Warpaint - Colours and Markings of British Army Vehicles 1903-2003 Mariusz Filipiuk, Richard Taylor, Dick Taylor, 2008-06-19 This book, Volume 1 in a series of four, describes and illustrates the colors and markings used by the British army on its vehicles during the 20th century. The three chapters cover the following topics: Chapter 1 Colors and Sources ,Chapter 2 Paint and

Camouflage up to 1939, and Chapter 3 Registrations, War Department numbers and Census Marks. The book is filled throughout with photos, color profiles, and meticulous drawings. The series will prove invaluable for military enthusiasts and modelers, making sense of a very confusing topic! Additive Manufacturing of Metals John O. Milewski, 2017-06-28 This engaging volume presents the exciting new technology of additive manufacturing (AM) of metal objects for a broad audience of academic and industry researchers, manufacturing professionals, undergraduate and graduate students, hobbyists, and artists. Innovative applications ranging from rocket nozzles to custom jewelry to medical implants illustrate a new world of freedom in design and fabrication, creating objects otherwise not possible by conventional means. The author describes the various methods and advanced metals used to create

high value components, enabling readers to choose which process is best for them. Of particular interest is how harnessing the power of lasers, electron beams, and electric arcs, as directed by advanced computer models, robots, and 3D printing systems, can create otherwise unattainable objects. A timeline depicting the evolution of metalworking, accelerated by the computer and information age, ties AM metal technology to the rapid evolution of global technology trends. Charts, diagrams, and illustrations complement the text to describe the diverse set of technologies brought together in the AM processing of metal. Extensive listing of terms, definitions, and acronyms provides the reader with a quick reference guide to the language of AM metal processing. The book directs the reader to a wealth of internet sites providing further reading and resources, such as vendors and service providers, to jump start those interested in taking the first steps to establishing AM metal capability on whatever scale. The appendix provides hands-on example exercises for those ready to engage in experiential self-directed learning.

Gilded Age Ivan Franceschini, Nicholas Loubere, 2018-04-01 According to the Chinese zodiac, 2017 was the year of the 'fire rooster', an animal often associated with the mythical fenghuang, a magnificently beautiful bird whose appearance is believed to mark the beginning of a new era of peaceful flourishing. Considering the auspicious symbolism surrounding the fenghuang, it is fitting that on 18 October 2017, President Xi Jinping took to the stage

of the Nineteenth Party Congress to proclaim the beginning of a 'new era' for Chinese socialism. However, in spite of such ecumenical proclamations, it became immediately evident that not all in China would be welcome to reap the rewards promised by the authorities. Migrant workers, for one, remain disposable. Lawyers, activists and even ordinary citizens who dare to express critical views also hardly find a place in Xi's brave new world. This Yearbook traces the stark new 'gilded age' inaugurated by the Chinese Communist Party. It does so through a collection of more than 40 original essays on labour, civil society and human rights in China and beyond, penned by leading scholars and practitioners from around the world.

The Wargaming Compendium Henry Hyde, 2013-08-19 An extensive reference guide to the exciting hobby, for beginners as well as longtime players. Wargaming is a fascinating, engrossing, and exciting pastime that encompasses a wide range of different talents. The average wargamer uses the skills of artist,

designer, sculptor, illustrator, historian, librarian, researcher, mathematician, and creative writer, as well as the more obvious ones of general, admiral, or air marshal for large games, or perhaps lieutenant, commodore, or squadron leader for skirmishes. Aside from calling upon many skills, wargaming also covers many aspects of combat, spanning the history of Earth. With science fiction gaming, we plunge into imagined worlds many thousands of years into the future, and a fantasy gamer, of course, deals with eons of imagined history, as anyone who has read The Lord of the Rings will know. A wargamer may find themselves recreating an encounter between a handful of adversaries one day, or a massed battle involving perhaps hundreds of miniature troops the next. Moreover, it is possible to play wargames that recreate warfare on land, on sea, in the air, or even in outer space. This book demonstrates the wonderfully varied hobby of wargaming with miniatures, looking at the broad scope of what it has to offer as well as detailed explanations of how to get involved, including comprehensive rules for gladiator combat, Wild West skirmishes, and the horse and musket era, as well as lots of advice for anyone new to wargaming. Whether you're a complete newcomer to the hobby, or a veteran of many years, you'll find plenty in The Wargaming Compendium to entertain and inspire you.

Design as Learning Jan Boelen, 2019-02-19 Why do design? What is design for? These are forward-looking questions for a creative discipline that seems more slippery to define than ever. In a world of dwindling natural resources, exhausted social and political systems, and an overload of information there are many urgent reasons to reimagine the design discipline, and there is a

growing need to look at design education. Learning and unlearning should become part of an on-going educational practice. We need new proposals for how to organise society, how to structure our governments, how to live with, not against, the planet, how to sift fact from fiction, how to relate to each other, and frankly, how to simply survive. The 4th Istanbul Design Biennial, and this publication Design as Learning ask: can design and design education provide these critical ideas and strategies? -- Back cover.
