Rifle Marksmanship U. S. Marine Corps, 2005-01-01 All Marines share a common warfighting belief: Every Marine a rifleman. This simple credo reinforces the belief that all Marines are forged from a common experience, share a common set of values, and are trained as members of an expeditionary force in readiness. As such, there are no rear area Marines, and no one is very far from the fighting during expeditionary operations. The Marine rifleman of the next conflict will be as in past conflicts: among the first to confront the enemy and the last to hang his weapon in the rack after the conflict is won. *Rifle Marksmanship*, a Marine Corps Reference Publication, provides techniques and procedures for Marine Corps rifle marksmanship. Every Marine is first and foremost a rifleman. *Rifle Marksmanship* reflects this ethos and the Marine Corps' warfighting philosophy. This publication discusses the individual skills required for effective rifle marksmanship and standardizes the techniques and procedures used throughout the Marine Corps. It constitutes the doctrinal basis for all entry-level and sustainment-level rifle marksmanship training.

The M16 Gordon L. Rottman, 2011-12-20 The M16 was first introduced in 1958 and was revolutionary for its time as it was made of lightweight materials including special aluminum and plastics. It was first adopted by US Special Forces and airborne troops in 1962 before it was issued to Army and Marine units serving in Vietnam. Its use spread throughout the following decades and a number of variants including submachine and carbine versions were

also fielded. As a result it is now amongst the three most used combat cartridges in the world while over 10 million M16s and variants have been produced making it one of the most successful American handheld weapons in history. But despite its undeniable success the M16 is not without its detractors. Indeed, the "black rifle", as it is known, is one of the most controversial rifles ever introduced with a long history of design defects, ruggedness issues, cleaning difficulties and reliability problems leading to endless technical refinements. This volume provides a technical history of the M16 and the struggle to perfect it together with an assessment of its impact on the battlefield drawing on over a decade's combat experience with the rifle.

The AK-47 Gordon L. Rottman, 2011-05-03 A detailed, fully illustrated study of the most recognizable assault rifle ever produced. The Kalashnikov AK-47 is the most ubiquitous assault rifle in the world, with more AK-47s and its variants in use than any other individual small arm. Created by Senior Sergeant Mikhail Kalashnikov, and first adopted by the USSR soon after World War II, its production continues to this day, with an estimated 75 million produced worldwide. Supported by photographs and original artwork, this book takes a look at the complete history of the weapon, discussing its design, development, and usage, taking its story from the great armies of the Soviet Union to the insurgents and criminal gangs that often employ the weapon today.

U.S. Marines in Battle Timothy S. McWilliams, Nicolas J. Schlosser, U. S. Marine Corps History Division, 2014-07-23 This is a study of the Second Battle of Fallujah, also known as Operation Al-Fajr and Operation Phantom Fury. Over the course of November and December 2004, the I Marine Expeditionary Force conducted a grueling campaign to clear the city of Fallujah of insurgents and end its use as a base for the anticoalition insurgency in western Iraq. The battle involved units from the Marine Corps, Army, and Iraqi military and constituted one of the largest engagements of the Iraq War. The study is based on interviews conducted by Marine Corps History Division field historians of battle participants and archival material. The book will be of primary interest to Marines, other service members, policy makers, and the faculty and students at the service schools and academies. Historians, veterans, high school through university history departments and students as well as libraries may be interested in this book as well. With full color maps and photographs.

Sherman R. P. Hunnicutt, 2015-03-26 In *Sherman: A History of the American Medium Tank*, R. P. Hunnicutt provides the comprehensive history of the technological evolution that led to the production of Sherman M4 in 1942 and its

development, variants, and modifications. Although the Sherman was part of the US pre-war development program, its adaptability to conditions on the front led to extensive British innovations drawn from battle experience. As WWII raged on, these modifications transformed the Sherman into a highly specialized workhorse of the Anglo-American armored forces. Taking full advantage of the ease with which the Sherman absorbed modifications, British forces adapted Shermans as minesweepers, amphibious assault float tanks, bulldozers, flame throwers, CDL tanks for nighttime attacks, carriages for tank destroyers and self-propelled artillery, among other uses. The Sherman, the epitome of American prowess in mass production, played an integral role in infantry support and fought in every major theater of operation in WWII. Due to its reliability, adaptability, and sheer strength in numbers, the Sherman M4 served with unmatched longevity, and Hunnicutt touches upon the wide range of combat conditions that the M4 performed under, in addition to its post-WWII activity. Featuring over a thousand photos from the National Archives, diagrams, and detailed specifications, Hunnicutt's Sherman remains the definitive history of M4 for the military historian, professional soldier, and tank restorer. 1,368 black & white photos, 12 color plates Richard Pearce Hunnicutt (1926-2011) enlisted in the 7th Infantry Division in 1944 and in 1945 was promoted to sergeant and awarded the Silver Star for his heroic actions. After WWII, Hunnicutt earned a Masters in engineering from Stanford University under the GI Bill. In addition to being one of the most respected metallurgists in California, Hunnicutt wrote the definitive 10-volume history of the development and employment of American armored vehicles. As a tank historian and leading expert in the field, Hunnicutt was one of the founders of the US Army Ordnance Museum at Aberdeen Proving Ground, MD and was a close friend and frequent contributor to the Patton Museum at Fort Knox, KY.
