Russia's Chechen Wars 1994-2000 Olga Olikier, 2001-09-28 An examination of the difficulties faced by the Russian military in planning and carrying out urban operations in Chechnya. Russian and rebel military forces fought to control the Chechen city of Grozny in the winters of 1994-1995 and 1999-2000, as well as clashing in smaller towns and villages. The author examines both Russian and rebel tactics and operations in those battles, focusing on how and why the combatants' approaches changed over time. The study concludes that while the Russian military was able to significantly improve its ability to carry out a number of key tasks in the five-year interval between the wars, other important missions--particularly in the urban realm--were ignored, largely in the belief that the urban mission could be avoided. This conscious decision not to prepare for a most stressful battlefield met with devastating results, a lesson the United States would be well served to study.

Raising Red Flags N.R. Jenzen-Jones, Jonathan Ferguson, 2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication.

T-80 Standard Tank Steven J. Zaloga, 2011-10-20 The history of the little-known yet controversial T-80 and its subsequent variants. The Soviet T-80 Standard Tank was the last tank fielded before the Soviet collapse, and the most controversial. Despite having the most sophisticated fire controls and multi-layer armor ever fielded on a Soviet tank, its turbine power plant (rather than a conventional diesel) remained a source of considerable trouble throughout its career. Steven J Zaloga charts the little-known history of the T-80, covering the initial construction, through the development to the subsequent variants, the T-84 and Russia's enigmatic "Black Eagle Tank." Accompanying detailed cut-away artwork illustrates the unusual design features that made the T-80 so controversial.

The Tanks of August Ruslan Pukhov, 2010 The publication of this book coincides with the second anniversary of the armed conflict between Russia and Georgia on August 8-12, 2008, now dubbed the Five Day War. The conflict was triggered by Georgia's ambitious and nationalistic president, Mikhail Saakashvili, who attempted a blitzkrieg to conquer the former Georgian autonomy of South Ossetia, which had proclaimed independence. That attempt led to a military intervention by Russia, which acted as the guarantor of peace in the region, and the first official war between Russia and one of the former Soviet republics. This work contains six essays, from a primarily Russian perspective, which provide an in-depth analysis of the political, social, economic, and military context for and causes of the war, the nature of wartime military operations, the human and material costs of the brief struggle, and the war's likely implications for the future.

The Transformation of the Armed Forces Michele Nones, Alessandro Marrone, 2012 Information technology (IT) has had, and will continue to have, a deep impact on the defence sector. The most advanced countries, not only the U.S. but also France, Great Britain and Italy, over the past few years have undergone a transformation of their armed forces aimed at exploiting the strategic advantages of IT. The goal pursued in Europe, and also promoted by NATO, is Network Enabled Capability (NEC). That is combining equipment and soldiers, as well as different doctrinal, procedural, technical and organizational elements, into a single network to obtain their interaction in order to achieve substantial strategic superiority. In practice, this also occurs with a strong, efficient and secure telecommunications network, and through netcentric modernization of armed forces' capability and systems aimed at connecting them to the net. This research paper analyzes the military netcentric modernization and transformation programs - still in

progress - in France, Britain and Italy, with special focus on the joint program led by the Italian army called Forza NEC. Opportunities and challenges of Forza NEC have been considered according to the Italian armed force's requirements, developed during two decades of experience in international military operations, as well as in the light of the evolution of strategic doctrine at a European and transatlantic level. Particular attention has been devoted to the interaction between industry and the armed forces, and to the involvement of many Italian companies in different Forza NEC activities, as it represents one of the pillars of the procurement program.

Russia's Military Modernisation: An Assessment The International Institute for Strategic Studies (IISS),2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow's armed forces and military capabilities. It analyses the aspirations underpinning Russia's military reform programme and its successes as well as its failures. The book also provides insights into Russia's operational use of its armed forces, including in the intervention in Syria, the goals and results of recent state armament programmes, and the trajectory of future developments. This full-colour volume includes more than 50 graphics, maps and charts and over 70 images, and contains chapters on: Russia's armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia's approach to military decision-making and joint operations Economics and industry At a time when Russia's relations with many of its neighbours are increasingly strained, and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state, capabilities and future of Russia's armed forces.

Chemical and Bioprocess Engineering Ricardo Simpson,Sudhir K. Sastry,2013-12-04 The goal of this textbook is to provide first-year engineering students with a firm grounding in the fundamentals of chemical and bioprocess engineering. However, instead of being a general overview of the two topics, Fundamentals of Chemical and Bioprocess Engineering will identify and focus on specific areas in which attaining a solid competency is desired. This strategy is the direct result of studies showing that broad-based courses at the freshman level often leave students grappling with a lot of material, which results in a low rate of retention. Specifically, strong emphasis will be placed on the topic of material balances, with the intent that students exiting a course based upon this textbook will be significantly higher on Bloom's Taxonomy (knowledge, comprehension, application, analysis and synthesis, evaluation, creation) relating to material balances. In addition, this book also provides students with a highly developed ability to analyze problems from the material balances perspective, which leaves them with important skills for the future. The textbook consists of numerous exercises and their solutions. Problems are classified by their level of difficulty. Each chapter has references and selected web pages to vividly illustrate each example. In addition, to engage students and increase their comprehension and rate of retention, many examples involve real-world situations.

M1 Abrams vs T-72 Ural Steven J. Zaloga,2011-01-01 The Gulf War bore witness to a number of deadly encounters between these two great adversaries. Heavily armoured, highly mobile and capable of killing at over 2500m the M1 Abrams is, to this day, a veritable fighting machine. Superior to both Iraq's Soviet era T-55 and T-62 tanks, nearly all sources claim that no Abrams tank has ever been destroyed by enemy fire. Despite entering service in 1980, the M1 Abrams remained untested in combat until the Gulf War in 1991, where it was to be confronted by its archenemy the Iraqi-assembled Soviet-designed T-72. Entering production in 1971, the T-72 arguably outstripped its contemporaries in a balance of mobility, protection and firepower. By the time of Operation Desert Storm, however, the tables had turned and the tank suffered due to low quality ammunition and poorly trained crews. In this fascinating study, Steven Zaloga pits these two great fighting machines against one another, plotting the development of the Cold War until both tanks met in combat in the deserts of Iraq and Kuwait.

The Modern Russian Army 1992-2016 Mark Galeotti,2017-02-23 A full and authoritative illustrated history of Russia's army since the fall of the Soviet Union in 1991, including Air Assault and Navy ground forces. Since the collapse of the Soviet Union, Russia's army has undergone a turbulent transformation, from the scattered left-overs of the old Soviet military, through a period of shocking decay and demoralization, to the disciplined force

and sophisticated 'hybrid war' doctrine that enabled Vladimir Putin to seize Crimea virtually overnight in 2014. Using rare photographs and full colour images of the army in action, profiles of army leaders and defence ministers, as well as orders of battle and details of their equipment and dress, this is a vivid account of the army's troubled history and of its character, capabilities and status. Written by an internationally respected author with remarkable access to Russian-language sources and Russian veterans, this study is essential reading for anyone wishing to understand the growing power of Russia's military.

In Deadly Combat Gottlob Herbert Bidermann, 2000-06-07 In the hell that was World War II, the Eastern Front was its heart of fire and ice. Gottlob Herbert Bidermann served in that lethal theater from 1941 to 1945, and his memoir of those years recaptures the sights, sounds, and smells of the war as it vividly portrays an army marching on the road to ruin. A riveting and reflective account by one of the millions of anonymous soldiers who fought and died in that cruel terrain, *In Deadly Combat* conveys the brutality and horrors of the Eastern Front in detail never before available in English. It offers a ground soldier's perspective on life and death on the front lines, providing revealing new information concerning day-to-day operations and German army life. Wounded five times and awarded numerous decorations for valor, Bidermann saw action in the Crimea and siege of Sebastopol, participated in the vicious battles in the forests south of Leningrad, and ended the war in the Courland Pocket. He shares his impressions of countless Russian POWs seen at the outset of his service, of peasants struggling to survive the hostilities while caught between two ruthless antagonists, and of corpses littering the landscape. He recalls a Christmas gift of gingerbread from home that overcame the stench of battle, an Easter celebrated with a basket of Russian hand grenades for eggs, and his miraculous survival of machine gun fire at close range. In closing he relives the humiliation of surrender to an enemy whom the Germans had once derided and offers a sobering glimpse into life in the Soviet gulags. Bidermann's account debunks the myth of a highly mechanized German army that rolled over weaker opponents with impunity. Despite the vast expanses of territory captured by the Germans during the early months of Operation Barbarossa, the war with Russia remained tenuous and unforgiving. His story commits that living hell to the annals of World War II and broadens our understanding of its most deadly combat zone. Translator Derek Zumbro has rendered Bidermann's memoir into a compelling narrative that retains the author's powerful style. This English-language edition of Bidermann's dynamic story is based upon a privately published memoir entitled *Krim-Kurland Mit Der 132 Infanterie Division*. The translator has added important events derived from numerous interviews with Bidermann to provide additional context for American readers.

Heavy Metals Wim Salomons, Ulrich Förstner, Pavel Mader, 2012-12-06 *Heavy Metals: Problems and Solutions* is divided into three sections dealing with basic geochemical processes, remediation and case studies. The basic geochemical processes are discussed with respect to mobility in the environment and impact as well as methods to derive guidelines for heavy metals. Remediation focuses on currently available methods to treat contaminated sediments and soils. In addition, it considers the concept of geochemical engineering for remediation of large areas contaminated by metals. A number of case studies of polluted sediments and soils and their environmental impact highlight the principles discussed in the first two sections.

Pygmy Chuck Palahniuk, 2009-09-30 "Begins here first account of operative me, agent number 67 on arrival midwestern American airport greater ____ area. Flight _____. Date _____. Priority mission top success to complete. Code name: Operation Havoc." Thus speaks Pygmy, one of a handful of young adults from a totalitarian state sent to the United States, disguised as exchange students, to live with typical American families and blend in, all the while planning an unspecified act of massive terrorism. Palahniuk depicts Midwestern life through the eyes of this thoroughly indoctrinated little killer, who hates Americans with a passion, in this cunning double-edged satire of a xenophobia that might, in fact, be completely justified.

Beech Aircraft and Their Predecessors Alain J. Pelletier, 1995 Highly acclaimed for its comprehensive coverage of the aviation industries and their

Here are startling revelations of the treacherous fighting, and the challenges and dangers of battling a better-equipped enemy in outmoded, slow-moving death traps.
