**Urban Inequality and Segregation in Europe and China** Gwilym Pryce,Ya Ping Wang,Yu Chen,Jingjing Shan,Houkai Wei,2021-11-16 This open access book explores new research directions in social inequality and urban segregation. With the goal of fostering an ongoing dialogue between scholars in Europe and China, it brings together an impressive team of international researchers to shed light on the entwined processes of inequality and segregation, and the implications for urban development. Through a rich collection of empirical studies at the city, regional and national levels, the book explores the impact of migration on cities, the related problems of social and spatial segregation, and the ramifications for policy reform. While the literature on both segregation and inequality has traditionally been dominated by European and North American studies, there is growing interest in these issues in the Chinese context. Economic liberalization, rapid industrial restructuring, the enormous growth of cities, and internal migration, have all reshaped the country profoundly. What have we learned from the European and North American experience of segregation and inequality, and what insights can be gleaned to inform the burgeoning interest in these issues in the Chinese context? How is China different, both in terms of the nature and the consequences of segregation inequality, and what are the implications for future research and policy? Given the continued rise of China's significance in the world, and its recent declaration of war on poverty, this book offers a timely contribution to scholarship, identifying the core insights to be learned from existing research, and providing important guidance on future directions for policy makers and researchers.

**Effortless Action** Edward Slingerland,2007-05-24 This book presents a systematic account of the role of the personal spiritual ideal of wu-wei--literally no doing, but better rendered as effortless action--in early Chinese thought. Edward Slingerland's analysis shows that wu-wei represents the most general of a set of conceptual metaphors having to do with a state of effortless ease and unself-consciousness. This concept of effortlessness, he contends, serves as a common ideal for both Daoist and Confucian thinkers. He also argues that this concept contains within itself a conceptual tension that motivates the development of early Chinese thought: the so-called paradox of wu-wei, or the question of how one can consciously try not to try. Methodologically, this book represents a preliminary attempt to apply the contemporary theory of conceptual metaphor to the study of early Chinese thought. Although the focus is upon early China, both the subject matter and methodology have wider implications. The subject of wu-wei is relevant to anyone interested in later East Asian religious thought or in the so-called virtue-ethics tradition in the West. Moreover, the technique of conceptual metaphor analysis--along with the principle of embodied realism upon which it is based--provides an exciting new theoretical framework and methodological tool for the study of comparative thought, comparative religion, intellectual history, and even the humanities in general. Part of the purpose of this work is thus to help introduce scholars in the humanities and social sciences to this methodology, and provide an example of how it may be applied to a particular sub-field.

Cultural Evolution Peter J. Richerson,Morten H. Christiansen,2013-11-01 Leading scholars report on current research that demonstrates the central role of cultural evolution in explaining human behavior. Over the past few decades, a growing body of research has emerged from a variety of disciplines to highlight the importance of cultural evolution in understanding human behavior. Wider application of these insights, however, has been

hampered by traditional disciplinary boundaries. To remedy this, in this volume leading researchers from theoretical biology, developmental and cognitive psychology, linguistics, anthropology, sociology, religious studies, history, and economics come together to explore the central role of cultural evolution in different aspects of human endeavor. The contributors take as their guiding principle the idea that cultural evolution can provide an important integrating function across the various disciplines of the human sciences, as organic evolution does for biology. The benefits of adopting a cultural evolutionary perspective are demonstrated by contributions on social systems, technology, language, and religion. Topics covered include enforcement of norms in human groups, the neuroscience of technology, language diversity, and prosociality and religion. The contributors evaluate current research on cultural evolution and consider its broader theoretical and practical implications, synthesizing past and ongoing work and sketching a roadmap for future cross-disciplinary efforts. **Consumer-Citizens of China** Kelly Tian, Lily Dong, 2010-11-01 A PDF version of this book is available for free in open access via [www.tandfebooks.com](http://www.tandfebooks.com) as well as the OAPEN Library platform, [www.oapen.org](http://www.oapen.org). It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book presents a comprehensive examination of Chinese consumer behaviour and challenges the previously dichotomous interpretation of the consumption of Western and non-Western brands in China. The dominant position is that Chinese consumers are driven by a desire to imitate the lifestyles of Westerners and thereby advance their social standing locally. The alternative is that consumers reject Western brands as a symbolic gesture of loyalty to their nation-state. Drawing from survey responses and in depth interviews with Chinese consumers in both rural and urban areas, Kelly Tian and Lily Dong find that consumers situate Western brands within select historical moments. This embellishment attaches historical meanings to Western brands in ways that render them useful in asserting preferred visions of the future China. By highlighting how Western brands are used in contests for national identity, *Consumer-Citizens of China* challenges the notion of the patriot's paradox and answers scholars' questions as to whether Chinese nationalists today allow for a Sino-Western space where the Chinese can love China without hating the West. *Consumer-Citizens of China* will be of interest to students and scholars of business studies, Chinese and Asian Studies and Political Science. Kelly Tian is Professor of Marketing and holds the Anderson Chair of Business at New Mexico State University. Lily Dong is Associate Professor of Marketing at the University of Alaska at Fairbanks.
