Education, University of London, UK In what ways have the processes of globalization reshaped the educational policy terrain? How might we analyse education policies located within this new terrain, which is at once local, national, regional and global? In *Globalizing Education Policy*, the authors explore the key global drivers of policy change in education, and suggest that these do not operate in the same way in all nation-states. They examine the transformative effects of globalization on the discursive terrain within which educational policies are developed and enacted, arguing that this terrain is increasingly informed by a range of neo-liberal precepts which have fundamentally changed the ways in which we think about educational governance. They also suggest that whilst in some countries these precepts are resisted, to some extent, they have nonetheless become hegemonic, and provide an overview of some critical issues in educational policy to which this hegemonic view of globalization has given rise, including: devolution and decentralization new forms of governance the balance between public and private funding of education access and equity and the education of girls curriculum particularly with respect to the teaching of English language and technology pedagogies and high stakes testing and the global trade in education. These issues are explored within the context of major shifts in global processes and ideological discourses currently being experienced, and negotiated by all countries. The book also provides an approach to education policy analysis in an age of globalization and will be of interest to those studying globalization and education policy across the social sciences.

**Multimodality, Learning and Communication** Jeff Bezemer,Gunther Kress,2015-11-19 This state-of-the-art account of research and theorizing brings together multimodality, learning and communication through detailed analyses of signmakers and their meaning-making in museums, hospitals, schools and the home environment. By analyzing video recordings, photographs, screenshots and print materials, Jeff Bezemer and Gunther Kress go well beyond the comfortable domains of traditional sites of (social) semiotic and multimodal research. They steer away from spurious invention and naming of ever more new and exciting domains, focusing instead on fundamentals in assembling a set of tools for current tasks: namely, describing and analyzing learning and communication in the contemporary world as one integrated field. The theory outlined in the book is grounded in the findings of the authors' wide-ranging empirical investigations. Each chapter evaluates the work that is being done and has been done, challenging accepted wisdom and standing much of it on its head. With extensive illustrations and many examples presented to show the reach and applicability of the theory, this book is essential reading for all those working in multimodality, semiotics, applied linguistics and related areas.
