Shadowfolds Jeffrey Rutzky 2011-02-01
Shadowfolds are a rich blend of traditional motifs expressed in a contemporary style. The technique, pioneered by artist Chris K. Palmer, creates patterns from a single, uncut panel of cloth, using a simple, three-step process. In *Shadowfolds*, Jeff Rutzky, himself an accomplished and passionate origamist, and Palmer offer detailed and fascinating information about the technique and its origins in both Moorish tile and classic Japanese origami. Palmer first encountered the elaborate mosaics of the Alhambra and became intrigued with learning to translate these patterns into folded paper. He turned for inspiration to the work of Japanese origami masters Tomoko Fuse, Jun Maekawa, Toshikazu Kawasaki and

Shuzo Fujimoto, as well as to the great American origami artists Robert Lang and Peter Engel. The transition to working in cloth followed. The flexible property of cloth allows pleats to be folded to augment and give a dimensionality not present in a flat surface; and the translucent quality adds a unique intricacy to the geometric patterns. When lines in a pattern are folded as pleats, the resulting shapes formed by the pleats become part of the artistic expression of the material. The possibilities for using *Shadowfolds* in design are limitless. Some applications take advantage of light shining through the fabric, others show the richness of the folds that have a depth all their own. In addition to explaining the three very simple steps of the technique, the

Reading for Our Lives Maya Payne Smart 2022-08-02 An award-winning journalist and literacy advocate provides a clear, step-by-step guide to helping your child thrive as a reader and a learner. When her child went off to school, Maya Smart was shocked to discover that a good

education in America is a long shot, in ways that few parents fully appreciate. Our current approach to literacy offers too little, too late, and attempting to play catch-up when our kids get to kindergarten can no longer be our default strategy. We have to start at the top. The brain architecture for reading develops rapidly during infancy, and early language experiences are critical to building it. That means parents' work as children's first teachers begins from day one too—and we need deeper knowledge to play our positions. Reading for Our Lives challenges the bath-book-bed mantra and the idea that reading aloud to our kids is enough to ensure school readiness. Instead, it gives parents easy, immediate, and accessible ways to nurture language and literacy
