Those operations include war (characterized by large-scale, sustained combat operations) and other military operations that focus on deterring aggression, resolving conflict, promoting peace, and supporting civil authorities. These operations can occur before, during, and after combat operations. Marines always need to be prepared to carry out their mission and adapt to changing levels of threat and unexpected situations. Whenever the situation warrants the application of deadly force, the Marine rifleman must be able to deliver well-aimed shots to eliminate the adversary. Marines must have the versatility, flexibility, and skills to deal with a situation at any level of intensity across the entire range of military operations. Combat-ready Marines must be skilled in tactics and proficient in the use of firearms. Well-trained Marines will have the confidence required to deliver accurate fire under the most adverse battle conditions. The Service rifle is the primary tool that an individual Marine uses to obtain dominance over the enemy and neutralize the effects of enemy weapons. The Marine Corps Combat Rifle Program progresses the individual Marine from the fundamentals of marksmanship to advanced combat shooting, ensuring the ability to masterfully employ the Service rifle under all conditions.

Small Wars Manual United States Marine Corps, 2021-12-03 The Small Wars Manual is a manual on tactics and strategies for engaging in certain types of military operations created by the United States Marine Corps. The purpose of this work is sharing experience and preserving the achievements of tactics and organization of small wars, or different military operations of the United States in countries where government is unstable, inadequate, or unsatisfactory for the preservation of life and of such interests as are determined by the foreign policy of the United States. The book starts with the definition of the term small war and continues into more than 500 pages on tactics, personnel structure, communication chain, transportation and logistics, military-civil relationship, psychological side of war, training, and support of native armed organizations and much more. The book is extremely interesting as a manual on tactics, whether it is used for a military operation or any other sort of massive campaign involving a large part of population, like elections. For example, it contains a chapter telling how to plan and organize legally the disarmament of local population.
