Celebrating 30 Years of the Space Shuttle, NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT-- OVERSTOCK SALE - Significantly reduced list price The Space Shuttle fleet set high marks of achievement and endurance through 30 years of missions, from its first on April 12, 1981, to its last, on July 21, 2011. Beginning with the orbiter Columbia and continuing with Challenger, Discovery, Atlantis, and Endeavour, the National Aeronautics and Space Administration's (NASA) Space Shuttle has carried people into orbit; launched, recovered, and repaired satellites; conducted cutting-edge research; and helped build the largest human made structure in space, the International Space Station. Replete with images and facts of each mission and crew, this book is a tribute to everything accomplished during the 30 years of operation of the Space Shuttle program that defined NASA for an entire generation. Space Shuttle, 1985

Space Shuttle Log Gene Gurney, Jeff Forte, 1988

Space Shuttle Marshall H. Kaplan, 1978

Linking the Space Shuttle and Space Stations David J. Shayler, 2017-06-27 How could the newly authorized space shuttle help in the U.S. quest to build a large research station in Earth orbit? As a means of transporting goods, the shuttle could help supply the parts to the station. But how would the two entities be physically linked? Docking technologies had to constantly evolve as the designs of the early space stations changed. It was hoped the shuttle would make missions to the Russian Salyut and American Skylab stations, but these were postponed until the Mir station became available, while plans for getting a new U. S. space station underway were stalled. In *Linking the Space Shuttle and Space Stations*, the author delves into the rich history of the Space Shuttle and its connection to these early space stations, culminating in the nine missions to dock the shuttle to Mir. By 1998, after nearly three decades of planning and operations, shuttle missions to Mir had resulted in: • A proven system to link up the space shuttle to a space station • Equipment and hands-on experience in handling tons of materials • An infrastructure to support space station assembly and resupply Each of these played a pivotal role in developing the skills and procedures crucial to the creation of the later, much larger and far more complex International Space Station, as described in the companion volume *Assembling and Supplying the ISS: The Space Shuttle Fulfills Its Mission*.

Space Shuttle Launch System 1972-2004 Mark Lardas, 2012-09-20 The Space Shuttle is one of the oldest and most famous manned launch systems – the only launch vehicle that has been used for a longer period of time is the Soviet (now Russian) R-7 booster. By the start of the third millennium, the Space Shuttle had carried crews into space over 85 times. Although not a military structure, the Shuttle had been sold as an all-purpose launch system to be used jointly for military and civilian purposes. Featuring full-colour photos throughout, this book covers the design, development and operational history of a unique vehicle.

Three Decades to a Space Shuttle D. M. Wylie, 2004 Three Decades to a Space Shuttle is the story of the evolution of space flight beginning with G force experiments in 1947 at Edwards Air Force Base. Visionary concepts followed in 1951 and an evolutionary progression to space flight eventually led to the first shuttle flight in 1981, three decades later. The expertise of the American engineering and scientific community is examined which

chronologically forged new technology. Columbia's first flight in 1981 was the culmination of a series of evolutionary steps, one at a time, over thirty years. The justifications of major budget allocations are shown and the resulting benefits to world populations are discussed. The space program and Government financing of private industry led to economical stability and brought our technical and scientific capability to a level not thought possible thirty years ago. Joint cooperation between American industry and government combined with foreign competition has enhanced world business and trade. A study of the past shows us what our possibilities can be in the future and what new frontiers we may experience.
