*Biomass Utilization* Wilfred Cote, 2013-12-01 This proceedings volume represents the culmination of nearly three years of planning, organizing and carrying out of a NATO Advanced Study Institute on Biomass Utilization. The effort was initiated by Dr. Harry Sobel, then Editor of Biosources Digest, and a steering committee representing the many disciplines that this field brings together. . When the fiscal and logistical details of the original plan could not be worked out, the idea was temporarily suspended. In the spring of 1982, the Renewable Materials Institute of the State University of New York at the College of Environmental Science and Forestry in Syracuse, New York revived the plan. A number of modifications had to be made, including the venue which was changed from the U.S.A. to Portugal. Additional funding beyond the basic support provided by the Scientific Affairs Division of NATO had to be obtained. Ultimately there were supplementary grants from the Foundation for Microbiology and the Anne S. Richardson Fund to assist student participants. The New York State College of Forestry Foundation, Inc. provided major support through the Renewable Materials Institute. The ASI was held in Alcabideche, Portugal from September 26 to October 9, 1982. Eighty participants including fifteen principal lecturers were assembled at the Hotel Sintra Estoril for the program that was organized as a comprehensive course on biomass utilization. The main lectures were supplemented by relevant short papers offered by the participants.

*Vietnam Vanguard* Ron Boxall, Robert O'Neill, 2020-02-28 The Vietnam War, and Australia's part in it, was a major military event, calling for willingness to face death and destruction on the battlefield on the part of those sent there, especially the men of our infantry battalions who formed the spearhead of our forces in Vietnam. For many reasons, the Australian public know relatively little about what our Army did in Vietnam during the war, particularly during the years of our peak commitment, 1965-72. This book attempts to make the true nature of the war clearer to readers, emphasising how hard fought it was during major operations. Twenty-seven of the contributing authors of this book were involved in the 1966 deployment of the 1st Australian Task Force into

Phuoc Tuy Province. This formation was the first Australian Army force larger than an infantry battalion group to be deployed into a major war since World War II. 5th Battalion, the Royal Australian Regiment (5 RAR), was in the vanguard as the task force's first element committed to operations to seize and occupy Nui Dat base and embark on establishing dominance over the enemy. The narratives presented in this book give rare insights into thoughts of the soldiers at the time and how they have come to view the Australian Government's hurried expansion of its initial commitment to that war, the Army's state of preparedness for that wider involvement, and how those in its forefront adapted to get the job done, both in and out of operations, despite numerous shortcomings in higher level planning. Both professional soldiers and conscripted national servicemen have contributed viewpoints to these pages.

**Internationalizing and Privatizing War and Peace** H. Wulf,2005-08-05 In this timely work, the author analyzes the use of private military firms and international interventions of the military. Outsourcing to the private sector takes missions away from the military, but the shift towards international intervention adds new, wider functions to the traditional role of defence. If these two trends continue at the present pace, important security functions will be out of control of parliaments, national governments and international authorities. The state monopoly of violence - an achievement of civilization - is at stake.

*Through the Joint, Interagency, and Multinational Lens* Dr. David A. Anderson,Heather R. Karambelas,2015-09-01

**Libya in Western Foreign Policies, 1911-2011** Saskia Van Genugten,2016-05-18 Libya has a short, volatile history. Foreigners played a significant role in shaping Libya's institutions and policies, and this book explores longer term trends in the relations between Libya and the West, placing current developments in their historical context. Throughout history, the globe's most powerful actors have regarded Libya as an outlier state of little significance. Libya belonged neither here nor there and never fell under the full protection of any significant global or regional powerhouse. Libya's weak national identity, its weak institutions and its peripheral position have made it vulnerable to external influences and interventions. As a result, Libya repeatedly falls prey to foreign powers wanting to flex their muscles. As this book narrates, this was the case in 1911, in 2011 and several times in between.

**T-34 In Action** Artem Drabkin,Oleg Sheremet,2006-04-01 The Soviet T-34 medium tank was one of the most famous and effective fighting vehicles of the Second World War. Along with the German Tiger and the American Sherman, it was a milestone in tank design that changed the course of the conflict. Much has been written about the technical history of the tank and the vital part it played in the huge tank battles on the Eastern Front, but less has been said about the men who went to war in the T-34 and lived, fought and sometimes died in these remarkable machines. This pioneering book, which is based on extensive interviews with tank crews, records their experiences and offers a compelling inside view of armored warfare in the mid-twentieth century.

**The Military Balance 2022** The International Institute for Strategic Studies (IISS),2022-02-14 Published each year since 1959, The Military Balance is an indispensable reference to the capabilities of armed forces across the globe. **Fundamentals of Aircraft and Rocket Propulsion** Ahmed F. El-Sayed,2016-05-25 This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

**Defending Air Bases in an Age of Insurgency** Shannon Caudill,Air University Press,2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.
