Quarterly Army List for the Quarter Ending 31st December, 1919 - Volume 3 HMSO 2012-02-07

Volume 3 of 4. This volume contains the War Services of:- (1) Regular Officers on the Active List and on Retired Pay, and Officers on the General Reserve. (2) Officers of the Special Reserve of Officers, the Territorial Force and those serving on temporary Commissions who had war service prior to the War of 1914-19, and who were gazetted before 2nd January 1918 to Mentions in Despatches and Honours in The War of 1914-20. Also included, under separate headings, are Queen Alexandra's Imperial Military Nursing Service, Territorial Force Nursing Service, Queen Mary's Army Auxiliary Corps as well as Officers of the Forces of the Oversea Dominions and Colonies. Names are arranged alphabetically. It should be noted that Officers of the Regular Army (including those with temporary commissions), Special Reserve and Territorial Force who have retired or have relinquished their Commissions with permission to retain rank but are NOT in receipt of any retired pay from Army funds, are NOT included in these lists. Their details are published in a separate, supplementary volume.

Innovation Engineering Patrick Corsi 2013-03-04 This title explores the issue of innovation engineering, a feature that is essential to the continuation of growth and development in the commercial world. Discussion is divided into three parts: Part I covers the historical basis of innovation, noting that diversity rests upon a duality between concepts in theory and applications put into practice, as well as discussing how innovation has resulted from the interaction of numerous factors, be they societal, human, managerial, organization or technological. Part II focuses on practical applications – the technologies, tools and methods employed in putting theoretical innovation into practice – while Part III looks at what factors underpin success, discussing the social and psychological aspects involved in successful innovation engineering. Consideration is also given to recent developments and systems which will assist in ensuring the continuation of this process in the future.

Electric Trucks Kevin Desmond 2019-12-04 Welcomed at end of the 19th century as the solution to the severe problem of horse manure in city streets, electric trucks soon became the norm for short-haul commercial deliveries. Though reliable, they were gradually replaced by gasoline-powered trucks for long-haul deliveries—although a fleet of electric milk trucks survived in Great Britain into the 1960s. Industrial electric vehicles never disappeared from factories and ports. During the past decade, with the availability of the lithium-ion battery, the electric truck is back on the road for all payloads and all distances. The fourth in a series covering the history and future of electric transport, this book chronicles the work of the innovative engineers who perfected e-trucks large and small.

Photoassimilate Distribution Plants and Crops Source-Sink Relationships Zamski 2017-09-29 Adopting an interdisciplinary approach to the study of photoassimilate partitioning and source-sink relationships, this work details the major aspects of source-sink physiology and metabolism, the integration of individual components and photoassimilate partitioning, and the whole plant source-sink relationships in 16 agriculturally important crops. The work examines in detail the components of carbon partitioning, such as ecology, photosynthesis, loading, transport and anatomy, and discusses the impact of genetic, environmental and agrotechnical factors on the parts of whole plant source-link physiology.

Russian and Soviet Military Vehicles Source Wikipedia 2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 58. Chapters: Armoured fighting vehicles of Russia, Armoured fighting vehicles of the Soviet Union, Soviet and Russian air defence vehicles, BRDM-2, ZSU-57-2, ZSU-23-4, 2K12 Kub, 9K22 Tunguska, BRDM-1, 9K31 Strela-1, 9K35 Strela-10, 9K33 Osa, Austin Armoured Car, 2K11 Krug, VPK-3927 Volk, Vityaz, MT-55, ZIS-5, T-98 Komбат, UAZ-469, GM chassis, Aerosani, BAV 485, BPM-97, GAZ 46, PTS, GAZ-2975, GAZ-66, ZIL 131, Cat House radar, IT-1, ZiS-151, Polyana-D4, UAZ-452, MAZ-7310, GAZ-69, AT-T, ATS-59, LuAZ-967, ZIS-6, GAZ-3937, AT-

L, KSP-76, Garford-Putilov Armoured Car, ZIL-135, ZIL-157, List of currently active Russian military land vehicles, Ranzhir-M, Fiat-Omsky armoured car, BAD-2. Excerpt: The BRDM-2 (Boyevaya Razvedyvatelnaya Dozornaya Mashina,, literally "Combat Reconnaissance/Patrol Vehicle") is an amphibious armoured patrol car used by Russia and the former Soviet Union. It was also known under designations BTR-40PB, BTR-40P-2 and GAZ 41-08. This vehicle, like many other Soviet designs, has been exported extensively and is in use in at least 38 countries. It was intended to replace the earlier BRDM-1 with a vehicle that had improved amphibious capabilities and better armament. After few years of exploitation of BRDM-1 by the Soviet Army its limitations and drawbacks became obvious. The vehicle had no turret and to operate the armament the gunner had to open a hatch and expose himself to enemy fire. The vehicle wasn't fitted with an NBC

protection system, and had no night vision equipment by default. The vehicle also didn't have any kind of special sights which undermined its usability as a reconnaissance vehicle. These drawbacks encouraged the design team to create a new vehicle which would suit modern battlefield. Swimming Polish BRDM-2 armoured...
