Asia-Pacific Rebalance 2025 Michael Green, Kathleen Hicks, Mark F. Cancian, 2016-02-04 In 2015, Congress tasked the Department of Defense to commission an independent assessment of U.S. military strategy and force posture in the Asia-Pacific, as well as that of U.S. allies and partners, over the next decade. This CSIS study fulfills that congressional requirement.

Adak Andrew C A Jampoler, 2011-11-15 In the tradition of great tales of men against the sea, Adak offers a compelling look at courage and commitment in the face of certain tragedy. Alfa Foxtrot 586 was a P-3 Orion on station on a sensitive Cold War mission off the Kamchatka Peninsula on 26 October 1978. When a propeller malfunction turned into an engine fire, the pilot was forced to ditch his turboprop into the empty, mountainous seas west of the Aleutian Islands. The aircraft went down in just ninety seconds, taking one of the three rafts with it. Thirteen men launched the other rafts, the smallest of which—terribly overcrowded—soon began to leak, threatening the nine men aboard. This account of the flight crew's desperate battle against the sea, and the heroic efforts to rescue them provide an engrossing true story of survival.

Handbook on the Cuban Armed Forces United States. Defense Intelligence Agency, 1979

October Fury Peter A. Huchthausen, 2007-08-03 Huchthausen knows the hidden history of the Cuban missile crisis . . . October Fury contains startling revelations. -- TOM CLANCY Drama on the high seas as the world holds its breath It was the most spectacular display of brinkmanship in the Cold War era. In October 1962, President Kennedy risked inciting a nuclear war to prevent the Soviet Union

from establishing missile bases in Cuba. The risk, however, was far greater than Kennedy realized. *October Fury* uncovers startling new information about the Cuban missile crisis and the potentially calamitous confrontation between U.S. Navy destroyers and Soviet submarines in the Atlantic. Peter Huchthausen, who served as a junior ensign aboard one of the destroyers, reveals that a single shot fired by any U.S. warship could have led to an immediate nuclear response from the Soviet submarines. This riveting account re-creates those desperate days of confrontation from both the American and Russian points of view and discloses detailed information about Soviet operational plans and the secret orders given to submarine commanders. It provides an engrossing, behind-the-scenes look at the technical and tactical functions of two great navies along with stunning portraits of the officers and sailors on both sides who were determined to do their duty even in the most extreme circumstances. As absorbing and detailed as a Tom Clancy novel, this real-life suspense thriller is destined to become a classic of naval literature.

Chemical Warfare Secrets Almost Forgotten James S.

Ketchum, 2006-01-01

Cuba on the Brink James G. Blight, Bruce J. Allyn, David A. Welch, 2002 With the disintegration of the Soviet Union and international socialism, Cuba now finds itself isolated as the United States continues to press for its economic and political collapse. How Fidel Castro sees Cuba's plight and what he hopes to do about it emerge from this account of a unique conference held in Havana in 1992. The meeting brought together participants in the Cuban missile crisis from the former Soviet Union, Cuba, and the U.S. to discuss its causes and course. This account is now available for the first time in paperback, on the 40th anniversary of the Cuban Missile Crisis. This

first meeting between Castro, his ex-Soviet allies, and his American foes produced startling revelations about his dealings with the Soviets, chilling details of the number and kind of Soviet nuclear arms that Cuba possessed in 1962, and an illuminating account of Castro's view of the American threat--then and now. The dramatic exchanges between Castro and such conference participants as Anatoly I. Gribkov, former head of the Warsaw Pact; former U.S. Secretary of Defense Robert McNamara; and Arthur Schlesinger, Jr., Special Assistant to John Kennedy, reveal misperceptions on all sides that led us to the brink of nuclear war. An extraordinary examination of an international crisis, *Cuba on the Brink* illustrates the ongoing Cuba problem, and will help guide our actions toward other countries deemed hostile to our national interest.

The 71F Advantage National Defense University Press, 2010-09
Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in

many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

Strategies of Containment John Lewis Gaddis, 2005-06-23 When Strategies of Containment was first published, the Soviet Union was still a superpower, Ronald Reagan was president of the United States, and the Berlin Wall was still standing. This updated edition of Gaddis' classic carries the history of containment through the end of the Cold War. Beginning with Franklin D. Roosevelt's postwar plans, Gaddis

provides a thorough critical analysis of George F. Kennan's original strategy of containment, NSC-68, The Eisenhower-Dulles New Look, the Kennedy-Johnson flexible response strategy, the Nixon-Kissinger strategy of detente, and now a comprehensive assessment of how Reagan - and Gorbechev - completed the process of containment, thereby bringing the Cold War to an end. He concludes, provocatively, that Reagan more effectively than any other Cold War president drew upon the strengths of both approaches while avoiding their weaknesses. A must-read for anyone interested in Cold War history, grand strategy, and the origins of the post-Cold War world.
