The Economics and Financing of Education Roe Lyell Johns, Edgar Leroy Morphet, 1969

Higher Education Finance Research Mary P. McKeown-Moak, Christopher M.

Mullin, 2014-02-01 There is a void in the literature on how to conduct research in the finance and economics of higher education. Students, professors, and practitioners have no concise document that examines the field, provides history, definitions of terms, sources of data, and research methods. *Higher Education Finance Research: Policy, Politics, and Practice* fills that void. The book is structured in four parts. The first section provides a brief history and description of the general organization of American higher education, the sources and uses of funds over the last 100 years, and who is served in what types of institutions. Definitions of terms that are unique to higher education are provided, and some basic rules for conducting research on the economics and finance of higher education are established. Although in some ways, conducting research in higher education funding is similar to that for elementary/secondary education, there are some important distinctions that also are provided. The second section introduces guiding philosophies, sources of data, data elements/vocabulary, metrics, and analytics related to institutional revenues and expenditures. Chapters in this section focus on student oriented revenues, institutionally-oriented revenues, and funding formulas. The third section introduces accountability-related concepts by first examining the accountability movement in higher education and performance-based approaches applied in budgeting and funding, then looking at methods to determine public and private returns on investment in postsecondary education, and closing with an examination of finance from the perspective of the primary consumer: students. The fourth and last section of the book focuses on presenting postsecondary finance research to policy audiences to assist in connecting academic research and policy making. Chapters focus on accounting for time considerations in analysis, the placing of data in context to make the data and findings relevant, and ways to effectively communicate findings to various policy-making audiences.

Making Money Matter National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Education Finance, 1999-12-30 The United States annually spends over \$300 billion on public elementary and secondary education. As the nation enters the 21st century, it faces a major challenge: how best to tie this financial investment to the goal of high levels of achievement for all students. In addition, policymakers want assurance that education dollars are being raised and used in the most efficient and effective possible ways. The book covers such topics as: Legal and legislative efforts to reduce spending and achievement gaps. The shift from equity to adequacy as a new standard for determining fairness in education spending. The debate and the evidence over the productivity of American schools. Strategies for using school finance in support of broader reforms aimed at raising student achievement. This book contains a comprehensive review of the theory and practice of financing public schools by federal, state, and local governments in the United States. It distills the best available knowledge about the fairness and productivity of expenditures on education and assesses options for changing the finance system.

Handbook of Research in Education Finance and Policy Helen F. Ladd, Margaret E.

Goertz, 2014-12-17 Sponsored by the Association for Education Finance and Policy (AEFP), the second edition of this groundbreaking handbook assembles in one place the existing research-based knowledge in education finance and policy, with particular attention to elementary and secondary education. Chapters from the first edition have been fully updated and revised to reflect current developments, new policies, and recent research. With new chapters on teacher evaluation, alternatives to traditional public schooling, and cost-benefit analysis, this volume provides a readily available current resource for anyone involved in education finance and policy. The *Handbook of Research in Education Finance and Policy* traces the evolution of the field from its initial focus on school inputs and revenue sources used to finance these inputs, to a focus on educational outcomes

and the larger policies used to achieve them. Chapters show how decision making in school finance inevitably interacts with decisions about governance, accountability, equity, privatization, and other areas of education policy. Because a full understanding of important contemporary issues requires inputs from a variety of perspectives, the Handbook draws on contributors from a number of disciplines. Although many of the chapters cover complex, state-of-the-art empirical research, the authors explain key concepts in language that non-specialists can understand. This comprehensive, balanced, and accessible resource provides a wealth of factual information, data, and wisdom to help educators improve the quality of education in the United States.

Financing Community Colleges David Breneman, Susan C. Nelson, 2010-12-01 It is by far the best study that I know of on community colleges. It comes at a critical time in the history of these institutions. It is carefully reasoned, beautifully written, and sound in its conclusions.—Howard R. Bowen; Professor of Economics and Education, Claremont Graduate School ...and excellent piece of work....Its quality is high and the book is significant. Its significance stems from the fact that it deals with an area of higher education not yet explored by other writings.—Earl F. Cheit; Dean, Schools of Business Administration; University of California, Berkeley ...a great job of describing and clarifying the issues....The book should become 'required reading' for our field...a very fine piece of work that will be a valuable tool for educators, students, and policy-makers.—Roger Yarrington; Vice President, Research and Development, American Association of Community and Junior Colleges ...a thorough job of compiling the pertinent data; of identifying key questions; and of focusing upon central, rather than tangential, issues....Leaders and policy-makers in community colleges and in governmental positions will undoubtedly find the work an invaluable resource.—Bill J. Priest; Chancellor Emeritus, Dallas County Community College District

Encyclopedia of Education Economics and Finance Dominic J. Brewer, Lawrence O. Picus, 2014-08-25 Economics can be a lens for understanding the behavior of schools, districts, states, and nations in meeting education needs of their populaces, as well as for understanding the individual decisions made by administrators, teachers, and students. Insights from economics help decision makers at the state level understand how to raise and distribute funds for public schools in an equitable manner for both schools and taxpayers. Economics also can assist researchers in analyzing effects of school spending and teacher compensation on student outcomes. And economics can provide important insights into public debates on issues such as whether to offer vouchers for subsidizing student attendance at private schools. This two-volume encyclopedia contains over 300 entries by experts in the field that cover these issues and more. Features: This work of 2 volumes (in both print and electronic formats) contains 300-350 signed entries by significant figures in the field. Entries conclude with cross-references and suggestions for further readings to guide students to in-depth resources. Although organized in A-to-Z fashion, a thematic "Reader's Guide" in the front matter groups related entries by topic. Also in the front matter, a chronology provides students with historical perspective on the development of education economics and finance as a field of study The entire work concludes with a Resources appendix and a comprehensive Index. In the electronic version, the index, Reader's Guide, and cross references combine to provide effective search-and-browse capabilities.

Financing Education Walter W. McMahon, Terry G. Geske, 1982 Financing Education is intended for students, faculty, and policymakers in the economics of education, in school finance, and in the financing of higher education. Those in educational administration who are concerned with the management of retrenchment and who are aware of the important role of innovation and new research in reducing costs, meeting society's needs, and adapting to change should also find it interesting and suggestive.--From the preface

Education and the Public Interest Edward P. St. John, 2007-05-28 Economic globalization has been accompanied by implementation of education reforms linked to accountability and public finance schemes that emphasize student choice in schools and student loans in higher education. This book provides a systematic evaluation of the effects of state education reforms and finance

policies over the past decades. It includes a discussion of the need for a fundamental rethinking of educational policy in the United States.

The Finance of Higher Education Michael B. Paulsen, John C. Smart, 2001 A wide-ranging examination of the governmental and institutional policies and practices, and essential theories and areas of research that in combination establish the foundation, explore and extend the boundaries, and expand the base of knowledge in the field of higher education finance. (Education)

Economics of Higher Education Selma J. Mushkin, 1962 Composite work in economic research on higher education in the USA - covers labour demand and supply of professional workers and university graduates, financing educational investment, etc. References and statistical tables.

Economics and Finance of Higher Education Linda DeAngelo, Kristin DeLuca, Michael Gunzenhauser, 2014 Since the publication of the 2nd Edition of this Reader in 2001, there has been a large increase in the amount of research and scholarly publication on issues of higher education finance. This is not surprising, given the pattern of decreased public funding and increased student cost over this period. Strategic planning and its relationship to budgeting under growing financial constraints have been of continuing interest among both higher education scholars and practitioners. What has changed, however, is the greater inclusion of explicitly economic perspectives in publications dealing with various aspects of postsecondary education. Because of these changing publication patterns, it was appropriate to add the word Economics to the title of this edition. Inside you'll find a mix of scholarly and practitioner-oriented publications, as well as thoughtful scholar-written section introductions that bring the reader up to date on the current issues.

A Context for Policy Research in Financing Postsecondary Education United States. National Commission on the Financing of Postsecondary Education, 1974

Financing Education in a Climate of Change Percy E. Burrup, Vern Brimley, Rulon R. Garfield, 1993 In 1994, Congress passed the Improving America's Schools Act. Thereafter came the AMERICA 2000 and GOALS 2000 plans, and the President's ten point proposal, A Call to Action, recommending costly national tests, And now we are witness to school vouchers, a burgeoning number of charter schools, and the privatization of school districts. The common link among these educational policies, recommendations and changes is finance. This book explores the all-important subject of educational finance through scrutiny of both the past and present. This comprehensive book examines school finance, encompassing the historical, economic, and legal perspectives. An excellent reference guide, the book is written simultaneously in both a scholarly and reader-friendly manner. Other topics covered include lotteries, choice, vouchers, risk-management, business issues for principals, and the equity issue as it relates to the individual school. Educational administrators, teachers, school board members, legislators, and business administrators.

Developments in School Finance William J. Fowler, 1998-05 Contains papers by state education dept. policymakers, analysts, and data providers on emerging issues in school finance. Includes: estimates of disparities and analysis of the causes of expenditures in public school districts; race, poverty and the student curriculum; court-ordered school finance equalization; resource allocation to schools under conditions of radical decentralization; building equity and effectiveness into school-based funding models; alternative options for deflating education expenditures over time; productivity collapse in schools; and evaluating the effect of teacher degree level on educational performance.

To What Ends and By What Means Gloria M. Rodriguez,R. Anthony Rolle,2013-10-31 This unique collection examines the social justice implications of contemporary economic, finance, and budgeting policies affecting the K-12 education system in the United States. The authors included in this volume provide critiques and explorations of several established theories and policy approaches that undergird contemporary thinking in the field of school finance. These explorations offer themselves as foundations for building new frameworks to understand how school finance policies might better support broader changes needed to improve the educational conditions faced by those individuals and groups traditionally underrepresented in economic, political, and social policy arenas.

Financing Education in a Climate of Change Vern Brimley,Deborah A. Verstegen,Rulon R. Garfield,2012 For educational administration and leadership students taking school finance courses. A popular, user-friendly school finance text that is both current and comprehensive. The newly revised eleventh edition of this classic school finance text retains its practical tone and superior presentation while adding the most up-to-date information and material regarding education finance. Providing readers with a firm knowledge of all facets of financing education — along with a number of helpful pedagogical tools such as clear tables and end-of-chapter assignment projects — this new edition adds information on hot button topics including the economics of education, recent and relevant court decisions, and the ongoing debate about school vouchers, tax credits, and charter schools.
