*It's How We Play the Game* Ed Stack,2020-05-05 Porchlight's Best Leadership & Strategy Book of The Year An inspiring memoir from the CEO of DICK's Sporting Goods that is "not only entertaining but will be of great value to any entrepreneur" (Phil Knight, New York Times bestselling author of Shoe Dog), this book shows how a trailblazing business was created by giving back to the community and by taking principled, and sometimes controversial, stands—including against the type of weapons that are too often used in mass shootings and other tragedies. It's How We Play the Game tells the story of a complicated founder and an ambitious son—one who transformed a business by making it about more than business, conceiving it as a force for good in the communities it serves. In 1948, Ed Stack's father started Dick's Bait and Tackle in Binghamton, New York. Ed Stack bought the business from his father in 1984, and grew it into the largest sporting goods retailer in the country, with 800 locations and close to \$9 billion in sales. The transformation Ed wrought wasn't easy: economic headwinds nearly toppled the chain twice. But DICK's support for embattled youth sports programs earned the stores surprising loyalty, and the company won even more attention when, in the wake of yet another school shooting—at Marjory Stoneman Douglas High School in Parkland, Florida—it chose to become the first major retailer to pull all semi-automatic weapons from its shelves, raise the age of gun purchase to twenty-one, and, most strikingly, destroy the assault-style-type rifles then in its inventory. With vital lessons for anyone running a business and eye-opening reflections about what a company owes the people it serves, It's How We Play the Game is "a compelling narrative...In a genre that can frequently be staid, Mr. Stack's corporate biography is deeply personal...[Features] surprising openness [and] interesting and humorous anecdotes" (Pittsburgh Post-Gazette).

**Gear Acquisition Syndrome** Jan-Peter Herbst,Jonas Menze,2021-04-19 Gear Acquisition Syndrome, also known as GAS, is commonly understood as the musicians unrelenting urge to buy and own instruments and equipment as an anticipated catalyst of creative energy and bringer of happiness. For many musicians, it involves the unavoidable compulsion to spend money one does not have on gear perhaps not even needed. The urge is directed by the belief that acquiring another instrument will make one a better player. This book pioneers research into the complex phenomenon named GAS from a variety of disciplines, including popular music studies and music technology, cultural and leisure studies, consumption research, sociology, psychology and psychiatry. The newly created theoretical framework and empirical studies of online communities and offline music stores allow the study to consider musical, social and personal motives, which influence the way musicians think about and deal with equipment. As is shown, GAS encompasses a variety of practices and psychological processes. In an often life-long endeavour, upgrading the rig is accompanied by musical learning processes in popular music.

**Artificial Intelligence and Inclusive Education** Jeremy Knox,Yuchen Wang,Michael Gallagher,2019-06-13 This book brings together the fields of artificial intelligence (often known as A.I.) and inclusive education in order to speculate on the future of teaching and learning in increasingly diverse social, cultural, emotional, and linguistic educational contexts. This book addresses a pressing need to understand how future educational practices can promote equity and equality, while at the same time adopting A.I. systems that are oriented towards automation, standardisation and efficiency. The contributions in this edited volume appeal to scholars and students with an interest in forming a critical understanding of the development of A.I. for education, as well as an interest in how the processes of inclusive education might be shaped by future technologies. Grounded in theoretical engagement, establishing key challenges for future practice, and outlining the latest research, this book offers a comprehensive overview of the complex issues arising from the convergence of A.I. technologies and the necessity of developing inclusive teaching and learning. To date, there has been little in the way of direct association between research and practice in these domains: A.I. has been a predominantly technical field of research and development, and while intelligent computer systems and 'smart' software are being increasingly applied in many areas of industry, economics, social life, and education itself, a specific engagement with the agenda of inclusion appears lacking. Although such technology offers exciting possibilities for education, including software that is designed to 'personalise' learning or adapt to learner behaviours, these developments are accompanied by growing concerns about the in-built biases involved in machine learning techniques driven by 'big data'.

*The New Digital Natives* Alexei Dingli,Dylan Seychell,2015-03-17 The first generation of Digital Natives (DNs) is now growing up. However, these digital natives were rather late starters since; their exposure to computers started when they could master the mouse and the penetration of computers in educational institutions was still very low. Today, a new breed of digital natives is emerging. This new breed includes those individuals who are being introduced from their first instances to the world of wireless devices. One year olds manage to master the intuitive touch interfaces of their tablets whilst sitting comfortably in their baby bouncers. The controller-less interfaces allow these children to interact with a machine in a way which was unconceivable below. Thus, our research investigated the paradigm shift between the different generations of digital natives. We analysed the way in which these two generations differ from each other and we explored how the world needs to change in order to harness the potential of these new digital natives.

*Wes Anderson* Eva Minguet,2019-09 Who would not want to live in a Wes Anderson movie? This is a tribute book to Wes Anderson and the universe he has created. It highlights his most prominent characters such as Margot, Mr Fox, Sam and Suzy, Zero, Steve Zissou--his vintage trend, his nostalgic touch, his meticulously arranged sets, and his obsession with symmetry. Twenty-two international artists unveil their most personal perspectives through one or several illustrations, additionally expressing in a sentence what this wonderful, timeless, and sympathetic filmmaker means to them.

*The Encyclopedia of Indianapolis* David J. Bodenhamer, Robert G. Barrows, 1994-11-22 A work of this magnitude and high quality will obviously be indispensable to anyone studying the history of Indianapolis and its region. -- The Journal of American History ... absorbing and accurate... Although it is a monument to Indianapolis, do not be fooled into thinking this tome is impersonal or boring. It's not. It's about people: interesting people. The Encyclopedia of Indianapolis is as engaging as a biography. -- Arts Indiana ... comprehensive and detailed... might well become the model for other such efforts. -- Library Journal With more than 1,600 separate entries and 300 illustrations, The Encyclopedia of Indianapolis is a model of what a modern city encyclopedia should be. From the city's inception through its remarkable transformation into a leading urban center, the history and people of Indianapolis are detailed in factual and interpretive articles on major topics including business, education, religion, social services, politics, ethnicity, sports, and culture.

**Cyborg Mind** Calum MacKellar, 2019-04-09 With the development of new direct interfaces between the human brain and computer systems, the time has come for an in-depth ethical examination of the way these neuronal interfaces may support an interaction between the mind and cyberspace. In so doing, this book does not hesitate to blend disciplines including neurobiology, philosophy, anthropology and politics. It also invites society, as a whole, to seek a path in the use of these interfaces enabling humanity to prosper while avoiding the relevant risks. As such, the volume is the first extensive study in cyberneuroethics, a subject matter which is certain to have a significant impact in the 21st century and beyond.

Digital Capital Sora Park, 2017-11-10 This book describes and understands the many factors that influence a person's behavior towards digital technologies, and how that affects the person's potential to benefit from digital society. The ability to adapt to these new technological environments - and the extent to which an individual embraces them - has become critical to an individual's well-being and quality of life, the underlying assumption being that only by effectively engaging with digital technologies can the user accrue benefits from the experience. By introducing the concept "digital capital," which refers to the conditions that determine how people access, use, and engage with digital technology, Park examines how the digital ecosystem of the user lead to new forms of digital inequality. Using numerous empirical studies on internet users and non-users, as well as recommending small localized solutions to the big global problem, a critical and alternative perspective of the digital divide is provided.

**Central to Their Lives** Lynne Blackman, 2018-06-20 Scholarly essays on the achievements of female artists working in and inspired by the American South Looking back at her lengthy career just four years before her death, modernist painter Nell Blaine said, Art is central to my life. Not being able to make or see art would be a major deprivation. The Virginia native's creative path began early, and, during the course of her life, she overcame significant barriers in her quest to make and even see art, including serious vision problems, polio, and paralysis. And then there was her gender. In 1957 Blaine was hailed by Life magazine as someone to watch, profiled alongside four other emerging painters whom the journalist praised not as notable women artists but as notable artists who happen to be women. In *Central to Their Lives*, twenty-six noted art historians offer scholarly insight into the achievements of female artists working in and inspired by the American South. Spanning the decades between the late 1890s and early 1960s, this volume examines the complex challenges these artists faced in a traditionally conservative region during a period in which women's social, cultural, and political roles were being redefined and reinterpreted. The presentation—and its companion exhibition—features artists from all of the Southern states, including Dusti Bongé, Anne Goldthwaite, Anna Hyatt Huntington, Ida Kohlmeyer, Lois Mailou Jones, Alma Thomas, and Helen Turner. These essays examine how the variables of historical gender norms, educational barriers, race, regionalism, sisterhood, suffrage, and modernism mitigated and motivated these women who were seeking expression on canvas or in clay. Whether working from studio space, in spare rooms at home, or on the world stage, these artists made remarkable contributions to the art world while fostering future generations of artists through instruction, incorporating new aesthetics into the fine arts, and challenging the status quo. Sylvia Yount, the Lawrence A. Fleischman Curator in Charge of the American Wing at the Metropolitan Museum of Art, provides a foreword to the volume. Contributors: Sara C.
