Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**The Nature of Technology** W. Brian Arthur,2010 The Nature of Technology will change the way you think about this fundamental subject forever. W. Brian Arthur's many years of thinking and writing about technology have culminated in a unique understanding of his subject. Here he examines the nature of technology itself: what is it and how does it evolve? Giving rare insights into the evolution of specific technologies and a new framework for thinking about others, every sentence points to some further truth and fascination. At a time when we are ever more reliant on technological solutions for the world's problems, it is extraordinary how little we actually understand the processes that lead to innovation and invention. Until now. This will be a landmark book that will define its subject, and inspire people to think about technology in depth for the very first time.

**The Futurist Cookbook** Filippo Tommaso Marinetti, 2014-05-01 Both madcap cookbook and manifesto on Futurism, Marinetti's exuberant and entertaining book has been described as one of 'the best artistic jokes of the century' No other cultural force except the early twentieth-century avant-garde movement Futurism has produced a provocative work about art disguised as an easy-to-read cookbook. Part manifesto, part artistic joke, Filippo Marinetti's The Futurist Cookbook is a collection of recipes, experiments, declamations and allegorical tales. Here are recipes for ice cream on the moon; candied atmospheric electricities; nocturnal love feasts; sculpted meats. Marinetti also sets out his argument for abolishing pasta as ill-suited to modernity, and advocates a style of cuisine that will increase creativity. Although at times betraying its author's nationalistic sympathies, The Futurist Cookbook is funny, provocative, whimsical, disdainful of sluggish traditions and delighted by the velocity and promise of modernity. Filippo Tommaso Marinetti was born in 1876 to Italian parents and grew up in Alexandria, Egypt, where he was nearly expelled from his Jesuit school for championing scandalous literature. He then studied in Paris and obtained a law degree in Italy before turning to literature. In 1909 he wrote the infamous Futurist Manifesto, which championed violence, speed and war, and proclaimed the unity of art and life. Marinetti's life was fraught with controversy: he fought a duel with a hostile critic, was subject to an obscenity trial, and was a staunch supporter of Italian Fascism. Alongside his literary activities, he was a war correspondent during the Italo-Turkish War and served on the Eastern Front in World War I, despite being in his sixties. He died in 1944. 'A paean to sensual freedom, optimism and childlike, amoral innocence ... it has only once been answered, by Aldous Huxley's Brave New World' Lesley Chamberlain
