Reforming Korea's Industrial Conglomerates Edward Montgomery Graham,2003 In 1998, the Korean economy experienced the deepest recession since the Korean War. Within a year a number of smaller industrial conglomerates had failed. In this study, Graham examines the causes of this situation, tracing them back to the aggressive industrial policy begun by president Park Chung-hee during the late 1960s. He also analyzes reforms undertaken since 1997, concluding that they have not been entirely successful.

Economic Crisis and Corporate Restructuring in Korea Stephan Haggard,Wonhyuk Lim,Euysung Kim,2003-02-26 Asian business conglomerates have clearly been successful agents of growth, mobilizing capital, borrowing technology from abroad and spearheading Asia's exports. However, these firms have long had a number of organisational and financial weaknesses, including heavy reliance on debt, that make them vulnerable to shocks. Nowhere was this more true than in Korea, where the large corporate groups known as chaebol have dominated the economic landscape. This collection of essays by leading political scientists and economists provides a comprehensive look at the chaebol problem in the wake of the Asian financial crisis. The authors consider the historical evolution of the chaebol and their contribution to the onset of economic turmoil in 1997. The book analyses the government's short-run response to corporate and financial distress, and outlines an agenda for longer-term reform of the financial system, corporate governance and the politics of business-government relations.

The Economic and Strategic Rise of China and India D. Denoon,2007-09-03 This book demonstrates the connection between economic and strategic developments in Asia with several, interrelated arguments. The author asserts that there is no single explanation for the 1997 financial crisis in the Pacific Rim states, nor for the slow recovery afterwards. The author also points out that China is not the only major power rising in Asia; India is close behind, and warns that while many observers are proceeding as if current U.S. treaties will continue indefinitely, Asia is already preparing for changing patrons.

Re-Inventing Africa's Development Jong-Dae Park,2018-12-31 This open access book analyses the development problems of sub-Sahara Africa (SSA) from the eyes of a Korean diplomat with knowledge of the economic growth Korea has experienced in recent decades. The author argues that Africa's development challenges are not due to a lack of resources but a lack of management, presenting an alternative to the traditional view that Africa's problems are caused by a lack of leadership. In exploring an approach based on mind-set and nation-building, rather than unity – which tends to promote individual or party interests rather than the broader country or national interests – the author suggests new solutions for SSA's economic growth, inspired by Korea's successful economic growth model much of which is focused on industrialisation. This book will be of interest to researchers, policymakers, NGOs and governmental bodies in economics, development and politics studying Africa's economic development, and Korea's economic growth model.

OECD Economic Surveys: Korea 2018 OECD,2018-06-20 Economic growth picked up in 2017, but reforms are needed to sustain Korea's convergence toward the income levels in the most advanced countries. The Korean Financial Crisis of 1997—A Strategy of Financial Sector Reform Mr.Angel J. Ubide,Mr.Tomás J. T. Baliño,1999-03-01 After years of strong performance, Korea's economy entered a crisis in 1997, owing largely to structural problems in its financial and corporate sectors. These problems emerged in the second half of that year, when the capital inflows that had helped finance Korea's growth were reversed, as foreign investors—reeling from losses in other Southeast Asian economies—decided to reduce their exposure to Korea. This paper focuses on the sources of the crisis that originated in the financial sector, the measures taken to deal with it, and the evolution of key banking and financial variables in its aftermath.

Reforms, Opportunities, and Challenges for State-Owned Enterprises Edimon Ginting,Kaukab Naqvi,2020-07-01 State-owned enterprises (SOEs) play significant roles in developing economies in Asia and SOE performance remains crucial for economy-wide productivity and growth. This book looks at SOEs in Azerbaijan, Indonesia, Kazakhstan, the People's Republic of China, and Viet Nam, which together present a panoramic view of SOEs in the region. It also presents insights from the Republic of Korea on the evolving role of the public sector in various stages of development. It explores corporate governance challenges and how governments could reform SOEs to make them efficient drivers of the long-term productivity-induced growth essential to Asia's transition to high-income status.

A Nation at War John Robert Martin,2007 As the Nation approached the 5-year mark of the start of the GWOT, the USAWC focused the attention of its Seventeenth Annual Strategy Conference on whether or not the evidence supports the continuing assumption that the Nation is really at war. Some would insist that the answer is obviously yes. The conference studied this question in depth with panels on the homeland security aspects, the international context, the legal foundation for the war, and the associated economic and domestic policy issues. The conclusion was that the answer to the question is not as clear as first thought. Much of the evidence suggests that the Nation or at least some parts of it is not at war.--Page v.

Ensuring Quality to Gain Access to Global Markets Martin Kellermann, 2019-04-09 In a modern world with rapidly growing international trade, countries compete less based on the availability of natural resources, geographical advantages, and lower labor costs and more on factors related to firms' ability to enter and compete in new markets. One such factor is the ability to demonstrate the quality and safety of goods and services expected by consumers and confirm compliance with international standards. To assure such compliance, a sound quality infrastructure (QI) ecosystem is essential. Jointly developed by the World Bank Group and the National Metrology Institute of Germany, this guide is designed to help development partners and governments analyze a country's quality infrastructure ecosystems and provide recommendations to design and implement reforms and enhance the capacity of their QI institutions.

Reforms and Economic Transformation in India Jagdish Bhagwati, Arvind Panagariya, 2013 Reforms and Economic Transformation in India is the second volume in the series Studies in Indian Economic Policies. In this book, nine original essays pursue three interrelated themes: Why the movement of workers out of agriculture, into industry and services, and from informal to formal employments has been slow, explaining the impact the reforms have had on profitability and competition among enterprises, and analyzing the impact on the socially disadvantaged in terms of wage and education outcomes and entrepreneurship.

Entrepreneurial States Yves Tiberghien, 2018-07-05 In Entrepreneurial States, an innovative examination of the comparative politics of reform in stakeholder systems, Yves Tiberghien analyzes the modern partnership between the state and global capital in attaining structural domestic change. The emergence of a powerful global equity market has altered incentives for the state and presented political leaders with a golden bargain—the infusion of abundant and cheap capital into domestic stock markets in exchange for reform of corporate governance and other regulatory changes. Drawing on extensive archival research and interviews with policy and corporate elites in Europe and East Asia, Tiberghien asks why states such as Korea and France have embraced this opportunity and engaged in far-reaching reforms to make their companies more attractive to foreign capital, whereas Japan and Germany have moved forward much more grudgingly. Interest groups and electoral institutions have their impacts, but by tracing the unfolding dynamic of reform under different constraints, Tiberghien shows that the role of political entrepreneurs is critical. Such policy elites act as mediators between global forces and national constraints. As risk takers and bargain builders, Tiberghien finds, they use corporate reform to reshape their political parties and to stake out new policy ground. The degree of political autonomy available to them and the domestic organization of bureaucratic responsibility determine their ability to succeed.

Reforming China's State-owned Enterprises and Banks Becky Chiu, Mervyn Lewis, 2006-01-01 This book is informative and readable. It will be of interest to anyone wanting to learn about the development of the Chinese economy in general and the reforms of state-owned enterprises in particular. The data and in-depth discussion presented in the book will appeal to academics as well as policymakers. Yin-Fang Zhang, Journal of the Asia Pacific Economy China watchers will welcome a book which provides a detailed insight into the two pillars of that economy: the state-owned enterprises (SOEs) and the state-owned banks (SOBs). This is a scholarly work, rich in detail. Shelagh Heffernan, The Financial Regulator For China to sustain her transformation requires that she tackle reform of her state-owned enterprises (SOEs) and banks. This book comprehensively assesses the scale of the problem, reviews previous reforms and suggested solutions. Finally the authors propose their own reform agenda, sensitive to Chinese realities. Michael Artis, European University Institute, Italy This is an excellent study of the nexus between the effects of party control, the soft budget of state-owned enterprise (SOEs) and the financial fragility of the state-owned banking system (SOBs) in China. It is both sympathetic and knowledgeable about the problems of achieving reform and progress. Beautifully written, it should become the most influential work in this field in the English-speaking world. Charles A.E. Goodhart, London School of Economics, UK This book's starting point is that after two decades of experiments, during which other transition economies have effectively privatised all of their former state enterprises, China is still endeavouring to find a way to reinvent and re-engineer its own state-owned economic establishments. The authors explore these reforms along with the problems of China's state-owned banks, which have long been troubled by the adverse loans of Chinese enterprises and face foreign competition in 2007 under China's WTO commitments. Drawing on wide-ranging case studies of enterprise reform, Becky Chiu and Mervyn Lewis combine their extensive experience to give an authoritative account of China's enterprise and bank reform agenda, involving property rights, improved corporate governance and stimulating enterprise. This book will be of great interest to business economists, academic economists and those following the development of the Chinese economy.
