RICHARD PEARCE HUNNICUTT

📖 **DESERT OLIVE OIL CULTIVATION** Zeev Wiesman,2009-06-24 Due to the adverse stress conditions typical of olive cultivation in desert conditions, the olive tree is responding with production of high levels of antioxidant substances. Among these substances are polyphenols, tocopherols, and phytosterols. Studies have shown that saline irrigated varieties of olives have demonstrated advantages over those irrigated with tap water. This is just one of the aspects of desert cultivation of olives that is covered in Desert Olive Oil Advanced Biotechnologies. Based on 20 years of research, the book expounds on the appropriate selection of olive varieties with high productivity and oil quality, the impact of foliar nutrition on decreasing alternat bearing and increasing fruit quality, improving efficiency of mechanical harvesting, and increasing efficiency of oil extraction and oil quality regulating analysis. Addresses olive cultivation methods for semi-arid environments Focuses on intensive cultivation using saline and municipal waste recycled irrigation water and their significant impact on the production and nutritional value of olive oil Integrated and multidisciplinary approaches providing a comprehensive view of the desert olive industry Provides key considerations including ecological, biotechnological, agricultural and political impacts

📖 **ARMORED CAR** R. P. Hunnicutt,2015-09-15 The armored car has played a major role in American military operations since the relatively early days of the 20th century. In 1989 Col. Royal P. Davidson arranged for the installation of a .30 caliber Colt machine gun on a Duryea light three-wheeled car. In doing so, he jump-started the development and production of armored fighting vehicles that have served in the American military ever since. Although the very first armored cars were merely outfitted with a gunshield, they were soon fully protected by armor plating. In this installment of R. P. Hunnicutt's 10-volume series on the history of American armored vehicles he details their early development through WWI, WWII, Korea, and Vietnam. Beginning with the development of armored cars on American soil at the outbreak of WWI-although none were ever shipped overseas-Hunnicutt goes on to describe the production of armored cars based on commercial car and truck chassis in the 1920s. These vehicles eventually reached limited production as the armored car M4. With detailed drawings and photographs to illustrate the history, Hunnicutt describes the development of the armored car T3, which was also designated as scout car T1. The development of these lightweight scout cars, which met the needs of the cavalry, made the armored car unnecessary by 1937. Although production of armored cars stopped for the American military, American development continued on armored cars intended for British use. However, in 1942 as the Palmer Board decided to limit the weight of reconnaissance vehicles, the light armored car T22E2 was standardized as the M8 and put into production. The M8 and a variation, the M20, served in the U.S. Army until after the Korean War, with new models developed for use in Vietnam. Spanning the history of American wheeled combat vehicles, Hunnicutt's Armored Car is a must have for anyone with a keen interest in the history of American military operations and equipment.

📖 **STUART** Richard Pearce Hunnicutt,2015-03-26 In Stuart: A History of the American Light Tank (Vol. I), Richard Hunnicutt outlines the development history of the American light tank and its associated self-propelled guns and support vehicles. Beginning with the modification of the French Renault in the midst of WWI, Stuart covers all pre-Stuart vehicles active during WWI in addition to light tank models and variations active during WWII, with emphasis on the wartime development of M3, M5, and M24 series of light tanks. A few other vehicles that are not technically light tanks, such as the M18 and LVT, also receive attention here as they share a number of key characteristics with the Stuart. In this comprehensive history, Hunnicutt also touches on postwar modifications and service of vehicles developed during WWII. In addition to detailing nearly all aspects of technical data and specifications, Stuart features images on nearly every page: photographs, full-color plates, line drawings, and cutaway diagrams, many of which are rare interior shots and diagrams from technical manuals. While Hunnicutt leaves the writing of the complete combat history of the Stuart to those who manned them in battle, he includes some of the Stuart's actions to demonstrate its uses in combat and attributes, both positive and negative. The definitive reference tome for the military historian, professional soldier, and tank restorer, Stuart remains the most comprehensive history on the American light tank's development from its beginnings through WWII. Richard Pearce Hunnicutt (1926-2011) enlisted in the 7th Infantry Division in 1944 and in 1945 was promoted to sergeant and awarded the Silver Star for his heroic actions. After WWII, Hunnicutt earned a Masters in Engineering from Stanford University under the GI Bill. In addition to being one of the most respected metallurgists in California, Hunnicutt wrote the definitive 10-volume history of the development and employment of American armored vehicles. As a tank historian and leading expert in the field, Hunnicutt was one of the founders of the US Army Ordnance Museum at Aberdeen Proving Ground, MD and was a close friend and frequent contributor to the Patton Museum at Fort Knox, KY. 📖 **PRUNING AND TRAINING SYSTEMS FOR MODERN OLIVE GROWING** Riccardo Gucci,Claudio Cantini,2000 Summarizes the information available on current pruning techniques and and training systems. It specifically addresses the problems faced by growers, professionals and students who are new to olive growing.

📖 **SUN BREAD** Elisa Kleven,2004-03-30 Winter's gray chill has set in and everyone misses the sun-especially the baker. So she decides to bring some warmth to the town by making sun bread. And as the bread bakes, rising hot and delicious, everyone comes out to share in its goodness. Everyone, including the sun itself. With a lilting, rhyming text, colorful illustrations, and a recipe for baking your own sun bread, this tasty treat from the illustrator of the best-selling Abuela is just right for all ages to enjoy.
