Guns of Special Forces 2001 - 2015 Leigh Neville, 2016-03 In the years since 9/11 Special Forces of many nations have been in almost constant action in covert, high risk operations around the globe. These include the two long conflicts in Iraq and Afghanistan, fighting nationalist insurgents and jihadist terrorists, as well as other lesser known operations. The weapons used by SF are a constant source of interest and speculation, as are SF training, methods and vehicles. The armories of these elite units have developed rapidly to meet their demands and the ever more sophisticated threat. They include for example suppressed piston-driven carbines, programmable grenade launchers that airburst behind hidden enemy and sniper rifles of extreme accuracy and range. This highly researched book gives the reader a privileged insight into this secret world exploring the custom-built weapons that operators carry on capture/kill missions in the 21st Century.

Children at War Peter W. Singer, 2015-03-04 *Children at War* is the first comprehensive book to examine the growing and global use of children as soldiers. P.W. Singer, an internationally recognized expert in twenty-first-century warfare, explores how a new strategy of war, utilized by armies and warlords alike, has targeted children, seeking to turn them into soldiers and terrorists. Singer writes about how the first American serviceman killed by hostile fire in Afghanistan—a Green Beret—was shot by a fourteen-year-old Afghan boy; how suspected militants detained by U.S. forces in Iraq included more than one hundred children under the age of seventeen; and how hundreds who were taken hostage in Thailand were held captive by the rebel God's Army, led by twelve-year-old twins. Interweaving the voices of child soldiers throughout the book, Singer looks at the ways these children are recruited, abducted, trained, and finally sent off to fight in war-torn hot spots, from Colombia and the Sudan to Kashmir and Sierra Leone. He writes about children who have been indoctrinated to fight U.S. forces in Iraq and Afghanistan; of Iraqi boys between the ages of ten and fifteen who had been trained in military arms and tactics to become Saddam Hussein's Ashbal Saddam (Lion Cubs); of young refugees from Pakistani madrassahs who were recruited to help bring the Taliban to power in the Afghan civil war. The author, National Security Fellow at the Brookings Institution and director of the Brookings Project on U.S. Policy Towards the Islamic World, explores how this phenomenon has come about, and how social disruptions and failures of development in modern Third World nations have led to greater global conflict and an instability that has spawned a new pool of recruits. He writes about how technology has made today's weapons smaller and lighter and therefore easier for children to carry and handle; how one billion people in the world live in developing countries where civil war is part of everyday life; and how some children—without food, clothing, or family—have volunteered as soldiers as their only way to survive. Finally, Singer makes clear how the U.S. government and the international community must face this new reality of modern warfare, how those who benefit from the recruitment of children as soldiers must be held accountable, how Western militaries must be prepared to face children in battle, and how rehabilitation programs can undo this horrific phenomenon and turn child soldiers back into children.

TASER® Conducted Electrical Weapons: Physiology, Pathology, and Law Mark W. Kroll, Jeffrey D. Ho, 2009-02-27 TASER® Conducted Electrical Weapons are rapidly replacing the club for law-enforcement control of violent subjects within many countries around the globe. A TASER CEW is a hand-held device that delivers a 400-volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6.5 meters over tiny wires. If necessary, it begins with an arcing voltage of 50,000 V to penetrate thick clothing; the 50,000 V is never delivered to the body itself. Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation, this book will have significant

utility. This volume is written for cardiologists, emergency physicians, pathologists, law enforcement management, corrections personnel, and attorneys.

Firearms in the American West, 1700–1900 Martin Pegler, 2002 For two hundred years the great wilderness of the American West was being opened up and slowly destroyed by settlers from the east. Their prime tool was the gun, and the longarm and pistol have achieved legendary status in the folklore of the Wild West. *Firearms of the American West* tells the story of the guns used in the West during this period, which included the Indian Wars, the Civil War and the Gold Rushes. Copiously illustrated, no Western fan or gun enthusiast will want to be without this book.

Nonlethal Weapons and Capabilities Graham T. Allison, Paul X. Kelley, Richard L. Garwin, 2004 By providing an intermediate option between don't shoot and shoot, the Task Force observes, nonlethal weapons (NLW) have enormous potential in the new military roles of modern combat. Wider integration of existing types of NLW into the U.S. Army and Marine Corps could have helped to reduce the damage done by widespread looting and sabotage after the cessation of major conflict in Iraq. This Independent Task Force report on *Nonlethal Weapons and Capabilities* finds that incorporating these and additional forms of nonlethal capabilities into the equipment, training, and doctrine of the armed services could substantially improve U.S. military effectiveness.

The Rifle Story John Walter, 2006 This is a book about Nature for naughty kids. Nice kids learn about the life-cycle of the monarch butterfly and tadpoles turning into frogs. Naughty kids want to know about squashed hedgehogs and dead pukeko. Nice kids like to look at books with pretty pictures of puppy dogs and kittens. Naughty kids would rather see blood and guts and maggots. And rats. Lots of rats. Don't forget the rats. Age 9+

The Krag Rifle Story Franklin B. Mallory, Ludwig Elmer Olson, 1979

Small Arms Survey 2013 Small Arms Survey, Geneva, 2013-07-04 The *Small Arms Survey 2013* explores the many faces of armed violence outside the context of armed conflict. Chapters on the use of firearms in intimate partner violence, the evolution of gangs in Nicaragua, Italian organised crime groups, and trends in armed violence in South Africa describe the dynamics and effects of gun violence in the home and on the street. Many of the chapters in the 'weapons and markets' section zero in on the use of specific weapons by particular armed actors, such as drug-trafficking organisations and insurgents. These include chapters on the prices of arms and ammunition at illicit markets in Lebanon, Pakistan and Somalia; illicit weapons recovered in Mexico and the Philippines; and the impacts of improvised explosive devices on civilians. Chapters on the Second Review Conference of the UN Programme of Action and the industrial demilitarisation industry round out the 2013 volume.

Winning the War John B. Alexander, Ph.D., 2007-04-01 Twenty-second century historians will note that a new World War began on 9/11/2001. In reality, it began much earlier. Competing value systems and the lust for natural resources will precipitate an inevitable clash of civilizations. Currently, we face elusive foes-foes who play by other rules-and in fact, we are already engaged in brutal, truly asymmetric conflict with varied forms of fighting; terrorism is but an isolated part. The increasing number of polymorphic hostilities requires revolutionary and unconventional responses. Special operations are the norm. Nanoscale, biological, and digital technologies have transformed how we fight future wars. Tactical lasers that zap pinpoint targets at twenty kilometers are being developed, as is the millimeter-wave Active Denial System that causes intense pain to those exposed. The Mother of all Bombs has been dropped, as have thermobaric weapons that destroy caves and bunkers. Robots roam the battlefield while exotic sensors catalogue nearly every facet of our lives. Paralyzing electrical shock weapons are in

the hands of police. Even phasers on stun are closer than you think. Winning the War details the technologies and concepts necessary to ultimately determine the outcome of this global conflict. Via realistic scenarios from recovering tourists kidnapped by terrorists, to bringing down drug cartels in the Amazon, and even preventing Armageddon in the Middle East, Winning the War provides an insider's view into how these futuristic weapons will be used and into the complexities of modern warfare. Bold and controversial measures are prescribed, including the essential nature of absolute domination of space. Winning the War makes clear that drastic and innovative actions will be necessary to ensure our national survival.

Weaponomics: the global market for assault rifles Phillip Killicoat, 2007
Abstract: This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross-country time-series price index of Kalashnikov assault rifles. A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices. Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation. When controlling for other factors, the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed.

Future War John B. Alexander, Ph.D., 2010-04-01 The nature of warfare has changed! Like it or not, terrorism has established a firm foothold worldwide. Economics and environmental issues are inextricably entwined on a global basis and tied directly to national regional security. Although traditional threats remain, new, shadowy, and mercurial adversaries are emerging, and identifying and locating them is difficult. Future War, based on the hard-learned lessons of Bosnia, Haiti, Somalia, Panama, and many other trouble spots, provides part of the solution. Non-lethal weapons are a pragmatic application of force, not a peace movement. Ranging from old rubber bullets and tear gas to exotic advanced systems that can paralyze a country, they are essential for the preservation of peace and stability. Future War explains exactly how non-lethal electromagnetic and pulsed-power weapons, the laser and tazer, chemical systems, computer viruses, ultrasound and infrasound, and even biological entities will be used to stop enemies. These are the weapons of the future.

AK-47 Larry Kahaner, 2010-12-22 No single weapon has spread so much raw power to so many people in so little time—and had such a devastating effect—as the AK-47 assault rifle. This book examines the legacy of this world-changing weapon, from its creation as means of fighting the Nazis to its ubiquity today in every kind of conflict, from civil wars in Africa to gang wars in L.A.

Annual Report of the Chief of Ordnance ... United States. Army. Ordnance Department, U.S. Ordnance dept, 1874

Violence of Action Marty Skovlund, Charles Faint, Leo Jenkins, 2017-05-20 These are the stories of the 75th Ranger Regiment during the The Global War on Terrorism (GWOt) from 911 - 2011. These events/missions forever changed the world view of Special Operations Forces. The 75th is a small but essential part of an elite fraternity of quiet professionals who selflessly dedicate their lives to protecting our freedom.

Small Arms Survey 2003, 2003 This title includes information and analysis on global small arms production, stockpiles and legal and illicit transfers, and a review of international, regional and national measures to address the issue of small arms proliferation.

Conflict and Fragility Armed Violence Reduction Enabling Development OECD, 2009-03-02 Each year, 740 000 people die as a result of armed violence. This publication will help the international community to understand the dynamics of armed violence and outlines what can be done to reduce it.

American Rifle Alexander Rose, 2009-09-29 George Washington insisted that

his portrait be painted with one. Daniel Boone created a legend with one. Abraham Lincoln shot them on the White House lawn. And Teddy Roosevelt had his specially customized. In this first-of-its-kind book, historian Alexander Rose delivers a colorful, engrossing biography of an American icon: the rifle. Drawing on the words of foot soldiers, inventors, and presidents, based on extensive new research, and spanning from the Revolution to the present day, *American Rifle* is a balanced, wonderfully entertaining history of the rifle and its place in American culture.
