The Imperial Japanese Navy of the Russo-Japanese War Mark Stille, 2016-03-24 When the Imperial Japanese Navy destroyed Russia's battle fleet during the Russo-Japanese War, it marked the emergence of Japan as one of the world's major naval powers. Japan's navy had been built up over just two decades, with the IJN acquiring a fleet of modern foreign-built warships. Coupled with the IJN's leadership and high levels of training, this proved enough to destroy the fleet of one of the world's historic naval powers. This book explains in concise detail the IJN's fleet of 1904-1905, from its battleships and armored cruisers to the torpedo boats that launched 'the first great torpedo attack in history,' and outlines the history of the naval campaign against the Russian fleet.

*Russian Battleships and Cruisers of the Russo-Japanese War* Mark Lardas, 2019-10-31 This book examines the major warships of the Imperial Russian Navy which participated in the Russo-Japanese War. The focus is on the battleships, coastal defence warships, and cruisers of the Pacific Squadron and Baltic Squadron that fought during the war. It discusses in detail their design and development between the years of 1885 and 1905, concentrating particularly on battleships and cruisers. The book explores, in depth, the mutually influential relationship between Russian and foreign warship design, as Russia progressed from a reliance on foreign designs and shipyards towards an ability to produce its own influential ships, such as the Novik. The title also outlines the gripping operational history of the Russian warships which participated in the Russo-Japanese war, tracing their activity before and during the combat, as well as the post-war fate of those ships which were bombarded, scuttled, captured, or salvaged. Packed with contemporary photography and

full-colour illustrations, this title offers a detailed and definitive guide to the design, development, and destiny of the Russian warships which battled the Japanese in the Eastern seas.

*Imperial Biologists* Hideo Mohri, 2019-03-26 This book sheds light on a little-known aspect of the Imperial family of Japan: For three generations, members of the family have devoted themselves to biological research. Emperor Showa (Hirohito) was an expert on hydrozoans and slime molds. His son, Emperor Akihito, is an ichthyologist specializing in gobioid fishes, and his research is highly respected in the field. Prince Akishino, Emperor Akihito's son, is known for his research on giant catfish and the domestication of fowl, while Prince Hitachi, Emperor Akihito's brother, has conducted research on cancer in animals. The book shows how they became interested in biology, how seriously they were committed to their research, what their main scientific contributions are, and how their achievements are valued by experts at home and abroad. To commemorate the 60-year reign of Emperor Showa and his longtime devotion to biology, the International Prize for Biology was founded in 1985. The prize seeks to recognize and encourage researches in basic biology. A list of winners and a summary of their research are presented in the last part of the book. The author, an eminent biologist who has given lectures to the Imperial Family, explains their research and tells the fascinating story of biology and the Imperial Family of Japan. The

book is a valuable resource, not only for biology students and researchers, but also for historians and anyone interested in science and the Royal and Imperial families.

**The First Team** John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in

paperback for the first time to reach an even larger audience.

**Japan and Britain after 1859** Olive Checkland, 2003-08-29 In the years following Japan's long period of self-imposed isolation from the world, Japan developed a new relationship with the West, and especially with Britain, where relations grew to be particularly close. The Japanese, embarrassed by their perceived comparative backwardness, looked to the West to learn modern industrial techniques, including the design and engineering skills which underpinned them. At the same time, taking great pride in their own culture, they exhibited and sold high quality products of traditional Japanese craftsmanship in the West, stimulating a thirst for, and appreciation of, Japanese arts and crafts. This book examines the two-way bridge-building cultural exchange which took place between Japan and Britain in the years after 1859 and into the early years of the twentieth century. Topics covered include architecture, industrial design, prints, painting and photographs, together with a consideration of Japanese government policy, the Japan-Britain Exhibition of 1910, and commercial spin-offs. In addition, there are case studies of key individuals who were particularly influential in fostering British-Japanese cultural bridges in this period.

**Intra-Asian Trade and the World Market** A.J.H. Latham, Heita

Kawakatsu,2006-04-18 Intra-Asian trade is a major theme of recent writing on Asian economic history. From the second half of the nineteenth century, intra-Asian trade flows linked Asia into an integrated economic system, with reciprocal benefits for all participants. But although this was a network from which all gained, there was also considerable inter-Asian competition between Asian producers for these Asian markets, and those of the wider world. This collection presents captivating snap-shots of trade in specific commodities, alongside chapters comprehensively covering the region. The book covers: China's relative backwardness, Japanese copper exports, Japan's fur trade, Siam's luxury rice trade, Korea, Japanese shipbuilding, the silk trade, the refined sugar trade, competition in the rice trade, the Japanese cotton textile trade to Africa, multilateral settlements in Asia, the cotton textile trade to Britain, and the growth of the palm oil industry in Malaysia and Indonesia. The opening of Asia, especially in Japan and China, liberated the creative forces of the market within the new intra-Asian economy. Filling a particular gap in the literature on intra-Asian trade prior to the twentieth century, this is an insightful study that makes a considerable contribution to our knowledge of the Asian trade both prior to, and after, the arrival of colonial states. It will be of great interest to historians and economists focusing on Asia.

**Guadalcanal** Richard B. Frank, 1992-01-01 “Brilliant...an enormous work based on the most meticulous research.”—LA Times Book Review The battle at Guadalcanal—which began eight months to the day after Pearl Harbor—marked the first American offensive of World War II. It was a brutal six-month campaign that cost the lives of some 7,000 Americans and over 30,000 Japanese. This volume, ten years in the writing, recounts the full story of the critical campaign for Guadalcanal and is based on first-time translations of official Japanese Defense Agency accounts and recently declassified U.S. radio intelligence. Guadalcanal recreates the battle—on land, at sea, and in the air—as never before: it examines the feelings of both American and Japanese soldiers, the strategies and conflicts of their commanders, and the strengths and weaknesses of various fighting units.

**Shattered Sword** Jonathan Parshall, Anthony Tully, 2011 Many consider the Battle of Midway to have turned the tide of the Pacific War. It is without question one of the most famous battles in history. Now, for the first time since Gordon W. Prange's bestselling *Miracle at Midway*, Jonathan Parshall and Anthony Tully offer a new interpretation of this great naval engagement. Unlike previous accounts, *Shattered Sword* makes extensive use

of Japanese primary sources. It also corrects the many errors of Mitsuo Fuchida's *Midway: The Battle That Doomed Japan*, an uncritical reliance upon which has tainted every previous Western account. It thus forces a major, potentially controversial reevaluation of the great battle. The authors examine the battle in detail and effortlessly place it within the context of the Imperial Navy's doctrine and technology. With a foreword by leading WWII naval historian John Lundstrom, *Shattered Sword* will become an indispensable part of any military buff's library. Winner of the 2005 John Lyman Book Award for the Best Book in U.S. Naval History and cited by *Proceedings* as one of its Notable Naval Books for 2005.
