**Land of Promise** Michael Lind 2012-04-17 "[An] ambitious economic history of the united States...rich with details." ?-David Leonhardt, New York Times Book Review How did a weak collection of former British colonies become an industrial, financial, and military colossus? From the eighteenth to the twenty-first centuries, the American economy has been transformed by wave after wave of emerging technology: the steam engine, electricity, the internal combustion engine, computer technology. Yet technology-driven change leads to growing misalignment between an innovative economy and anachronistic legal and political structures until the gap is closed by the modernization of America's institutions--often amid upheavals such as the Civil War and Reconstruction and the Great Depression and World War II. When the U.S. economy has flourished, government and business, labor and universities, have worked together in a never-ending project of economic nation building. As the United States struggles to emerge from the Great Recession, Michael Lind clearly demonstrates that Americans, since the earliest days of the republic, have reinvented the American economy - and have the power to do so again.

**Race/Gender/Class/Media** Rebecca Ann Lind 2019 Race/Gender/Class/Media considers diversity in the mass media in three main settings: Audiences, Content, and Production. It brings together 53 readings--most are newly commissioned for this edition--by scholars representing a variety of social science and humanities disciplines. Together, these readings provide a multifaceted and often intersectional look at how race, gender, and class relate to the creation and use of media texts as well as the media texts themselves. Designed to be flexible in the classroom, the book begins with a detailed introduction to key concepts and presents a contextualizing introduction to each of the three main sections. Each reading contains multiple It's Your Turn activities to foster student engagement and which can serve as the basis for assignments. The book offers a list of resources--books, articles, films, and websites--that are of value to students and instructors. Several alternate Tables of Contents are provided as options for reorganizing the material and maximizing the flexibility of the readings: by site of struggle (gender, race, class), by medium (television, print, digital, etc.), and by arena (journalism, entertainment). This volume is an essential introduction to interdisciplinary studies of gender, race, and class across mass media. ctors. The main objective of the text is to provide students majoring in all fields of business administration with an introductory survey of the many applications of descriptive and inferential statistics. The relevant approach taken in this text relates to the college students today as they will receive the information that is important to them in this class as well as their future careers. Understanding the concepts, seeing and doing plenty of examples and exercises, and comprehending the application of statistical methods in business and economics are the focus of this book. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

**Jenny Lind - A Record and Analysis of the 'Method' of the Late Madame Jenny Lind-Goldschmidt** W. S. Rockstro 2016-08-26 Originally published in 1894, this early work is a fascinating and informative look at the subject. Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

**Vietnam** Michael Lind 2013-07-30 A quarter century after its end, the Vietnam War still divides Americans. Some, mostly on the left, claim that Indochina was of no strategic value to the United States and was not worth an American war. Others, mostly on the right, argue that timid civilian leaders and defeatists within the media fatally undermined the war effort. These "lessons of Vietnam" have become ingrained in the American consciousness, at the expense of an accurate understanding of the war itself. In this groundbreaking reinterpretation of America's most disastrous and controversial war, Michael Lind demolishes the stale orthodoxies of the left and the right and puts the Vietnam War in its proper context -- as part of the global conflict between the Soviet Union and the United States. The Cold War, he argues, was actually the third world war of the twentieth century, and the proxy wars in Korea, Vietnam, and Afghanistan were its major campaigns. Unwilling to engage each other in the heart of Europe, the superpowers played out their contest on the Asian front, while the rest of the world watched to see which side would retreat. As Lind shows, the Soviet Union and Communist China recognized the importance of Vietnam in this struggle and actively supported the North Vietnamese regime from its earliest days, a fact that was not lost on the strategic planners within the Kennedy, Johnson, and Nixon administrations. Lind offers a provocative reassessment of why the United States failed in Vietnam despite the high stakes. The ultimate responsibility for defeat lies not with the civilian policy elite nor with the press but with the military establishment, which failed to adapt to the demands of what before 1968 had been largely a guerrilla war. The high costs of the military's misguided approach in American and Vietnamese lives sapped the support of the American people for the U.S. commitment to Indochina. Even worse, the costs of the war undermined American public support for the Cold War on all fronts. Lind masterfully lays bare the deep cultural

divisions within the United States that made the Cold War consensus so fragile and shows why it broke apart so easily. The consequence of U.S. military failure was thus the forfeiture of Indochina, a resurgence of American isolationism, and a wave of Soviet imperial expansion checked only by the Second Cold War of the 1980s. The New York Times has written of Michael Lind that he "defies the usual political categories of left and right, liberal and conservative." And in an era when the United States so often finds itself embroiled in prolonged and difficult conflicts -- in Kosovo, Bosnia, and Iraq -- Lind offers a sobering cautionary tale to Americans of all political viewpoints.

**Girls, Women, and Crime** Meda Chesney-Lind 2012-01-26 Edited by Meda Chesney-Lind and Lisa Pasko, *Girls, Women and Crime: Selected Readings, Second Edition* is a compilation of journal articles on the female offender written by leading researchers in the field of criminology and women's studies. The individual sections in the book survey four major areas: theories of female criminality, literature on female juvenile delinquents, women as offenders and women in prison. The readings in *Girls, Women, and Crime* focus on two central questions: How does gender matter in crime and the justice system? What characterizes women's and girls' pathway to crime? In answering these key questions, the contributors reveal the complex worlds females in the criminal justice system must often negotiate--worlds that are frequently riddled with violence, victimization, discrimination, and economic marginalization.

**The New Class War** Michael Lind 2020-01-21 In both Europe and North America, populist movements have shattered existing party systems and thrown governments into turmoil. The embattled establishment claims that these populist insurgencies seek to overthrow liberal democracy. The truth is no less alarming but is more complex: Western democracies are being torn apart by a new class war. In this controversial and groundbreaking new analysis, Michael Lind, one of America's leading thinkers, debunks the idea that the insurgencies are primarily the result of bigotry, traces how the breakdown of mid-century class compromises between business and labor led to the conflict, and reveals the real battle lines. On one side is the managerial overclass--the university-credentialed elite that clusters in high-income hubs and dominates government, the economy and the culture. On the other side is the working class of the low-density heartlands--mostly, but not exclusively, native and white. The two classes clash over immigration, trade, the environment, and social values, and the managerial class has had the upper hand. As a result of the half-century decline of the institutions that once empowered the working class, power has shifted to the institutions the overclass controls: corporations, executive and judicial branches, universities, and the media. The class war can resolve in one of three ways: • The triumph of the overclass, resulting in a high-tech caste system. • The empowerment of populist, resulting in no constructive reforms • A class compromise that provides the working class with real power Lind argues that Western democracies must incorporate working-class majorities of all races, ethnicities, and creeds into decision making in politics, the economy, and culture. Only this class compromise can avert a never-ending cycle of clashes between oligarchs and populists and save democracy.

**Summary of Michael Lind's The New Class War** Everest Media, 2022-05-04T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 The Cold War has been followed by a transatlantic class war between elites based in the corporate, financial, government, media, and educational sectors and disproportionately native working-class populists. #2 Following the abandonment of communism, the global norm has been a mixed economy dominated by bureaucratic corporations, bureaucratic government, and bureaucratic nonprofits. #3 The overclass is made up of college-educated managers and professionals who exercise disproportionate influence in politics and society by virtue of their institutional positions in large, powerful bureaucracies. #4 In a purely meritocratic society, the ranks of university-educated managers and professionals would be refilled completely by upwardly mobile individuals in each generation. But in America and Europe, intergenerational mobility is low.

**Brave New Home** Diana Lind 2020-10-13 This smart, provocative look at how the American Dream of single-family homes, white picket fences, and two-car garages became a lonely, overpriced nightmare explores how new trends in housing can help us live better. Over the past century, American demographics and social norms have shifted dramatically. More people are living alone, marrying later in life, and having smaller families. At the same time, their lifestyles are changing, whether by choice or by force, to become more virtual, more mobile, and less stable. But despite the ways that today's America is different and more diverse, housing still looks stuck in the 1950s. In *Brave New Home*, Diana Lind shows why a country full of single-family houses is bad for us and our planet, and details the new efforts underway that better reflect the way we live now, to ensure that the way we live next is both less lonely and more affordable. Lind takes readers into the homes and communities that are seeking alternatives to the American norm, from multi-

generational living, in-law suites, and co-living to microapartments, tiny houses, and new rural communities. Drawing on Lind's expertise and the stories of Americans caught in or forging their own paths outside of our cookie-cutter housing trap, Brave New Home offers a diagnosis of the current American housing crisis and a radical re-imagining of future possibilities.
