Family Lineage Organization and Social Change in Ming and Qing Fujian Zhenman Zheng, 2001-01-01 This work is the result of more than a decade of research on the Chinese household and lineage in the southeastern province of Fujian during the Ming and Qing period (1368-1911). It offers new interpretations of the Chinese domestic cycle, the relationship between household and larger kinship groups, and the development of lineage society in south China. Using hundreds of previously unknown lineage genealogies, stone inscriptions, and land deeds, Zheng Zhenman provides a candid view of how individuals and families confronted the crucial issues of daily life: how to minimize taxes or military conscription; how to balance the ideological imperatives of ancestor worship with practical concerns; how to deal with the problems of dividing the household estate. His research leads to an exploration of issues such as the relation of state to society and the compatibility of Chinese culture and capitalism. This complete translation allows access to some of the most exciting new research being done in Chinese social history. Zheng's book draws on important materials largely unknown to Western scholars, comes to novel conclusions about society in late imperial China, and illustrates the importance of the non-Western perspective in studying the history of the world outside the West.

State and Crafts in the Qing Dynasty (1644-1911) Christine Moll-Murata, 2018 This book, full of quantitative evidence and limited-circulation archives, details manufacturing and the beginnings of industrialisation in China from 1644 to 1911. It thoroughly examines the interior organisation of public craft production and the complementary activities of the private sector. It offers detailed knowledge of shipbuilding and printing. Moreover, it contributes to the research of labour history and the rise of capitalism in China through its examination of living conditions, working conditions, and wages.

Daily Life for the Common People of China, 1850 to 1950 Ronald Suleski, 2018-10-22 In this exciting book, Ronald Suleski introduces daily life for the common people of China in the century from 1850 to 1950. They were semi-literate, yet they have left us written accounts of their hopes, fears, and values. They have left us the hand-written manuscripts (chaoben 抄本) now flooding the antiques markets in China. These documents represent a new and heretofore overlooked category of historical sources. Suleski gives a detailed explanation of the interaction of chaoben with the lives of the people. He offers examples of why they were so important to the poor laboring masses: people wanted horoscopes predicting their future, information about the ghosts causing them headaches, a few written words to help them trade in the rural markets, and many more examples are given. The book contains a special appendix giving the first complete translation into English of a chaoben describing the ghosts and goblins that bedeviled the poor working classes.

Chinese Cinderella Adeline Yen Mah, 2009-05-06 More than 800,000 copies in print! From the author of critically acclaimed and bestselling memoir *Falling Leaves*, this is a poignant and moving true account of her childhood, growing up as an unloved daughter in 1940s China. A Chinese proverb says, Falling leaves return to their roots. In her own courageous voice, Adeline Yen Mah returns to her roots to tell the story of her painful childhood and her ultimate triumph in the face of despair. Adeline's affluent, powerful family considers her bad luck after her mother dies giving birth to her, and life does not get any easier when her father remarries. Adeline and her siblings are subjected to the disdain of her stepmother, while her stepbrother and stepsister are spoiled with gifts and attention. Although Adeline wins prizes at school, they are not enough to compensate for what she really yearns for -- the love and understanding of her family. Like the classic Cinderella story, this powerful memoir is a moving story of resilience and hope. Includes an Author's Note, a 6-page photo insert, a historical note, and the Chinese text of the original Chinese Cinderella. The Works of Li Qingzhao Ronald Egan, 2019-01-29 Previous translations and descriptions of Li Qingzhao are molded by an image of her as lonely wife and bereft widow formed by centuries of manipulation of her work and legacy by scholars and critics (all of them male) to fit their idea of what a talented woman writer would sound like. The true voice of Li Qingzhao is very different. A new translation and presentation of her is needed to appreciate her genius and to account for the sense that Chinese readers have always had, despite what scholars and critics were saying, about the boldness and originality of her work. The introduction will lay out the problems of critical refashioning and conventionalization of her carried out in the centuries after her death, thus preparing the reader for a new reading. Her songs and poetry will then be presented in a way that breaks free of a narrow autobiographical reading of them, distinguishes between reliable and unreliable attributions, and also shows the great range of her talent by including important prose pieces and seldom read poems. In this way, the standard image of Li Qingzhao, exemplified by a handful of her best known and largely misunderstood works, will be challenged and replaced by a new understanding. The volume will present a literary portrait of Li Qingzhao radically unlike the one in conventional anthologies and literary histories, allowing English readers for the first time to appreciate her distinctiveness as a writer and to properly gauge her achievement as a female alternative, as poet and essayist, to the male literary culture of her day.

Linguistic Engineering Ji Fengyuan, 2003-11-30 When Mao and the Chinese Communist Party won power in 1949, they were determined to create new, revolutionary human beings. Their most precise instrument of ideological transformation was a massive program of linguistic engineering. They taught everyone a new political vocabulary, gave old words new meanings, converted traditional terms to revolutionary purposes, suppressed words that expressed incorrect thought, and required the whole population to recite slogans, stock phrases, and scripts that gave correct linguistic form to correct thought. They assumed that constant repetition would cause the revolutionary formulae to penetrate people's minds, engendering revolutionary beliefs and values. In an introductory chapter, Dr. Ji assesses the potential of linguistic engineering by examining research on the relationship between language and thought. In subsequent chapters, she traces the origins of linguistic engineering in China, describes its development during the early years of communist rule, then explores in detail the unprecedented manipulation of language during the Cultural Revolution of 1966–1976. Along the way, she analyzes the forms of linguistic engineering associated with land reform, class struggle, personal relationships, the Great Leap Forward, Mao-worship, Red Guard activism, revolutionary violence, Public Criticism Meetings, the model revolutionary operas, and foreign language teaching. She also reinterprets Mao's strategy during the early stages of the Cultural Revolution, showing how he manipulated exegetical principles and contexts of judgment to frame his alleged opponents. The work concludes with an assessment of the successes and failures of linguistic engineering and an account of how the Chinese Communist Party relaxed its control of language after Mao's death.

After Confucius Paul R. Goldin, 2017-04-01 *After Confucius* is a collection of eight studies of Chinese philosophy from the time of Confucius to the formation of the empire in the second and third centuries B.C.E. As detailed in a masterful introduction, each essay serves as a concrete example of "thick description"—an approach invented by philosopher Gilbert Ryle—which aims to reveal the logic that informs an observable exchange among members of a community or society. To grasp the significance of such exchanges, it is necessary to investigate the networks of meaning on which they rely. Paul R. Goldin argues that the character of ancient Chinese philosophy can be appreciated only if we recognize the cultural codes underlying the circulation of ideas in that world. Thick description is the best preliminary method to determine how Chinese thinkers conceived of their own enterprise. Who were the ancient Chinese philosophers? What was their intended audience? What were they arguing about? How did they respond to earlier thinkers, and to each other? Why did those in power wish to hear from them, and what did they claim to offer in return for patronage? Goldin addresses these questions as he looks at several topics, including rhetorical conventions of Chinese philosophical literature; the

value of recently excavated manuscripts for the interpretation of the more familiar, received literature; and the duty of translators to convey the world of concerns of the original texts. Each of the cases investigated in this wide-ranging volume exemplifies the central conviction behind Goldin's plea for thick description: We do not do justice to classical Chinese philosophy unless we engage squarely the complex and ancient culture that engendered it. Japanese Death Poems ,1998-04-15 A wonderful introduction the Japanese tradition of jisei, this volume is crammed with exquisite, spontaneous verse and pithy, often hilarious, descriptions of the eccentric and committed monastics who wrote the poems. --Tricycle: The Buddhist Review Although the consciousness of death is, in most cultures, very much a part of life, this is perhaps nowhere more true than in Japan, where the approach of death has given rise to a centuries-old tradition of writing jisei, or the death poem. Such a poem is often written in the very last moments of the poet's life. Hundreds of Japanese death poems, many with a commentary describing the circumstances of the poet's death, have been translated into English here, the vast majority of them for the first time. Yoel Hoffmann explores the attitudes and customs surrounding death in historical and present-day Japan and gives examples of how these have been reflected in the nation's literature in general. The development of writing jisei is then examined--from the longing poems of the early nobility and the more masculine verses of the samurai to the satirical death poems of later centuries. Zen Buddhist ideas about death are also described as a preface to the collection of Chinese death poems by Zen monks that are also included. Finally, the last section contains three hundred twenty haiku, some of which have never been assembled before, in English translation and romanized in Japanese.

The Poetry of Du Fu Stephen Owen,2015-11-13 The Complete Poetry of Du Fu presents a complete scholarly translation of Chinese literature alongside the original text in a critical edition. The English translation is more scholarly than vernacular Chinese translations, and it is compelled to address problems that even the best traditional commentaries overlook. The main body of the text is a facing page translation and critical edition of the earliest Song editions and other sources. For convenience the translations are arranged following the sequence in Qiu Zhao'an's *Du shi xiangzhu* (although Qiu's text is not followed). Basic footnotes are included when the translation needs clarification or supplement. Endnotes provide sources, textual notes, and a limited discussion of problem passages. A supplement references commonly used allusions, their sources, and where they can be found in the translation. Scholars know that there is scarcely a Du Fu poem whose interpretation is uncontested. The scholar may use this as a baseline to agree or disagree. Other readers can feel confident that this is a credible reading of the text within the tradition. A reader with a basic understanding of the language of Chinese poetry can use this to facilitate reading Du Fu, which can present problems for even the most learned reader.

New Qing Imperial History Ruth W. Dunnell,Mark C. Elliott,Philippe Foret,James A Millward,2004-07-31 New Qing Imperial History uses the Manchu summer capital of Chengde and associated architecture, art and ritual activity as the focus for an exploration of the importance of Inner Asia and Tibet to the Qing Empire (1636-1911). Well-known contributors argue that the Qing was not simply another Chinese dynasty, but was deeply engaged in Inner Asia not only militarily, but culturally, politically and ideologically. Emphasizing the diverse range of peoples in the Qing empire,

this book analyzes the importance to Chinese history of Manchu relations with Tibetan prelates, Mongolian chieftains, and the Turkic elites of Xinjiang. In offering a new appreciation of a culturally and politically complex period, the authors discuss the nature and representation of emperorship, especially under Qianlong (r. 1736-1795), and examine the role of ritual in relations with Inner Asia, including the vaunted (but overrated) tribute system. By using a specific artifact or text as a starting point for analysis in each chapter, the contributors not only include material previously unavailable in English but allow the reader an intimate knowledge of life at Chengde and its significance to the Qing period as a whole.

The Making of an Economic Superpower Yi Wen, 2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution. Mainstream economics, especially the institutional theory of economic development based on a dichotomy of extractive vs. inclusive political institutions, is highly inadequate in explaining China's rise. This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West (as incorrectly portrayed by the institutional theory) can fully explain China's growth miracle and why the determined rise of China is unstoppable despite its current backward financial system and political institutions. Conversely, China's spectacular and rapid transformation from an impoverished agrarian society to a formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream blackboard economic models, and provides more-accurate reevaluations of historical episodes such as Africa's enduring poverty trap despite radical political and economic reforms, Latin America's lost decades and frequent debt crises, 19th century Europe's great escape from the Malthusian trap, and the Industrial Revolution itself. Contents: Introduction Key Steps Taken by China to Set Off an Industrial Revolution Shedding Light on the Nature and Cause of the Industrial Revolution Why is China's Rise Unstoppable? What's Wrong with the Washington Consensus and the Institutional Theories? Case Study of Yong Lian: A Poor Village's Path to Becoming a Modern Steel Town Conclusion: A New Stage Theory of Economic Development Readership: Academics, undergraduate and graduates students, journalists and professionals interested in economic development, the history of the Industrial Revolution, and especially China's economic transformation and industrial growth, as well as the political economy of governance.

Why Did Europe Conquer the World? Philip T. Hoffman, 2017-01-24 The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914, Europeans conquered 84 percent of the globe. But why did Europe establish global dominance, when for centuries the Chinese, Japanese, Ottomans, and South Asians were far more advanced? In *Why Did Europe Conquer the World?*, Philip Hoffman demonstrates that conventional explanations—such as geography, epidemic disease, and the Industrial Revolution—fail to provide answers. Arguing instead for the pivotal role of economic and political history, Hoffman shows that if certain variables had been different, Europe would have been eclipsed, and another power could have become master of the world. Hoffman sheds light on the two millennia of economic, political, and historical changes that set European states on a distinctive path of development, military rivalry, and war. This resulted in astonishingly rapid growth in Europe's military sector, and produced an insurmountable lead in gunpowder technology. The consequences determined which states established colonial empires or ran the slave trade, and even which economies were the first to industrialize. Debunking traditional arguments, *Why Did Europe Conquer the World?* reveals the startling reasons behind Europe's historic global supremacy.

China Made Karl Gerth, 2020-05-11 “Chinese people should consume Chinese products!” This slogan was the catchphrase of a movement in early twentieth-century China that sought to link consumption and nationalism by instilling a concept of China as a modern “nation” with its own “national products.” From fashions in clothing to food additives, from museums to department stores, from product fairs to advertising, this movement influenced all aspects of China’s burgeoning consumer culture. Anti-imperialist boycotts, commemorations of national humiliations, exhibitions of Chinese products, the vilification of treasonous consumers, and the promotion of Chinese captains of industry helped enforce nationalistic consumption and spread the message—patriotic Chinese bought goods made of Chinese materials by Chinese workers in factories owned and run by Chinese. In *China Made*, Karl Gerth argues that two key forces shaping the modern world—nationalism and consumerism—developed in tandem in China. Early in the twentieth century, nationalism branded every commodity as either “Chinese” or “foreign,” and consumer culture became the place where the notion of nationality was articulated, institutionalized, and practiced. Based on Chinese, Japanese, and English-language archives, magazines, newspapers, and books, this first exploration of the historical ties between nationalism and consumerism reinterprets fundamental aspects of modern Chinese history and suggests ways of discerning such ties in all modern nations.
