Japanese Secret Projects Edwin M. Dyer, 2009 Surprisingly, secret Japanese planes of World War II remain an area that has been largely ignored due to scarcity of information. They do, however, have a large base of interest as unlike the majority of secret Luftwaffe programs that were resigned to the drawing board, the vast number of aircraft featured within this book actually flew or were in development. The book begins with an overview of the IJN and IJA through the early years to 1945, and their secret technical exchanges with the Luftwaffe throughout the war. It is divided into two sections dedicated to the two armed forces, with a total of 34 aircraft examined, each with its history, performance, and combat records laid out in an easy to read fashion. The book provides photographs, technical drawings, and stunning color renditions of the aircraft in combat. Notable emphasis is placed upon the supersonic kamikaze aircraft, the Amerika bomber, and the ways in which the Japanese improved on German technology, particularly the Me 262 and Komet. Secret Japanese armaments are also covered in detail, with information uncovered on guided missiles, rockets, and cannons. A gripping read for aviation and military enthusiasts around the world!

Introduction to UAV Systems Paul Fahlstrom, Thomas Gleason, 2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. *Introduction to UAV Systems*, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. *Introduction to UAV Systems*, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in a course that goes into more depth in one of the individual technologies

involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems.

The Imperial Japanese Navy in the Pacific War Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

The Stirling Story Michael J. F. Bowyer, 2002 Conceived in the shadow of looming war, when the RAF's bomber force was largely made up of obsolete and outmoded aircraft, the Stirling became the first British four-engined 'heavy' bomber of the Second World War. Developed, tested and brought into service in the first desperate years of the Second World War, the arrival of the Stirling marked a turning point in the aerial warfare of that conflict, the moment when the Allies went on the offensive against the German homeland. In the years that followed Stirling squadrons were at the forefront of the developing tactics of the Allied bomber campaign - target marking, pathfinding, electronic navigation, the thousand bomber raids etc. - that were ultimately to lead to the utter devastation of so many German cities. Despite this leading role the Stirling has never enjoyed the standing of the Halifax and the even more celebrated Lancaster. Handicapped by an unrealistic peacetime design specification, it could not match the performance of its more famous successors and was withdrawn from frontline service as deliveries of Lancasters and Halifaxes gathered momentum. However, even then the Stirling proved to be versatile and adaptable as a glider tug, transport in secret SOE operations, and later as a civilian transport in the immediate post-war years. The Stirling Story is the culmination of years of exhaustive research by one of the world's foremost aviation authors. From original design

specification and testing, through its development, introduction to service, developing marks and later adaptations the full story of the Shorts Stirling bomber is told with the aid of eyewitness accounts from the designers, production workers, engineers and above all the crews of the Stirling. Much more than the history of just one aircraft type, The Stirling Story is the story of RAF Bomber Command emerging from obscurity and failure to become a devastatingly effective weapon of war. It is an essential work of reference that no serious military aviation enthusiast or war historian can afford to be without, as well as a fascinating read for anyone with any interest in, or connection with, the Shorts Stirling.'

The Mighty Eighth Roger Anthony Freeman, 2000 The US 8th Air Force was based in the UK from 1942 onwards, spread exclusively across East Anglia and operating from over 40 locations. The remains of some of these sites can still be found and a few are still airfields. The 8th flew intensive bomber and fighter sorties over Europe. Over 2000 aircraft, mostly B-17s, B-26s and P-47s, involving 150,000 men and a vastly sophisticated supply chain, were engaged in a ceaseless war of high-altitude daylight precision bombing that did much to secure eventual Allied success.

Flying Wings and Tailless Aircraft Bill Rose, 2010 This is an exciting new addition to the highly successful Secret Projects series, which examines some extraordinary flying wings and tailless aircraft projects. Designed and developed since the dawn of aviation, these aircraft still hold a great importance today, with many aviation enthusiasts eager to learn more about these remarkable aircraft, which provided the foundations for the modern aviation scene. Beginning with an analysis of the advantages of the flying wing, the author looks at why aerodynamicists have been attracted to this unique configuration since the earliest days of manned flight, highlighting a range of specific aircraft and relevant examples. Many aviation enthusiasts will delight in discovering the more intimate developmental details of familiar aircraft including the famous early glider Junkers and other World War 1 flying wing biplane designs.
