Original Grin Ron English, 2019-07-16 Through his highly subversive art Ron English (b. 1959) has bombed the global landscape with striking and often unsettling imagery. He coined the term POPaganda to describe his signature and darkly satirical renderings of corporate branding icons. Ranging from superhero mythology to pillars of art history, his work is populated with a vast and constantly growing arsenal of original characters such as MC Supersized, the obese fast-food mascot featured in the hit movie *Supersize Me*; and Abraham Obama, which fused America's 16th and 44th Presidents, an image that was posited by the media as having directly impacted the 2008 election. His cameo on *The Simpsons* secured his position as America's premier pop iconoclast. This book is the first complete retrospective of English's work, compiling his paintings, illustrations, toys, sculpture, street

art, and agit-pop. Additionally, it contains a lengthy and comprehensive interview with the artist conducted exclusively for this publication.

Olympic Victor Lists and Ancient Greek History Paul Christesen,2007-10-22 This book is a comprehensive examination of Olympic victor lists. The origins, development, content, and structure of Olympic victor lists are explored and explained, and a number of important questions, such as the source and reliability of the year of 776 for the first Olympics, are addressed. Olympic victor lists emerge as a clearly defined type of literature that is best understood as a group of closely related texts. This book offers a fresh perspective on works by familiar writers such as Diodorus Siculus and a sense of the potential importance of less-well-known authors such as Phlegon of Tralleis.
