Tennessee Treasures Alfred Publishing Staff 2009-11-01 Martha Mier's Tennessee Treasures takes a musical journey to three different cities across the state of Tennessee. Written in three movements, it begins in Memphis. "Down on

Beale Street" is a slow, bluesy piece that celebrates the musical heritage of one of the most famous streets in that city. Nashville, the home of country music, is highlighted in "Ballad for Nashville," a lyrical country waltz. The final movement, "Sunrise in the Great Smoky Mountains," visits the eastern part of the state and the city of Knoxville. The broad grandeur of the mountains is evoked through big chords, arpeggios, and a sweeping melodic line, providing a fitting close to the suite.

A Letter to Tia Don Landy 2013-07-11 Author
Don Landy provides canine and feline pet owners with a first person look at grief and grieving in a way that may surprise you. Don Landy never expected to have a dog in his life. After falling for a German shepherd named Sabrina and spending nearly eleven years together, Landy found himself sitting on the floor holding the lifeless body of his beloved dog in his arms and sobbing uncontrollably. Reeling from the loss he vows never again to take a pet, and thereby sets himself up for the inevitable pain that most pet owners experience when the end approaches. A Letter to Tia: Grief. Grieving. The Love, Pain and

Loss of a Friend is his personal account of coming face-to-face with grief and grieving. Pet owners of all ages will find comfort, insight, and at times humor in this reflective, life-affirming story of love and loss. A Letter to Tia recounts Landy's past and present struggle with the loss of pets. He starts with the death of his show cat, Charlie Brown, twenty-five years ago and continues through to the recent diagnosis received by Tia, his German shepherd. After the previous loss of Sabrina, Landy and his wife accepted Tia into their lives with understandable trepidation. To insure they made the right move they test the relationship between Tia and their kitten Holly and discover they have become fast friends. However, when Tia is diagnosed with inoperable cancer at four years old, the author finds himself staring down the prospect of consuming sadness over the grim forecast for her survival. Landy chooses to process his grief full-on, identifying the tremendous toll that loss takes on pet owners, and how best to cope with the emotions that accompany it. With a life enriched by memories of his meaningful times with Tia, Landy's book addresses this exceptional feeling of loss, while also offering proof that miracles do happen. A moving tribute to the strong love that is forged between pets and pet owners, A Letter to Tia: Grief. Grieving. The Love, Pain and Loss of a Friend is sure to provide readers with a good cry, and a good laugh, as his compassionate,

deeply felt, and surprising book celebrates this extraordinary bond.

Organizations and Unusual Routines Ronald E. Rice 2010-10-07 Everyone working in and with organizations will, from time to time, experience frustrations and problems when trying to accomplish tasks that are a required part of their role. This is an unusual routine - a recurrent interaction pattern in which someone encounters a problem when trying to accomplish normal activities by following standard organizational procedures and then becomes enmeshed in wasteful and even harmful subroutines while trying to resolve the initial problem. They are unusual because they are not intended or beneficial, and because they are generally pervasive but individually infrequent. They are routines because they become systematic as well as embedded in ordinary functions. Using a wide range of case studies and interdisciplinary research, this book provides researchers and practitioners with a new vocabulary for identifying, understanding, and dealing with this pervasive organizational phenomenon, in order to improve worker and customer satisfaction as well as organizational performance.

The Junction Norm Konyu 2022-04-05 When a missing child, Lucas Jones, reappears on his Uncle's doorstep in his hometown of Medford after an absence of 12 years, the brief moment of

joy is clouded by mystery. Where has he been? Where is his father who disappeared at the same time? And how is it possible that Lucas is still 11 years old? As Lucas is uncommunicative, it is left to Detective Sergeant David King and child psychologist Jean Symonds to attempt to find some answers from the few belongings Lucas returned with; little more than four Polaroids and a personal journal which speaks of his time in a place called 'The Junction'. The story unravels through interviews, medical and police reports, and ultimately, through visits to The Junction via the pages of Lucas' diary, jumping back and forth in time, revealing pieces of the puzzle in a mystery that keeps the reader guessing right up until the end.

The Tall Firs Joe R. Blakely 2015-01-17 In 1939, the University of Oregon roused the Pacific Northwest from the hardships of the Great Depression as its basketball team, known as the "Tall Firs," took on and defeated Ohio State in the first ever NCAA basketball championship.

Lifting Oregon Out of the Mud Joe R. Blakely 2015-01-21 Oswald West, Oregon's rascally one-term governor, wrote historic legislation in 1913 that set aside Oregon's beaches as Oregon's first coast highway. By 1919, building began in earnest and moved the highway east of the beaches and punched it through four hundred miles of the most rugged and remote terrain on the continent. This breathtaking story concludes in 1936 with an array of five stunning bridges designed by Oregon's premier architect, Conde B. McCullough and resulted in creating one of the most spectacular coastal highways in the world.

Eugene's Civic Stadium Joe R. Blakely
2015-01-18 In 1938, residents of Eugene, Oregon, faced twenty-five percent unemployment. In spite of that, the entire community rose up and built Civic Stadium, the town's biggest WPA project. From the heroics of the first muddy football game, to the popular Lumbermen's baseball teams, to Eugene's participation in the historic Pacific Coast League, this story ends with the placement of the stadium on the National Register of Historic Places in 2008.

Soaps, Detergents and Disinfectants Technology Handbook (3rd Revised Edition) Ajay Kumar Gupta 2021-01-01 Soaps are cleaning agents that are usually made by reacting alkali (e.g., sodium hydroxide) with naturally occurring fat or fatty acids. A soap is a salt of a compound known as a fatty acid. A soap molecule consists of a long hydrocarbon chain (composed of carbons and hydrogens) with a carboxylic acid group on one end which is ionic bonded to a metal ion, usually a sodium or potassium. The hydrocarbon end is nonpolar and is soluble in nonpolar substances (such as fats and oils), and the ionic end (the salt of a carboxylic acid) is soluble in water. Soap is made by combining tallow (or other hard animal fat) or vegetable or fish oil with an alkaline solution. The two most important alkalis in use are caustic soda and caustic potash. A detergent is an effective cleaning product because it contains one or more surfactants. Because of their chemical makeup, the surfactants used in detergents can be engineered to perform well under a variety of conditions. Such surfactants are less sensitive than soap to the hardness

minerals in water and most will not form a film. Disinfectants are chemical agents applied to non-living objects in order to destroy bacteria, viruses, fungi, mold or mildews living on the objects. Disinfectants are chemical substances used to destroy viruses and microbes (germs), such as bacteria and fungi, as opposed to an antiseptic which can prevent the growth and reproduction of various microorganisms, but does not destroy them. The ideal disinfectant would offer complete sterilization, without harming other forms of life, be inexpensive, and non-corrosive. The global soap and detergent market is expected to reach USD 207.56 billion by 2025. The industrial soaps & detergents are extensively used by the commercial laundries, hotels, restaurants, and healthcare providers. Increasing demand from healthcare and food industries will continue to drive the market. Aerosol and liquid products are the common disinfectants used in hospitals, although growing number of healthcare facilities are implementing ultraviolet disinfection systems as further measure. Increasing demand for disinfectants from water treatment and healthcare industries is fuelling growth of the global disinfectants market. The major contents of the book are Liquid Soaps and Hand Wash, Liquid Soap and Detergents, Washing Soap: Laundry Soap Formulation, Antiseptic and Germicidal Liquid Soap, Manufacturing Process And Formulations Of Various Soaps, Handmade Soap,

Detergent Soap, Liquid Detergent, Detergent Powder, Application and Formulae Of Detergents, Detergent Bar, Detergents Of Various Types, Formulating Liquid Detergents, Phenyl, Floor Cleaner, Toilet Cleaner, Mosquito Coils, Naphthalene Balls, Air Freshener (Odonil Type), Liquid Hand Wash and Soaps, Hand Sanitizer, Aerosols–Water and Oil Based Insecticide (Flies, Mosquitoes Insect and Cockroach Killer Spray), Ecomark Criteria for Soaps & Detergents, Plant Layout, Process Flow Chart and Diagram, Raw Material Suppliers List and Photographs of Machinery with Supplier's Contact Details. This book will be a mile stone for its readers who are new to this sector, will also find useful for professionals, entrepreneurs, those studying and researching in this important area.
