**Tank Hunter** Craig Moore,2017-11-08 The First World War's fierce battles saw the need to develop military technology beyond anything previously imagined: as exposed infantry and cavalry were mowed down by relentless machine-gun attacks, so tanks were developed. Here author Craig Moore presents every First World War tank, from the prototype 'Little Willie', through the French heavy tanks to the German light tank. He gives a focused history of the development of this game-changing vehicle and the engagements it was used in – vital battles such as the Somme and Cambrai. Stunningly illustrated in full colour throughout, *Tank Hunter: World War One* provides historical background, facts and figures for each First World War tank as well as the locations of any surviving examples, giving you the opportunity to become a Tank Hunter yourself.

**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Malta's Greater Siege & Adrian Warburton DSO\* DFC\*\* DFC (USA) Paul McDonald,2015-11-30 This is a true historical account of war in the air, at sea and on land in the battle for Malta's survival in the Second World War. It was a battle which decided the outcome of the war in North Africa and the Mediterranean. Adrian Warburton, the airman described in the subtitle by Marshal of the Royal Air Force Lord Tedder, went missing in 1944 in a single-seat American aircraft. He had flown at least 395 operational missions mostly from Malta. Unusually for a reconnaissance pilot, 'Warby' as he was known was credited with nine aircraft shot down. He lay undiscovered for sixty years. He is the RAF's most highly decorated photo-recce pilot. In Malta, Adrian met Christina, a stranded dancer turned aircraft plotter in the secret world deep beneath Valletta's fortress walls. She too was decorated for heroism. Together, they became part of the island's folklore. How important was Malta and the girl from Cheshire to the man behind the medals? This tale takes the form of a quest opening in a cemetery in Bavaria and closing in another in Malta. In between, the reader is immersed within the tension and drama surrounding Malta's Greater Siege retracing the steps of the main characters over the forever changed face of the island following its heroic victory.

**Hardware: The Definitive SF Works of Chris Foss** Chris Foss, 2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." – Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." – Alejandro Jodorowsky
